J HERO SERIES

J-Hero la nuova concept series dalle azioni ricercate ed il look accattivante. Ogni canna è stata studiata sul campo e rifinita senza scendere a compromessi. Il risultato al di là delle differenti azioni è un grezzo leggero, resistente, sensibile e reattivo. Il pitch a vista su tutto il blank rende queste canne più resistenti, performanti e curate. lanci lunghi, sensibilità e ferrate fulminee saranno la normalità. Ognuna è corredata da anelli Fuji in Alconite con profilo K e ponte in acciaio, manico in eva e rifiniture di pregio.

J-Hero: the new concept series with valued action and an attractive look. Each rod has been studied in the field and finished without compromise. Beyond the different actions, the result is a light, durable, sensitive and responsive blank. The exposed pitch on the entire blank makes these rods more durable, high-performance and well-maintained. Long casts, sensitivity and lightning fast strikes will be the norm. Each one has Fuji alconite rings with a K-profile and steel bridge, EVA handle and fine finishing.

J HERO | UNI BUTT

Queste 3 canne con il manico uni-butt, che si stacca dal grezzo, sono stet dedicate ai pescatori che vogliono l'azione di una monopezzo e la comodità di una canna in 2 sezioni. Una serie nella serie per gli specialisti della pesca in mare e in acqua dolce. Trote, bass, sandre, lucci e persici reali, ma anche spigole, serra e barracuda saranno le vostre prede. La sensibilità e l'azione vi stupiranno!

These 3 rods with a unibutt handle —which detaches from the blank—are for anglers who want the action of a one-piece and the comfort of a two-piece. This series within a series is for sea and freshwater fishing specialists. Trout, bass, zander, pike, perch, European seabass, bluefish and barracuda will be your prey. Its sensitivity and action will amaze you!

J HERO | 2 SECTIONS

Le stesse performance di una monopezzo in una 2 pezzi, grazie ad uno spigot arricchito da carbon wrapping sull'innesto. Questa seconda soluzione è la nostra offerta per chi non vuole, o non può usare una monopezzo. Ciò a dimostrazione della volontà di innovare per portare qualità e performance nelle mani di tutti i pescatori. 7 azioni/lunghezze per coprire lo spinning light, medio, e non solo. Canne dedicate ai predatori d'acqua dolce quali trote, bass, sandre, lucci, ma che strizza l'occhio allo spinning SW a spigole, serra e barracuda.

The same performance as a one-piece in a two-piece, thanks to a spigot enriched by carbon wrapping on the coupling. This second solution is our offer for people who do not want to, or cannot, use a one-piece. This demonstrates a willingness to innovate to bring quality and performance into the hands of all anglers. 7 actions/lengths to cover light, medium and other spinning. Dedicated rods for freshwater predators such as trout, bass, zander and pike, and SW spinning for European seabass, bluefish and barracuda.

SHADOW HUNTER | 2 SECTIONS

La canna per chi cerca predatori sfuggenti, ombre appunto. Belle aggressive, con il calcio interamente in carbonio. Queste canne sono state studiate per la pesca a lunga distanza anche con esche finesse, sia rigide che siliconiche. Sono state testate su Spigole, trote, persici, sandre e aspi nelle acque di tutta Europa. La serie monta anelli Fuji K frame e risulta versatile, ma altamente performante laddove sia necessario fare lanci lunghi e accurati. La sensibilità in pesca permette strike a lunga distanza. Le azioni vi faranno divertire!

The rod for people seeking elusive predators or, better said, shadows. Beautifully aggressive, with an all-carbon handle. These rods are designed for long-distance fishing even with finesse baits, both hard and silicone. They have been tested on bass, trout, perch, zander and asp in waters all over Europe. The series mounts Fuji K frame rings and is versatile, yet high performance where long, accurate casting is required. The sensitivity in fishing allows long-distance strikes. The action will keep you entertained!

PREDATOR SQUAD | 2 SECTIONS

Una serie dicata ai predatori di assoluta qualità, anelli Fuji K frame, argentea come una spada, sarà la vostra compagna d'avventura in mare e in acqua dolce. Le lunghezze e le azioni rapide sono state scelte per soddisfare pescatori esigenti e che amano cimentarsi in acqua dolce con trote, persici reali, sandre, aspi, bass, lucci e siluri, ma anche in mare con spigole, serra e barracuda.

A predator series of absolute quality with Fuji K frame rings and silvery as a sword. It will be your companion for adventures at sea and in fresh water. The lengths and fast actions have been chosen to satisfy discerning anglers who like to test themselves in fresh water with trout, perch, zander, asp, bass, northern pike and catfish, as well as on the sea with European seabass, bluefish and barracuda.

OVER STRIKE | 2 SECTIONS

Una serie per ferrarli tutti. Abbiamo creato una serie dai 7' a gli 11' per tutte le pesche del momento dallo street fishing allo shore jigging. Azioni e facilmente identificabili grazie ai differenti colori delle rifiniture:

- Verde / Light – manico split
- Arancio / Medium – manico split
- Chartreuse / Medium Heavy - manico split nelle misure 7' e 8' manico combact nella misura 9'
- Azzurro / Heavy - manico combact

Una serie versatile e accattivante, con blank di qualità, anelli K frame anti tangle, e manici curati e performanti. Potrete scegliere le vostre azioni preferite e ferrare: trote, cavedani, aspi, persici, bass, lucci, sandre e siluri, ma anche spigole, serra, barracuda, ricciole e lecce.

A series to strike them all. We have created a series from 7' to 11' for all current types of fishing from street fishing to shore jigging. Different trim colours make them easy to identify:

- Green / Light – split handle
- Orange / Medium – split handle
- Chartreuse / Medium Heavy - split handle in sizes 7' and 8', combact handle in size 9'
- Light blue / Heavy – combact handle

A versatile and attractive series with quality blanks, anti-tangle K-frame rings and neat, high-performance handles. You can choose your favourite action and strike: trout, chub, asp, perch, bass, pike, zander, catfish, European seabass, bluefish, barracuda, amberjack and leerfish.

MISSION SHORE JIGGING | 2 SECTIONS

Una serie di canne per lo shore jigging bilanciate potenti e specifiche. I manici sono stati disegnati per confort, sicurezza e performance. Tutti i porta mulinelli sono dotati di screw double lock. Tutti gli anelli sono Fuji K frame. I blank sono costruiti coi migliori carboni, implementati con resine innovative per ottenere performance e resistenza. Queste canne permettono lanci estremamente lunghi e non stancano il pescatore durante l'azione di pesca.
CAHKMS01 – La canna più versatile della serie 9'6'', divertente e performante. Oltre a gestire i metal jig è ottima anche per pescare a jerk e softbait.
CAHKMS02 – 10' maneggevole, potente e ben bilanciata. La canna che non può mancare in quanto gestisce il range più comune delle hard e soft bait dedicate allo shore.
CAHKMS03 – La 10' più potente della serie. Sempre contraddistinta da ottimo bilanciamento, pensata per chi cerca il big fish in ogni condizione.
CAHKMS04 – le 11' piedi che bilanciata e performante in pesca. Adatta per la pesca da scogliere alte e a lunga distanza.
CAHKMS05 – più lunga, più potente, ma altrettanto piacevole e gestibile. Bilanciata e performante!

A series of powerful and specific balanced shore jigging rods. The handles are designed for comfort, safety and performance. All reel holders are equipped with a double screw lock. All rings are Fuji K frame. The blanks are made from the best carbons with innovative resins for performance and strength. These rods allow extremely long casts and do not tire the angler while fishing.
CAHKMS01 – The most versatile rod in the 9'6" series: fun and high performance. In addition to handling metal jigs, it is also good for jerkbait and softbait fishing.
CAHKMS02 – 10' manoeuvrable, powerful and well balanced. This rod cannot be missed as it handles the most common range of hard and soft baits dedicated to shore fishing.
CAHKMS03 – The most powerful 10' in the series. Always characterised by excellent balance and designed for people seeking big fish in all conditions.
CAHKMS04 – this 11 footer is balanced and performs well in fishing. Suitable for fishing from high reefs and long distances.
CAHKMS05 – longer and more powerful, but just as pleasant and manoeuvrable. Balanced and high-performance!

MISSION OFF SHORE | UNI BUTT

Canne specifiche per i predatori pelagici più ambiti dei nostri mari. Un serie studiata nel dettaglio. Ogni manico è stato disegnato appositamente per la canna su cui è montato. Tutti gli anelli sono Fuji K frame. Ogni modello è stato testato e migliorato: per aiutare nel lancio grazie a lunghezze ed azioni completamente nuove; per gestire le esche più catturanti in fase di recupero; per ferrare facilmente e combattere agevolmente dopo lo strike. I blank sono costruiti coi migliori carboni, implementati con resine innovative per ottenere performance e resistenza.

CAHKM001: canna dedicata al light offshore, ma ottima anche da terra: serra, lampughe, palamite e tombarelli non avranno scampo.

CAHKM002: la canna dedicata all'alleterato, 8'2'' di con la giusta potenza per godere del combattimento in totale sicurezza. Potente nella parte inferiore, con vetta perfetta per i lanci lunghi e per combattimenti divertenti in tutta sicurezza.

CAHKM003: il giusto compromesso per pescare l'alletterato e combattere col tonno se dovesse abboccare. L'anello di congiunzione tra divertimento e potenza in 8'2''.

CAHKM004: la canna specifica per pescare il tonno ottima per pescare sia con le esche rigide, che con quelle in gomma. La vetta meno rigida aiuta nel lancio anche quando si decide usare un'esca meno pesante.

CAHKM005: canna più potente della serie, nata per il tonno senza scendere a compromessi.

CAHKM006: La pesca all'alletterato è diventata ancora più specifica e i pesci sempre più grossi e potenti. Abbiamo creato un'azione più potente, MH+, per domarli velocemente senza essere "troppa". La canna ideale per chi deve correre da una mangianza all'altra ed è affamato dell'adrenalina. Ottima con stickbait, metal jig e Jerkbait.

Specific rods for the most sought-after pelagic predators in our seas. This series has been studied in detail. Each handle is designed specifically for the rod on which it is mounted. All rings are Fuji K frame. Each model has been tested and improved: to help with casting thanks to completely new lengths and actions; to handle the most catchable bait in the recovery phase; to strike easily and fight easily after the strike.The blanks are made from the best carbons with innovative resins for performance and strength.

CAHKM001: rod dedicated to light offshore fishing, but also excellent from land: bluefish, dolphinfish, skipjack and frigate tuna will not stand a chance.

CAHKM002: the rod dedicated to little tunny; 8'2" with just the right amount of power to enjoy combat in total safety. Powerful at the bottom, with a perfect tip for long casts and safe and fun fights.

CAHKM003: the right compromise for catching little tunny and fighting with tuna, should they bite... The 8'2" link between fun and power.

CAHKM004: the specific tuna fishing rod, which is excellent for fishing with both hard and rubber bait. The less rigid tip also helps in casting when you decide to use a less heavy bait.

CAHKM005: the most powerful rod in the series, designed for tuna without compromise.

CAHKM006: Fishing for little tunny has become even more specialized, and the fish are bigger and more powerful. We've created a more powerful action, MH+, to tame them quickly without being too strong. The ideal rod for those who should run from one feeding frenzy to the next. For those anglers that love adrenaline rush. Excellent with stickbaits, metal jigs, and jerkbaits.

DARK ABSOLUTE | 2 SECTIONS

Con DARK ABSOLUTE ci siamo spinti "oltre" nella ricerca per la pesca ad EGI. Abbiamo creato una serie innovativa con blank performanti e sensibili, che comprende 4 canne. 3 tubular e una solid tip. Le tubular sono le evoluzioni di 83ML e 86ML; e la nuovissima 90MML. Quest'ultima è stata ideata per lanci lunghi, pesca dalla scogliera e dai frangiflutti, ed è efficace anche nelle condizioni più proibitive. La quarta canna, con vetta riportata (solid tip), è la ST86LML. Questa permette di pescare con artificiali di dimensioni contenute, ma anche standard. È una canna ipersensibile che, lancia lontano anche esche "finesse" e non slama, grazie alla vetta riportata. Le azioni sono rapide per avere sensibilità, controllo dell'egi, ma non estrema per non strappare i tentacoli dei cefalopodi dopo lo strike. Performance impensabili diventano normali grazie a blank di categoria altissima. Tutta la serie è contraddistinta dall'eleganza e dal look aggressivo ed è dotata di anelli Fuji serie K, manico in EVA.

With DARK ABSOLUTE we have pushed "beyond" the boundaries of EGI fishing rod design.
We have created an innovative series featuring highly responsive and sensitive blanks, consisting of four rods: three tubular models and one solid-tip model. The tubular range includes the evolved 83ML and 86ML, together with the brand-new 90MML. The latter has been specifically developed for long-distance casting, fishing from rocky shores and breakwaters, while remaining highly effective even in the most demanding conditions. The fourth rod, the ST86LML, features a solid tip. It is designed for fishing with both small and standard-sized squid jigs. Thanks to its ultra-sensitive solid tip, it casts finesse lures effortlessly over long distances while significantly reducing the risk of losing hooked cephalopods. The fast actions provide excellent sensitivity and perfect jig control without being excessively stiff, preventing the hooks from tearing the cephalopods' tentacles after the strike. Outstanding performance comes naturally thanks to premium-grade blanks. The entire series stands out for its elegant yet aggressive look and is equipped with Fuji K-Series guides and an EVA handle.

SENSEI EGI AIR | 2 SECTIONS

Sensei ha fatto appassionare, catturare e divertire; l'evoluzione SENSEI AIR punta a dare spazio all'innovazione, con canne più performanti, e dotate di componenti innovative. B.T.F. (blank finger touch) nella parte anteriore del manico, triangolar carbon handle nella parte posteriore, anelli Fuji K frame. La forma ed il colore sono ancor più curate, le performance migliorate. Questa serie è innovazione nella pesca ad egi.

Sensei has won over anglers with its ability to excite, perform and deliver results. The evolution, SENSEI AIR, embraces innovation with higher-performance blanks and advanced components. It features B.T.F. (Blank Finger Touch) in the front grip section, a triangular carbon rear handle, and Fuji K-Frame guides. Refined design, improved aesthetics and enhanced performance make this series a true innovation in EGI fishing.

SENSEI TAKO | 2 SECTIONS

La Sensei tako è una canna progettata per la pesca del polpo per mulinelli a bobina rotante grazie al reel seat con grilletto corto in EVA. Si adatta anche ai mulinelli a bobina fissa. Il calcio in carbonio è arricchito da una crociera in gomma per essere facilmente trasportato nei porta canne della barca durante gli spostamenti. La vetta ha un potente solid tip con legature argentee per vedere ogni attacco. Potrete combattere con polpi di bella taglia senza problemi, la canna ben bilanciata e non vi affaticherà in pesca. È indicata anche per il il tenya fishing, per lo sliding jig e altre tecniche di pesca in verticale non ultima la pesca dei calamari.

The Sensei Tako is a rod designed for octopus fishing with spinning reels thanks to the reel seat with a short EVA trigger. It also fits fixed reels. The carbon butt is enhanced with a rubber gimbal for easy transport in the boat's rod holders when travelling. The peak has a powerful solid tip with silver binding, which lets you see every attack. You can fight with nice-sized octopus without any problem; the rod is well balanced and will not tire you while fishing. It is also suitable for tenya fishing, sliding jigs, other vertical fishing techniques and, not least, squid fishing.

BOLSENA | SPINNING • 1 SECTION

Questa canna ultralight prende il nome dal lago più pescato d'Italia, dove gli approcci finesse e la pesca con il "Livescope" ha reso necessario lo studio di una monopezzo dedicata che non esisteva sul mercato. Azione rapida in fase di lancio e regular nel recupero e nel combattimento. Ottima anche per tutti i predatori da insidiare con pesche ultralight dall'altissimo tasso tecnico, come persico reale, trota, spigola e sugarello.

This ultralight rod takes its name from the most fished lake in Italy, where delicate approaches and livescope fishing made it necessary to study a dedicated one-piece rod that did not exist on the market. Fast action when casting and regular in struggle and retrieval. It is also excellent to avoid all predators when catching ultralight fish which need a very high technical level, such as perch, trout, bass and horse mackerel.

CASTING

GUERRERO | CASTING • UNI BUTT

La canna da swimbait che non poteva mancare in una serie innovativa. Deve lanciare esche XL, gestirle nel recupero, ferrare pesci importanti e non farli slamare. Perciò ha un'azione regular per aiutare in fase di lancio e di combattimento. Allo stesso tempo è potente per gestire hardbait da un etto. Nonostante ciò, è leggera e bilanciata. L'azione è quella di una canna da crankbait molto potente, ma il feeling è quello di una canna leggera in mano e precisa nel lancio. Ottima anche per la pesca al luccio.

The must-have swimbait rod in an innovative series. It must cast XL lures, manage them in the retrieval, tackle important fish and not let them go. It therefore has regular action to help with casting and tackling. It is also powerful enough to handle 100 g hardbait. Nevertheless, it is light and balanced. Its action is like a very powerful crankbait rod, but it feels light in the hand and it is precise when casting. Also good for pike fishing.

TROUT Z | 2 SECTIONS

TROUT Z è un connubio di design e innovazione, nato dall'esperienza HRK nella pesca alla trota e nel trout area. Abbiamo scelto carbonio alto modulo e resine innovative azioni adatte a coprire le esigenze del pescatore di trout area, le abbiamo traslate sulla pesca alla trota in generale e al BIG TROUT FISHING. Così è nata la serie da trota "totale" per la pesca in lago. Tutte le canne sono state valorizzate con manici in carbonio, anelli Fuji K frame e rifiniture di alto livello. Questa serie non lascia niente al caso, e soprattutto non lascia trote in acqua!

TROUT Z is the perfect blend of design and innovation, born from Herakles experience in trout fishing and trout area. Built with high-modulus carbon and innovative resins, it offers actions designed to meet every trout area angler's needs, then extended to traditional lake trout fishing and Big Trout Fishing. The result is a complete trout rod series for lake fishing. Every rod features carbon handles, Fuji K-Frame guides and premium finishes. Nothing has been left to chance—and above all, it leaves no trout in the water!

KASUMI LIMITED | 2 SECTIONS

La Limited è l'evoluzione della serie Kasumi, serie immancabile per chi già ha amato la serie Kasumi. Si tratta di canne con azioni fast, che grazie alle sezioni di lunghezze differenti vengono ottimizzate al massimo del loro potenziale. I calci, più corti rispetto alle due pezzi standard, hanno tutti la stessa la lunghezza. L'innesto "spigot" è sempre alla stessa distanza, posto sotto il primo anello. Le vette, di conseguenza, avranno lunghezze differenti in base a quella totale della canna. Questa divisione "2/3" è stata scelta per avvicinarsi il più possibile ai vantaggi di una monopezzo per offrire il massimo livello di prestazioni. Una serie eccezionalmente performante, dotata di accuratezza e design. Si tratta di una serie esclusiva, che è stata numerata e non verrà replicata in futuro.

KASUMI | 2 SECTIONS

Il design ultramoderno, il carbonio di ultima generazione, il manico in EVA e gli anelli Fuji Torzite Titanium Frame danno vita a queste fantastiche canne, che il nostro pro-staff ha studiato e testato per oltre 3 anni. Ogni canna è stata ideata in modo specifico per affrontare tournament dal tasso tecnico elevatissimo e qualsiasi condizione di resa del pesce. La serie si suddivide in due tipologie principali: canne tubular (T) e canne con solid tip (ST), entrambe caratterizzate da azioni reattive e veloci. I solid tip sono stati abbinati ai blank in modo peculiare, mantenendo il rapporto tra potenza e sensibilità, dando il giusto supporto ad un fusto molto rapido e facendo sì che sia possibile raggiungere distanze di lancio notevoli rispetto alle canne di pari potenza. Da quest'anno sono disponibili le due nuove azioni: T603ML canna da con una speciale azione progressiva, e T603V canna tubular da vertical fishing. KASUMI saves your time.

The ultramodern design, the latest generation carbon material, the EVA handle and Fuji Torzite Titanium Frame guides make real these fantastic rods. Our Herakles pro-staff has studied and tested these designs now for over 3 years. Each rod has been specifically designed for tournament fishing with a very high technical specification for use in any fishing condition. The series is divided into two main types: tubular rods (T) and rods with solid tip (ST), both featuring both reactive and fast actions. The solid tips have been matched to the blanks in a particular way which maintains the relationship between power and sensitivity, giving the right support to a very fast blank making considerable casting distances possible compared to rods of equal power. From this year there are two new available actions: T603ML a rod with a special progressive action and T603V tubular rod for vertical fishing. KASUMI saves your time.

GENESI BLACK STALLION | 2 SECTIONS

La serie Genesi Black Stallion vi conquisterà con il suo look curato e raffinato, per poi catturarvi definitivamente con le innovative azioni ultra sensibili. La serie è composta da canne in due sezioni di lunghezze differenti (2/3) con la base più corta. La misura del calcio rimane costante, mentre quella della vetta cambia a seconda della lunghezza della canna. Questo per ottenere azioni incredibilmente performanti altrimenti impossibili con le due pezzi tradizionali. Look elegante con manico in sughero. Inserti in metallo e carbonio. Anelli Sea-guide per performance d'eccellenza e resistenza.

The Genesi Black Stallion series will conquer you with its refined look and innovative ultra-sensitive actions. The series consists of rods in two sections of different lengths (2/3) with the shorter butt section. The butt section length doesn't change, while the tip changes according to the length of the rod. This allow to obtain incredibly performing actions that would be impossible with traditional two-pieces-rods. Elegant look with cork handle. Metal and carbon parts. Sea-guide guides for excellent performance and resistance.

RIUKE | 2 SECTIONS

RIUKE è la nuova concept series di Herakles dedicata al trout area. Una gamma interamente studiata per la competizione in ogni minimo dettaglio. La serie è composta, sia da canne in due sezioni di ugual misura, sia da altre asimmetriche (2/3). Questo per poter realizzare canne estremamente performanti in base all'utilizzo per il quale sono state progettate. La scelta è stata basata sull'esperienza e lo studio sul campo gara. Una serie completa, perfetta per la competizione e per godersi l'emozione del trout area in tutte le sue tecniche e sfumature, dalla partenza al vertical fishing.

RIUKE is the new Herakles' concept series dedicated to trout area. A complete range designed for competition in every detail. The series is composed of both two equal sized section -rods and asymmetrical ones (40/60). This is to create extremely performing rods according to their use. The choice was based on practical experience. A complete series. Ideal for competition and to enjoy the trout area in all its techniques and nuances, from beginner to vertical fishing.

AREA ELISIUM R | 2 SECTIONS

Abbiamo implementato le caratteristiche proprie della serie Elisium per seguire il trend del trout area. Il risultato è un serie più performante, più rapida e più sensibile. Abbiamo usato anche il concetto del "solid tip 19cm" sul modello HER2-601ML. Lo stile che ci contraddistingue ha incontrato l'evoluzione che l'agonismo ed i pescatori esigenti richiedono.

We implemented the features of the Elisium series to follow the trend of the trout area. The result are more performing, faster and more sensitive rods. We used the concept "19cm solid tip" on the model HER2-601ML. Our distingtive style has met the evolution that the competition and exigent anglers require.

AREA ELISIUM ONE | 2 SECTIONS

Monopezzo per chi non scende a compromessi. Più sensibilità grazie al blank monopezzo che implementa le già ottime potenzialità di tutta la serie Elisium. Disponibile tubolar o con soli tip.

One-piece rods for the ones that refuse any compromise. Thanks to the one piece blank they are more sensitive, because it increases the potential of the Elisium series. They are available with tubolar or solid tip.

AREA EVOK R | 2 SECTIONS

Questa serie di canne due pezzi è stata rinnovata, ma EVOK resta sinonimo di affidabilità per amatori ed agonisti. Sono state scelte azioni che facilitino il pescatore in tutte le fasi della competizione: lanciare più lontano, percepire l'abboccata, allamare più facilmente e perdere meno pesci durante il combattimento. Look accattivante, anelli Sea-guide e manici studiati per essere veloci anche in gara. Questo è EVOK R: design e qualità.

This series of two-piece rods has been revamped, but EVOK remains synonymous with reliability for both amateurs and competitors. Actions have been chosen to make it easier for anglers at all stages of competition, including casting further, sensing a bite, baiting more easily and losing fewer fish during the fight. Attractive look, sea guide rings and handles designed for speed even in competition. Design and quality: this is EVOK R.

WILD ELISIUM | 2 SECTIONS

La Wild Elisium è il risultato di una collaborazione con Matteo Antonelli, campione italiano a coppie con esca artificiale da riva. Il blank e il solid tip assicurano sensibilità leggerezza e potenza necessarie per pescare in ogni spot dove si pratica il light spinning, abbiamo sintetizzato questo concetto nella parola Wild. Per materiali, stile e componentistica entra di diritto a far parte della serie Elisium. Da qui il binomio perfetto Wild Elisium un mix di tecnica, eleganza e affidabilità ed efficacia.

Wild Elisium is the result of a collaboration with Matteo Antonelli-Spinning from the shore Italian Champion for couples. The blank and the solid tip ensure sensitivity, lightness and power needed to fish in every spot where we practice light spinning; we have encapsulated this concept in the word Wild. Its materials, style and components mean it has the right to be part of the Elisium series. Hence the perfect combination of Wild Elisium, a mix of technique, elegance and reliability, and effectiveness.

HUGE HUNTING

HUGE HUNTING

La canna che segue il concept SENSEI già presente nella nostra gamma di artificiali da EGI. A primo impatto colpiscono per l'estetica, i colori raffinati ed aggressivi, il manico interamente in carbonio. Provandole ci si rende conto delle azioni adatte ad ogni esigenza nella pesca ai cefalopodi, sia veloci e che più moderate. Colpisco anche la sensibilità e la possibilità di gestione dell'egi in ogni situazione. Tutte le canne hanno azioni estremamente gradevoli e performanti. Tutta la serie è equipaggiata con anelli Fuji K frame e componenti di pregio.

This rod follows on from the SENSEI concept already present in our range of EGI lures. At first glance, they are striking in their aesthetics, their refined and aggressive colours, and their all-carbon handle. If you try them out, you will realise that the action is suitable for every need in cephalopod fishing, both fast and more moderate. You will also be impressed by the sensitivity and handling of the egi in every situation. All the rods have extremely pleasant and high-performance action. The entire series is equipped with Fuji K frame rings and high-quality components.

CALIDA HUGE

La serie dedicata ai grandi predatori. L'affidabilità delle serie calida unita alla potenza delle serie Huge offre un mix che permette di pescare siluri, lucci e più in generale di predatori di grandi dimensioni. Il look aggressivo ed accattivante si combina con accessori appositamente pensati per queste canne. Manico da combattimento e anelli doppio ponte anti tangle, uniti all'azione di queste canne permettono di lanciare esche artificiali con precisione e di combattere con pesci di stazza Importante in totale sicurezza. Calida Huge è il concept di Herakles per affrontare le sfide più dure!

The series dedicated to large predators. The reliability of the calida series combined with the power of the Huge series offers a mix that allows you to fish for pike, pike and larger predators in general. The aggressive, eye-catching look is combined with accessories specifically designed for these rods. Combat handle and onti tongle double bridge rings, combined to the action of these rods allow you to cast lures with precision and to fight with fish of important tonnage in total safety. Calida Huge is Herakles' concept for tackling the toughest challenges!

HUGE XX

Potenti predatori da trofeo, sfide memorabili con lucci e siluri in situazioni al limite. Questo è il target della serie HUGE XX. Canne potenti, maneggevoli e resistenti, ma anche bilanciate e di peso contenuto. Potrete usarle dalla riva, dalla barca e dal belly boat in ogni situazione in cui materiale dall'elevatissima affidabilità si rende necessario. Particolarmente interessanti le due canne per la pesca in verticale sviluppate da Xavier Vella, uno dei più grandi pescatori di siluro europei.

Powerful trophy predators, memorable fights against pikes and catfish in extreme conditions. This is the new HUGE XX target. Powerful, maneuverable and resistant rods, but also very balanced and lightweight. Perfectly suitable for bank, float tube and boat fishing whenever a high performance rod is needed. Very interesting are the two vertical fishing rod developed by Xavier Vella, one of the most experienced catfish fishermen in Europe.

AMPHIBIO CHATTERBAIT

5 pcs per pack

Amphibio è una chatterbait versatile di nuova generazione. Può essere utilizzata sia in acqua libera, che nelle cover vista la presenza del weed guard. Questo è abbastanza rigido da permettere l'utilizzo dell'esca come jig, ma non troppo per non ostacolare la pesca di reazione. La forma della parte sottostante della testa facilità la posizione stand up nelle fasi di stop, permette di skippare l'esca e dona movimento oscillatorio durante il recupero accentuando le vibrazioni della paletta. Quest'ultima ha forma squadrata e presenta la parte superiore piegata per essere idrodinamica e per pasare senza incagli in prossimità degli ostacoli. La forma e le dimensioni la rendono adatta, sia per recuperi lenti, che veloci. Amo di dimensioni generose montato con la giusta angolatura facilità lo strike. Le rifiniture di pregio e le colorazioni ben selezionate sono solo dettagli che arricchiscono l'essenza.

Amphibio is a new generation versatile chatterbait. It can be used both in open waterS and in the covers because of the presence of the weed guard. It is stiff enough to allow the lure to be used as a jig, but not so stiff to hinder reaction fishing. The shape of the bottom side of the head simplifies the standup position in the stop phase on the ground allowing the bait to be skipped and it gives an oscillatory movement during recovery, in order to emphasize the vibrations of the lip. This last has a squared shape and the upper part is bent in order to be hydrodynamic and to avoid obstacles. The shape and dimensions make it suitable for slow and fast retrieving. A big sized hook is mounted at the right angle to help to strike. The fine finishing and the well-selected colours are just details that enrich its essence.

AMPHIBIO SPINNERBAIT

5 pcs per pack

Si tratta di uno spinnerbait compatto. La testa ha un design idrodinamico e curato. Le proporzioni del braccio in acciaio lo rendo perfetto per produrre vibrazioni, proteggere l'amo e facilitare l'abboccata. Questo artificiale risulta adatto, a molteplici situazioni. È ottimo per il pitching, per le acque chiare dove è necessaria una presentazione finesse e più in generale per le acque caratterizzate da alta pressione di pesca. Tutte le palette sono caratterizzate dal design studiato da Herakles con lo speciale engraving che rifrange la luce creando miriadi di piccoli bagliori adescanti. Gli skirt high quality e le verniciature della testa sono anch'essi curati per rendere l'esca ben rifinita e soprattutto più catturante. Questo spinnerbait che sintetizza innovazione ed esperienza di Herakles nel campo del bassfishing e dello spinning.

It is a compact spinnerbait. The head has a hydrodynamic and refined design. The proportions of the steel arm make it perfect for producing vibrations, protecting the hook and facilitating the bite. This lure is suitable for multiple situations. It is excellent for pitching, for clear waters where a finesse presentation is required and more generally for waters characterized by high fishing pressure. All the blades are characterized by the design studied by Herakles. It has a special engraving that refracts the light creating many small attractive flashes. The highquality skirts and the paint on the head are also treated to make the lure well finished and above all more capturing. This spinnerbait synthesizes the Herakles' innovation and experience in the field of bass fishing and spinning too.

IMPACT MICRO JIG

5 pcs per pack

1/8 oz | HOOK SIZE 2/0

RRP € 4,90

Un micro jig compatto che imita piccole prede. Un'esca con amo robusto e weed guard efficace che lo rendono adatto al power finesse. Scivola facilmente attraverso le cover, senza incagliarsi. Dimensioni e colori lo rendono ideale molteplici situazioni. Il ferma esca aiuta a fisare i trailer. Un mix imbattibile per la pesca del bass, al persico reale e altri predatori.

A compact micro jig that imitates small prey. A lure with a strong hook and an effective weed guard that make it suitable for power finesse fishing. It enters easily through covers without getting snagged. Its size and colors make it ideal for various situations. The bait holder helps secure the trailers. An unbeatable mix for bass fishing, for perch, and other predators.

FOOTBALL JIG

5 pcs per pack

3/8 oz | HOOK SIZE 2/0

RRP € 5,40

Pescando sulle rocce, sulla sabbia, o sulla ghiaia, un jig con testa football è la soluzione. La sua forma contenuta lo rende ottimo anche in prossimità di cespugli e alberi semisommersi. L'amo affidabile e il weed guard adeguato lo rendono giusto per molteplici approci. È la scelta migliore per la pesca in diga. Un'esca versatile disponibile in colori adatti ad ogni situazione.

Fishing over rocks, sand, or gravel, a football-head jig is the solution. Its compact shape makes it excellent even near semi-submerged bushes and trees. The reliable hook and appropriate weed guard make it perfect for multiple approaches. It's the best choice for fishing in dams. A versatile lure available in colors to suit every situation.

SIZE	HOOK SIZE	RRP
1/4 oz	3/0	€ 5,50
3/8 oz	3/0	€ 6,00
5/8 oz	3/0	€ 6,50

Un jig compatto, ottimo per essere usato a pitching, swimming jig e per tutti gli approcci finesse. La testa dalle forme al contempo arrotondate e penetrante è molto versatile. Lo skirt è composto da due tipi di filamenti, larghi per dare volume quanto basta e fini per donare sinuosità all'effetto d'insieme. L'amo di misura 3/0 è il tocco che trasforma un'esca finesse in qualcosa di più, rendendola più efficace senza snaturarne le caratteristiche fondamentali.

A compact jig, perfect to be used to pitch, as swimming jigs and for all finesse approaches. The rounded and at the same time penetrating head shape is very versatile. The skirt is composed of two kinds of lines, large to give enough volume and thin to give sinuosity to the ensemble effect. The size 3/0 hook is the key that turns it into something more than a finesse lure, making it more effective without altering the fundamental features.

JIG-UP

5 pcs per pack

1/2 oz | HOOK SIZE 4/0

RRP € 6,50

Jig dalla testa particolare, schiacciata, larga, aerodinamica e idrodinamica. Adatta alle sassaie e alle cover sommerse. La particolarità sono i due sostegni alla base della testa che tengono l'amo ed il trailer sempre in posizione stand up una volta sul fondo, da qui il nome Jig Up. Con questa posizione lo skirt fatto di filamenti larghi e fini si apre dando ancora più volume d'insieme alla presentazione. Extra strong hook 4/0.

Jig Up, a special shaped flat and wide, aero and idro dynamic head. Perfect on rocky bottoms and submerged covers. The two arms at the base of the head keeping permanently in a stand up position the jig and the trailer are the main feature of this innovative lure. In this position the double width skirt will flare giving extra volume to the lure. Extra strong hook 4/0.

RRP € 5,90

2,8g | 2,8cm | HOOK SIZE #8

È un Metal vibe di 2.8gr e 28mm di dimensione, questa tipologia di esche sono micidiali quando il pesce diventa estremamente apatico e ha bisogno di essere stuzzicato per reagire, qui entra in scena il nostro Metal Fire 28 che con le sue vibrazioni fa scattare l'aggressività della trota innervosendola! Il movimento principale di questa esca è il classico "dente di sega" sul fondo, richiamando l'esca con la canna e lasciandolo appoggiare nuovamente al fondale.

Its a Metal vib of 2.8g and 28mm in size, this type of bait is deadly when the fish becomes extremely apathetic and needs to be teased to react, in comes our Metal Fire 28, which with its vibrations triggers the aggressiveness of the trout by upsetting it! The main movement of this bait is the typical "up and down" on the bottom, drawing the bait with the rod and letting it drop again on the bottom.

Artificiale di nuova concezione dall'elevata versatilità. Non è un metal jig, non è una vibration blade lure, ma può essere entrambe. Le due posizioni di aggancio donano diverse possibilità di recupero spostando l'assetto del centro di gravità posteriore. Lanci lunghissimi e le molteplici tipologie di recupero sono il suo mix esplosivo. Adatto a moltissimi predatori sia di acqua dolce che salata.

A new-concept artificial bait with great versatility. It's not a metal jig, nor is it a vibration blade lure, but it can be both. The two hooking positions provide various possibilities of retrieve by shifting the rear centre of gravity balance. Very long casts and multiple types of retrieve are its devastating mix. Suitable for many predators both in freshwater and salt water.

RRP € 5,90

NEW 2027

Quest'esca artificiale da pesca ultraleggera, appartenente alla categoria dei lipless crankbait o vibration lure, nata per il Trout Area è molto adatta anche al Light Rock Fishing e allo spinning ultra-light a cavedani, persici e piccoli predatori. La sua azione vibrante: produce una fortissima vibrazione ad alta frequenza durante il recupero lineare e nei richiami verso l'alto pescando a dente di sega. Perciò permetterà di sondare gli strati d'acqua intermedi e il fondale, nonostante il peso ridotto.

This ultra-light artificial lure, belonging to the lipless crankbait or vibration lure category, was developed for Trout Area fishing but is also highly effective for Light Rock Fishing and ultra-light spinning for chub, perch, and other small predators. Its vibrating action generates extremely strong high-frequency vibrations during a steady retrieve and when lifted in a lift-and-fall presentation. This allows it to effectively explore the middle water layers and the bottom despite its lightweight design.

SPEEDY

5 pcs per pack

NEW 2027

Lo Speedy è uno spoon che lavora da sé in "deriva". Studiato e progettato basandosi sulle esperienze dei nostri agonisti , evolvendo forma e nuoto degli spoon già conosciuti di questa serie. Il nuoto è sinuoso e naturale , sfrutta il corpo stretto e curvo per generare una rotazione frenetica ad alta frequenza ideale per stimolare le trote apatiche e diffidenti. Questo movimento è generato grazie alla curva dell'esca e viene accentuato grazie uno scalino nella parte inferiore. Muove sia nel recupero, che in caduta. Durante il recupero mantiene l'asse di nuoto e lo strato d'acqua oscillando nella maniera giusta da poter generare un attacco; in caduta diventa imprevedibile sfruttando le leggi dell'idrodinamica, andando in deriva sia in un lato che nell'altro nello stesso numero di volte ad intervalli di tempi uguali. Inoltre, lo scalino in uno spoon così leggero sposta il baricentro verso la coda e aiuta aumentando la gittata di lancio. Uno spoon che non può mancare nella vostra tackle box!

Speedy is a spoon designed to work on its own while "drifting". Developed and engineered on the basis of our competition anglers' experience, it evolves the shape and swimming action of the well-known spoons in this series. Its action is sinuous and natural: the narrow, curved body generates a frantic, high-frequency rotation, ideal for triggering apathetic and wary trout. This movement is produced by the lure's curvature and enhanced by a step on the underside. It works both on the retrieve and on the drop. During the retrieve, it maintains its swimming axis and depth, oscillating in just the right way to trigger a strike; on the drop, it becomes unpredictable, exploiting hydrodynamic principles to drift alternately to either side the same number of times at equal time intervals. In addition, on such a lightweight spoon, the step shifts the centre of gravity towards the tail and helps increase casting distance. A spoon that simply cannot be missing from your tackle box!

KASUMI

5 pcs per pack

Il Kasumi è un'esca dalla Forma particolare larga in testa e stretta in coda, ma nonostante questo molto bilanciata e performante al lancio. Uno spoon ottimo nelle fasi di attività con recupero sostenuto o con recupero variabile intervallato da piccole jerkate. Altrettanto catturante in affondamento o nel recupero lento con stop&go sul fondo. Uno spoon versatile per ogni esigenza di pesca e competizione.

The Kasumi bait has an unusual shape, large at the head and slim at the tail, it is nevertheless well-balanced and with a high-performance cast. An excellent spoon in the active phases both with a steady retrieve or with a jerk and pause retrieve. It is just as effective in the sinking and in slow retrieve with stop and go on the bottom. A versatile spoon for your every fishing and competitive need.

AMMER

5 pcs per pack

Forma ad aquilone, parte terminale bombata, profilo ondulato e spessore maggiorato. Doppia finitura: sulla parte superiore martellata in coda e liscia in punta e viceversa nella parte inferiore. Un ondulante dall'estrema lanciabilità che cattura in affondamento, in fase di recupero e in trattenuta. Rende al meglio nel recupero sul fondo. Grazie al rapporto peso/volume regge anche recuperi sostenuti. Disponibile da 0.75g fino a 6.0g offre molte opzioni per risolvere le fasi della gara dove i pesci sono difficili e si rende necessaria una svolta. È divenuto uno dei cavalli di battaglia di Herakles.

A kite shape with an end part that is rounded, and a wavy and thicker profile. Double finish: on the top the tail is hammered and the tail is smooth, whereas the bottom is the opposite. A spoon with extreme casting power that catches while sinking, in the retrieval phase and in hold.It offers you the best when retrieving from the bottom.Thanks to the weight/volume ratio it also supports sustained retrieves. Available from 0.75g up to 6.0g, it offers many options to handle the times during a competition when the fish are difficult and a breakthrough is needed. It has become one of Herakles' workhorses.

RIUKE

5 pcs per pack

Un mirco spoon con un nuoto ampio e accentuato. La sua peculiarità è la punta leggermente disassata che lo rende ottimo per essere recuperato in maniera lineare, ma anche con piccole jerkate risulta essere estremamente catturante sulle trote apatiche in superfice. La costante del Riuke sono gli ottimi risultati in termini di catture.

A micro spoon with a wide and emphasised swim. What makes it special is its slightly offset tip, which makes it ideal for a linear retrieve, but also with small jerks it is extremely captivating with apathetic trout on the surface. The constant element of the Riuke are its excellent results when it comes to catches.

5 pcs per pack

Dal nome si percepisce qualcosa di grande ed invece ci troviamo davanti ad uno spoon compatto e bilanciato. Nonostante il suo peso contenuto, riusciamo a lanciarlo a distanze notevoli. Il suo nuoto regolare e la possibilità di fare lanci lunghi lo rendono l'arma vincente quando le trote sono distanti e non ne vogliono sapere di spoon voluminosi.

The name gives the impression of something big, but this is actually a compact, well balanced spoon. Despite its low weight, it can be cast considerable distances. Its regular swimming action and long casting capability make it your trump card when the trout are keeping their distance and want nothing to do with larger spoons.

LDS FAT

5 pcs per pack

Ottimo per lanci lunghi risulta letale quando si deve sondare molta acqua. Utilissimo nelle fasi iniziali della gara, con pesce attivo. Si può utilizzare in tutti gli strati d'acqua, sia con recuperi veloci, che lenti. Un'esca versatile e catturante.

Great for long casts and it is lethal when you have to scan a lot of water. It's very useful in the initial stages of competitions when fish is active. It can be used in all layers of water, both with quick or slow retrieving. It's a versatile and really effective lure.

DIABLO DT

5 pcs per pack

Un bottom particolare progettato per lavorare sull'asse orizzontale anziché su quello verticale. Offre un wobbling totalmente diverso rispetto agli altri bottom. La forma trapezoidale, le scanalature e l'alloggio per l'amo lo rendono veramente diabolico.

A special bottom designed to work on the horizontal rather than the vertical axis. It offers a completely different wobbling compared to the other bottoms. Its trapezoid shape, the grooves and the position for the hook make it truly diabolical.

SBAM-EYE

5 pcs per pack

La forma concava e il peso specifico dello speciale mix di cui è composto lo rendono molto efficace in fase di affondamento e di trattenuta. Durante il recupero classico del vertical, emetterà vibrazioni e turbolenze grazie alla sua forma e al foro decentrato posto sulla parte posteriore.

Its concave shape and the specific weight of its special mix make it very effective in sinking and holding. During the classic vertical retrieve, it will emit vibrations and turbulence thanks to its shape and to the off-centre hole in the back.

SBAM-B

5 pcs per pack

La pesca "bottom" ossia sul fondo è una tecnica tipica del trout area che permette di catturare le trote che vi stazionano apatiche. Questa specialità è proficua per tutto l'anno e rende al meglio quando le altre non danno risultati. Lo spoon si monta reverse, con l'amo in testa rivolto verso l'alto. La forma ottagonale e la speciale silhouette lo rendono perfetto per cadere sul fondo ed essere letale, in caduta, fermo, o mosso a balzelli. Sbam-B è l'evoluzione di questa strategia secondo Herakles.

Bottom fishing is a typical trout area technique that allows you to catch trout in one spot. This specialty is a winner throughout the year and offers you the best option when other methods offer no results. The spoon is mounted reverse, with the hook at the top pointing upwards. The octagonal shape and the speial silhouette make it perfect to fall to the bottom and be deadly while falling, still, or roughly moved. Sbam-B is the volution of this strategy according to Herakles.

SBAM

5 pcs per pack

Ondulante corto e largo con estremità appuntite. Ottimo in gara, sia per la partenza che per le trote apatiche delle fasi successive. Possiede un movimento accentuato che lo rende catturante, sia in caduta, che nel recupero. Pesante e compatto permette di fare lanci lunghi. La misura 1,3g è ottima per gli strati superiori e intermedi dell'acqua, mentre la 2,3 è stata pensata per la pesca bottom e negli strati inferiori in genere. Dotato di amo singolo senza ardiglione che ormai è praticamente obbligatorio nei circuiti del Trout Area e in molti dei laghi e dei torrenti a regolamento specifico.

Short and wide spoon with sharpened ends. It is excellent during competitions, both for the beginning and for the apathetic trout during the rest of the match. It has an accentuated movement that makes it catchy, both in the fall and in the retrieving. It's heavy and compact so it allows long casts. The 1.3g size is excellent for the upper and middle layers of water, while the 2.3 is designed for "bottom fishing" and for the lower layers in general. Equipped with single barbless hook, that is now a must in the Trout Area tournament and in many lakes.

ZERO-6

5 pcs per pack

Artificiale ultralight necessario per catturare le trote apatiche che "ci prendono in giro" stazionando nei pressi della sponda. Nato per il lancio ad una mano e la pesca in superfice è ottimo per le fasi finali della competizione.

An ultralight lure ideal to capture apathetic trouts. Designed for the "one hand cast" and for "topwater fishing", it is great for the final stages of competitions.

LEAF

5 pcs per pack

Un artificiale light a forma di rombo con punta rialzata. Nonostante il peso contenuto si lancia agevolmente. È dotato di un nuoto stretto e adescante. Fa veramente la differenza poiché resta in pesca molto a lungo. È stato pensato per condizioni in cui le trote sono difficili e risulta veramente letale su pesci apatici.

It's a very light rhomboid lure with the front part turned up. Despite its low weight it is easy to be casted. Its way of swimming makes it very catchy. It really makes the difference because it can stay in the strike zone for a long time. It was thought for conditions where trout are diffident.

SPIKE

5 pcs per pack

Ondulante adatto per la pesca in superficie. Muove perfettamente durante il recupero, ma rende al meglio se trattenuto durante l'affondamento. Viene rifinito con parte superiore martellata e parte inferiore liscia per amplificare le vibrazioni oltre al catturante effetto visivo. Ottimo per trote e salmerini. Particolarmente indicato per la competizione.

A spoon lure developed for surface fishing. Perfect swimming action during the retrieve but will excel if hold while sinking producing a fluttering action. Features an upper pounded body and a flat lower body to amplify the vibrations produced and enhance the visual effect. Perfect for trout and brook trout. Particularly suited for competition fishing.

RACE

5 pcs per pack

Un vero portento, grazie alla forma e alle misure studiate per rendere facile la trattenuta e il recupero, ma anche molto aerodinamica per scagliarlo a distanze ragguardevoli nonostante il peso contenuto. Un ondulante che è frutto della collaborazione con i pescatori specialisti di settore. Race è stato lanciato negli spot più vari e in ogni condizione con risultati eccellenti in termini di catture in ogni strato d'acqua. Siamo sicuri di una cosa, Race è una certezza!

A real wonder, thanks to its shape and the sizes specifically studied for both the holding action and the retrieve but also highly aerodynamic to be cast at long distance despite its low weight. A spoon developed in cooperation with the more experienced specialist fishermen. The Race spoon has been used in many different spots and different fishing conditions obtaining excellent results in any kind of waters. Race stands for certainty!

KEEPER J

5 pcs per pack

Il trout area by Herakles nasce con il KEEPER TROUT per questo motivo non poteva mancare una special edition. Due grammature che coprono sia la pesca di velocità con il 2,0g, sia la pesca con trote apatiche con la versione 0,9g. I colori sono stati studiati per catturare con qualsiasi condizione meteo, o di colore dell'acqua. Keeper J farà parte di quegli spoon che non possono mancare a chi pratica questa disciplina.

Trout area by Herakles began with the KEEPER TROUT, so we just had to make a special edition. Two different weights cover both faster fishing with the 2.0g, and also fishing for difficult to catch trout with the 0.9g version. The colours have been developed for catching in all weather conditions, or in any colour water. Keeper J is bound to become an essential spoon for all those who practice this sport.

LOSKO

5 pcs per pack

La serie Losko con la particolare forma a punta di lancia è ottima, sia per il Trout Area, che per tutte le pesche rivolte ai predatori smaliziati. Si tratta di un ondulante da competizione, si lancia lontano, ha un ottimo movimento durante il recupero, in caduta e in trattenuta.

The Losko series thanks to its spearhead shape is ideal for both the Trout Area and for all high selective predators fishing. It's a competition spoon. It's a long casting lure. Produce an excellent movement during retrieve, the fall and the hold up as well.

VENTO LD

5 pcs per pack

Il peso di 3,5gr e la forma estremamente aerodinamica lo rendono un proiettile. Sono stati studiati la distribuzione del peso ed uno step nella parte inferiore per donare un'anima al metallo. Il materiale con cui è stato realizzato lo rende pesante, ma il risultato è comunque un affondamento molto lento. La pesca a distanza in superficie non è più un problema con VENTO LD.

Its 3,5 grams weight and the extremely aerodynamic shape will make it fly like a bullet. The weight distribution of the lure has been studied and a step in the lower part to give a better swimming action. The special material the spoon is made of will make it heavy but in the same time will make it sink slowly. Thanks to the Vento LD shallow water long distance fishing is not a problem anymore.

HIVE

Il profilo leggermente ondulato la forma allungata lo rendono un artificiale versatile, ma principalmente adatto per la pesca in superfice e su pesci sospesi. Viene rifinito con parte superiore martellata e parte inferiore liscia per amplificare le vibrazioni oltre al catturante effetto visivo. Rende al meglio se trattenuto durante l'affondamento, oppure con recuperi lenti. Un'esca da lancio medio lungo che risolverà molte giornate di pesca.

5 pcs per pack

The slightly ondulated and en-longed profile makes it a versatile lure, but mainly indicated for surface fishing on suspended fish. Features an upper pounded body and a flat lower body to amplify the vibrations produced and enhance the visual effect. Will excels if hold during the sinking and on slow retrieves. A medium distance casting lure that will solve many difficult situations.

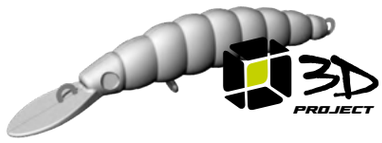
MJ46 | JERK BAIT



5 pcs per pack

È un jerk di 46mm con due varianti di nuoto, nato in collaborazione con tutto il nostro pro-staff. Le difficolta maggiori quando si parla di un piccolo artificiale sono bilanciamento e lanciabilità.
MJ46HF – la versione floating ha un wobbling molto accentuato quindi è perfetto con recuperi lenti e lineari, intervallato da jerkate, oppure con recupero stop and go.
MJ46SSF – è stata bilanciata con un peso interno che lo rende molto performante nel lancio e con un nuoto leggermente più stretto rispetto alla HF. Questa versione in base al tipo di verniciatura, al tipo di snap o filo utilizzato potrà essere slow floating, suspending - slow sinking. Trattandosi di un jerk di piccole dimensioni un incremento di 0,05g del suo peso complessivo, determinerà la sua galleggiabilità. I colori selezionati dal nostro pro-staff sono accurati e studiati per ogni esigenza di pesca, ma potrebbero avere questa piccola differenza di peso. Recuperi stop and go, intervallati da pause e jerkate, lo renderanno infallibile su trote e piccoli predatori. Entrambe le versioni montano i Kasumi Hook con trattamento dull finishing che aiuta a non far slamare il pesce durante il combattimento.

It is a 46mm jerkbait with two different swimming actions, developed in collaboration with our entire pro staff. The main challenges when it comes to a small lure are balance and casting performance.
MJ46HF – The floating version features a very pronounced wobbling action, making it perfect for slow, steady retrieves, interspersed with jerks, or for stop-and-go retrieves.
MJ46SSF – It has been balanced with an internal weight that gives it excellent casting performance and a slightly tighter swimming action than the HF. Depending on the type of paint finish and the snap or line used, this version may behave as slow floating, suspending or slow sinking. Since it is a small jerkbait, an increase of 0.05g in its total weight will determine its buoyancy. The colours selected by our pro staff are carefully chosen and designed to meet every fishing need, but they may have this slight difference in weight.Stop-and-go retrieves, interspersed with pauses and jerks, will make it deadly on trout and small predators.Both versions are fitted with Kasumi Hooks with a dull finishing treatment, which helps prevent the fish from coming unhooked during the fight.

MC29 | CRANKBAIT

3D PROJECT

5 pcs per pack

Abbreviazione di MOTH CRANK 29mm è un crankbait per area e light spinning, che riprende il concept estetico della famiglia Moth. Disponibile in 2 versioni:
HF: Hyper Floating è un'esca dal nuoto perfetto in termini di rolling e wobbling. Con recupero regolare raggiunge circa 130/150 cm di profondità. Particolarmente adatto con recuperi stop&go, ma anche a canna alta per usarlo come una wakebait appena sotto la superficie.
SSS: La versione affondante è stata studiata per recuperi lenti, o medio lenti. All'interno abbiamo inserito una palla in tungsteno, che oltre alla elevata lanciabilità, permette di avere un nuoto erratico. Ciò significa che durante un recupero, apparentemente regolare, l'esca tenderà a compiere scarti laterali. È grazie a questo particolare movimento che sarà letale sui predatori più apatici.

A shorter version of the MOTH CRANK 29mm, this crankbait is for area and light spinning, and it is in keeping with the aesthetic concept of the Moth family. Available in 2 versions:
HF: Hyper Floating: a lure with perfect rolling and wobbling. With regular retrieval, it reaches a depth of about 130/150 cm. It is particularly suitable with stop&go retrieval, but it can also be used as wakebait just below the surface with a high rod.
SSS: the slow sinking version is designed for slow and medium-slow retrievals. We have inserted a tungsten ball inside, which allows for erratic movement in addition to high castability. This means that the bait will tend to make lateral deviations during an apparently regular retrieval. This particular movement will be lethal for the most apathetic predators.

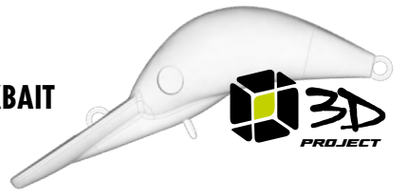
ALECA 27 | CRANKBAIT



5 pcs per pack

Con questo nuovo crank si è deciso di dare un fratello minore all'Aleca. Abbiamo ridimensionato, proporzionato e modificato alcune parti in maniera da poter avere sempre un corpo snello e affusolato che, abbinato ad una paletta di dimensioni generose permette di creare un movimento sinuoso anche con recuperi veramente molto lenti. Inoltre abbiamo aggiunto alla versione Floating una versione Slow Sinking per permetterci di andare a sondare anche gli starti più bassi d'acqua oppure poterlo utilizzare con degli stop durante il recupero. L'idea di realizzare questo Medium Runner di soli 27mm è nata per avere a disposizione un crank estremamente efficace quando le trote sono già state catturate più volte e di conseguenza diventano molto sospettose, perché grazie alla sua compattezza e abbinata ad un recupero molto lento, lo rendono estremamente catturante!

With this new crank we decided to give the Aleca a younger brother. We resized, changed its proportions and modified some parts to maintain a slim body that, together with a large blade, can create a sinuous movement even with very slow retrieves. We also added a Slow Sinking version to the Floating version to also cover the deepest layers of water or use it with stops during the retrieve.
We came up with the idea of creating this small 27mm Medium Runner to have an extremely effective crank when the trout have already been caught multiple times and consequently become very suspicious, because thanks to its compact shape and combined with a very slow retrieve, it is extremely captivating!

Il medium runner crankbait ideato da Alessio Caciagli (Ale Ca). Il corpo affusolato e la paletta di dimensioni generose sono un binomio perfetto per pescare a metà della colonna d'acqua, o sbattendo sul fondo in laghi poco profondi. L'azione permette di restare sospesi a profondità variabile in accordo alla temperatura dell'acqua. Ideale per trote apatiche e per le fasi di stallo della competizione. Ottimo anche su molti predatori tipici del light spinning.

The medium runner crankbait designed by Alessio Caciagli (Ale Ca). The tapered body and the generously sized shank are the perfect combination to fish halfway the water column or on the bottom of shallower lakes. The action makes it possible to maintain suspension at varying depths, based on the water temperature. Ideal for apathetic trout and for the deadlock stages of competition. Also great for many typical predators in light spinning.

RRP € € 11,50

Il suo design particolare lo rende unico nel movimento. Grazie alla forma della bocca riesce a far schizzare in avanti molta acqua ad ogni movimento dell'esca permettendo il classico pop e stop. Risulta fantastico anche sull'azione continua. Il corpo compatto e ben bilanciato lo rende perfetto anche nel lancio controvento. Da sottolineare sono le colorazioni studiate per essere decisive in gara e l'occhio in coda abbinato, che spesso è risolutivo sull'attacco finale del pesce. Nei test del nostro pro staff è risultato catturante sia su trote appena immesse, che sul pesce stanziale, anche nei momenti di completa apatia.

Its particular design makes it unique in movement. Thanks to the shape of the mouth, it is able to make a lot of water splash forward with each movement of the lure, allowing the classic pop and stop. It is also fantastic on the continuous action. The compact and well-balanced body makes it perfect even when casting into the wind. We have to point up the colors selected to be decisive in the competitions and the matching eye in the tail, which is often decisive on the final attack of the fish. In the field check of our pro staff, it was found to be catching both on newly released trout and on sedentary fish, even in moments of complete apathy.

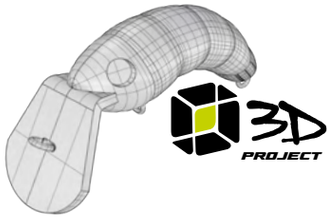
MOTH 28 | CRANKBAIT



5 pcs per pack

Piccoli crankbait che come il loro predecessore sono dedicati al Trout Area. Possiedono un corpo molto affusolato e simile al Moth, ma hanno dimensioni più contenute. La paletta larga permette di muovere al primo accenno di recupero lo rende ottimo per il "dead slow cranking". La versione floating lavora a galla, o nei primi 20-30cm. La versione sinking permette cadute e recuperi a profondità maggiori che variano in base ai differenti recuperi. Con un recupero costante si colloca 60-80cm. Ottimi per tutti i frangenti in cui la trota è apatica e in superfice.

These small crankbaits are dedicated to the Trout Area like their predecessor. They have a very tapered body similar to the Moth, but it's smaller. The wide lip allows to move the lure at the first hint of recovery making it great for "dead slow cranking". The floating version stays in the water surface or in the first 20-30cm. The sinking version allows falls and deeper retrieving. Using a linear standard retrieving the lure swim at 60-80cm under that water surface. Both are excellent when the trout is apathetic and on the surface.

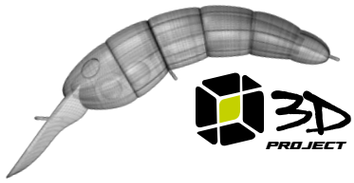
MOTH | CRANKBAIT



5 pcs per pack

Il crank da trout area disponibile in due versioni. Quella floating per insidiare le trote apatiche e con il "very slow cranking" in superfice, o sondare acque con recuperi più sostenuti. Quella sinking per scendere a cercare le trote attive e meno attive nella batimetrica dove stazionano, ottimo sia in recupero che in affondamento. Gamma colori pensati per le due differenti azioni e ami senza ardiglione misura 8# adatti alla competizione e al C&R.

Trout area crankbait available in two versions. Floating version: to catch the apathetic trouts with the "very slow cranking" action on the surface, or to fish the waters with faster retrieves. Sinking version to go down looking for the active and less active trouts in the bathymetric where they stand. Color chart was designed differently for the two different actions. The barbless hooks size 8 # are really suitable for the competition and for C&R.

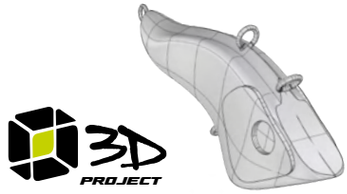
HYBRID | LIPLESS CRANK/VIB

SINKING | 3,8 g | 42 mm | HOOK SIZE #6

RRP € € 9,50



5 pcs per pack

Un ibrido, l'evoluzione del lipless crankbait e della vibration lure per il trout area e il light spinning. Ottimo, sia per le pesche statiche come il bottom fishing, sia per essere recuperato in maniera regolare o stop&go. L'esca è catturante già dalla fase di caduta. Una volta sul fondo resta stand up grazie al peso posizionato in testa. La coda resta rivolta verso l'alto aumentando la percentuale di cattura anche su fondali irregolari o fangosi. Nei momenti di attività delle trote posizionate sul fondo è micidiale, ma per insidiare le trote apatiche sarà sbalorditivo.

It is a hybrid, the evolution of the bottom lure, that can be used as lipless crankbait, thanks to its shape, its 2 hooks and its 2 rings on the back. The ring that is closer to the head is used in static angling, such as bottom fishing and dragging, the other one, in a higher position, for the lipless crankbait with regular retrievals, stop&go. The bait is captivating from the moment it is dropped. Once at the bottom, it stands up thanks to the weight located in the top. The tail remains pointing upwards, increasing the catch rate on irregular or as well as on muddy beds. When the trout is active at the bottom it is deadly, but it will be astounding to trick apathetic trout. It is an excellent lure for trout fishing and more generally light spinning.

WAVING-R | LIPLESS PLUG

SINKING | 3,0 g | 40 mm | HOOK SIZE #8

RRP € € 7,50

5 pcs per pack

La versione ottimizzata del piccolo minnow lipless affondante mantiene la lunga gittata di lancio ed il movimento auto-roll prodotto durante l'affondamento. Waving R è dotato di ami singoli barbless e colorazioni mirate al trout area a al light spinning. Trote e cavedani sono il target principale, ma cavedani, spigole, sugarelli e lecce stella dovranno temerlo!

The optimised version of the small sinking lipless minnow maintains its extended casting range and the auto-roll created when sinking. Waving R is equipped with single barbless hooks and colouring ideal for trout fishing and light spinning. Trout and chub are the main target, but bass, horse mackerel and pompano have reason to fear it as well!

TESER 50 | JERKBAIT

5 pcs per pack

Il nuovo jerkbait da trout area disponibile in azioni floating e slow sinking. Ottimo per insidiare le trote attive, ma soprattutto quelle apatiche. L'azione floating rende bene con recuperi regolari, o intervallati da jerkate. La versione slow sinking altrettanto, ma ancor di più in caduta, in trattenuta. Un'esca che permetterà di ottimizzare l'azione di pesca in tutte le fasi della competizione, soprattutto quelle in cui il pesce mangia di meno.

The new trout fishing jerkbait is available for floating and slow sinking action. Excellent to trick active trout, but especially for apathetic ones. The floating action works well with regular hauling in, or with interval jerking. The slow sinking version as well, but even more when held back during dropping. It is a bait that will allow you to optimise the fishing action in all stages of competition, especially those where the fish eat less.

BKK HOOKS

Questa è la swimbait senza paura, per tutti i big. Un'esca da trofeo che fa qualità e quantità in termini di catture. La sua TIGHT S-GLIDE è molto realistica e le sbandate in concomitanza delle jerkate saranno letali. Il recupero WIDE GLIDE ACTION non dà scampo. Temerario 190 è stata progettata per stimolare l'attacco di grossi pesci diffidenti, grazie al suo movimento catturante anche con recuperi lenti. È perfettamente bilanciata per lavorare alla perfezione con molteplici velocità, recupero lineare e twitching. L'esca nasce floating, ma l'assetto e l'azione sono personalizzabili grazie al posizionamento dei 2 adesivi piombati (Lead Stickers) in dotazione. Usando queste zavorre aggiuntive potrete decidere se e come farla suspendere o affondare. Una vera custom swimbait che vi regalerà adrenalina e catture!

This is the fearless swimbait, built for the big ones. A trophy lure that delivers both quality and quantity in terms of catches. Its TIGHT S-GLIDE is highly realistic, while the sudden side-to-side kicks produced during jerks are deadly. The WIDE GLIDE ACTION on a steady retrieve leaves no escape. Temerario 190 was designed to trigger strikes from large, wary fish, thanks to its irresistible action even at slow retrieve speeds. It is perfectly balanced to perform flawlessly at different speeds, with a straight retrieve or twitching. The lure is floating by design, but its buoyancy and action can be customized by positioning the 2 supplied Lead Stickers. With these additional weights, you can decide whether—and how—to make it suspend or sink. A truly customizable swimbait that will deliver adrenaline and catches!

5 pcs per pack

Questo stickbait è disponibile in due misure: 85 e 60mm. Entrambe danno il meglio, sia con recuperi stop&go, sia con recuperi costanti. La versione 85mm mantiene le caratteristiche della 60mm, ma con dimensioni maggiorate. Entrambi sono ottimi per insidiare il pesce che staziona in acque molto basse, ma anche per farlo risalire da fondo. Letali per i predatori di mare e d'acqua dolce.

This stickbait is available in two sizes: 60 and 85mm. Both 60 and 85mm give their best, both with stop & go recoveries and with regular retrieving. The 85mm version maintains the characteristics of the 60mm, but has larger sizes. Both are excellent for catching fishes that are stationed in very shallow water, but also for letting them go up from the bottom. Lethal to sea and freshwater predators

Il needle-fish nato dall'esperienza del team Herakles Saltwater. Corpo in ABS e armatura passante sono solo 2 caratteristiche secondarie. L'assetto di quest'esca permette di usarla con recuperi veloci come skipping lure simulando un'aguglia che fugge, come WTD con recuperi uniformi e stop&go, ma anche con movimento WTD lentissimo quasi sul posto. Un'esca facile da usare e che vi permetterà davvero di catturare interpretando al meglio ogni situazione della pesca Saltwater.

The needle-fish hatched from the experience of the Herakles Saltwater team. Its ABS body and inner reinforcement are just 2 of its additional features. The balance of this lure allows you to use it with fast retrieval as in skipping lure simulating a flying garfish, or in WTD with uniform and stop & go retrieval, but also with very slow WTD movement almost on the spot. A lure that is easy to use and that will really allow you to make the catch by interpreting every situation of Saltwater fishing.

BKK HOOKS

NEW 2027

KIRO 62 è un popper che grazie alla forma della sua bocca fa schizzare avanti molta acqua producendo dei pop molto accentuati. Letale nello stop & go, anche grazie ad assetto impeccabile. Occhio in coda e tinsel sull'ancoretta posteriore che danno un punto di riferimento al predatore prima dell'attacco. Il corpo compatto lo rende molto performante nel lancio, nonostante le dimensioni, 62mm. Un popper che sarà irrinunciabile per bass, spigole, persici reali e molti altri predatori,

KIRO 62 is a popper whose specially shaped mouth throws a large amount of water forward, creating loud, aggressive popping sounds. Deadly with a stop & go retrieve thanks to its impeccable balance. A tail eye and tinsel on the rear treble hook provide predators with a precise target before the strike. Its compact 62 mm body delivers excellent casting performance despite its small size. An indispensable popper for bass, seabass, perch and many other predators.

Rising SERIES | RATTLE | DIRECT METAL LINK

Un WTD che possiede un movimento zigzagante molto naturale. La distribuzione dei pesi e la forma sono studiati per raggiungere lunghe distanze di lancio e mantenere un perfetto assetto di nuoto, sia con recuperi lenti, che con recuperi veloci. La bocca provoca bolle e schizzi d'acqua. Il nuoto del corpo simula un pesce che scappa con recuperi veloci o, un movimento erratico WTD con recuperi lenti o medi. Il risultato è un artificiale ottimo per tutti i predatori marini, ma che può dare grandi soddisfazioni in acqua dolce. Dotato di armatura passante e colori studiati per catturare.

A WTD lure that features a natural criss-crossing movement. The weight distribution and the special shape are especially projected to reach long casting distances and to maintain a perfect swimming position during both slow and fast retrieves. Its mouth produces bubbles and effectively splash water. The lure swimming action simulates an escaping fish featuring a fast or an erratic WTD action as well. The result is an excellent lure ideal for saltwater predators, but it could give great satisfactions in still water too. It's equipped with a direct metal link and it's available in attractive range of colors.

HI-POP 110 LD | POPPER

LONG DISTANCE | 32 g | 110 mm

RRP € € 14,50

5 pcs per pack

HI-POP 110 LD (Long Distance) è un popper che deriva dall'HI-POP. Il peso è stato portato al limite della galleggiabilità per permettere lanci più lunghi del 15%. L'assetto è stato ottimizzato per i recuperi WTD, ma anche per quelli a velocità sostenuta. Questo popper continua ad avere la particolare bocca "doppia" e l'armatura passante. Garantisce la possibilità di insidiare prede di media e grossa taglia in sicurezza. L'esca è costruita e rifinita con i criteri della serie Rising.

HI-POP 110 LD (Long Distance) is a popper that derives from HI-POP. The weight has been brought to the limit of buoyancy to allow casts 15% longer than before. The weight balance was improved to make possible WTD recoveries, but also for highspeed retrieving. This popper continues to have the peculiar "double" mouth and the all along 1 piece metal wire inner structure. It guarantees the possibility of catching medium and large prey without any problem. The lure is built and finished with the criteria of the Rising series.

FRESHWATER | 4,3 g | 50 mm

RRP €
€ 8,00

Questo jerkbait flat side di 5cm è ottimo per la pesca in acque fluviali con correnti anche sostenute, ma anche per raggiungere velocemente il fondo in acque ferme. La forma piatta sui lati e l'assetto lo rendono paragonabile ad esche specifiche da torrente che spesso sono appannaggio dei soli autocostruttori. Il nuoto regolare e l'azione sulla jerkata lo rendono ottimo per la trota cui è dedicato, ma anche per molti predatori delle nostre acque dolci e salate.

This flat-side jerkbait measuring 5 cm is ideal for fishing in running water. Its flat shape on the sides and its design render it comparable to bait specific for currents, which often are the prerogative of DIY exclusively. The regular float and action upon jerking make it ideal for the trout it is designed for, but also for many of the predators in our fresh and salt waters.

10,00

Questo flat side jerkbait di 5cm è ottimo per la pesca in acque con correnti anche sostenute. La forma piatta sui lati e l'assetto lo rendono perfetto sia per la pesca in mare che in foce. Perciò è nata questa versione equipaggiata con ancorette stagnate e disponibile nelle nuove colorazioni SW che il nostro staff ha selezionato e testato. Il nuoto regolare e l'azione sulla jerkata restano la prerogativa principale che ingannerà spigole, occhiate e molti altri predatori salt water. Utilizzabile anche a traina.

This 5cm flat side jerkbait is excellent to fish in waters even with strong currents. The flat shape on the sides and the set-up make it also excellent for fishing at sea and at the river mouth. This is the reason why this version was born equipped with tinned treble hooks and available in the new SW colors that our staff has selected and tested. Regular swimming and jerking action remain the main prerogative that will deceive sea bass, saddled seabream and many other salt water predators. Can also be used for trolling.

FURY 68-SP | JERKBAIT

SUSPENDING | 4,6 g | 68 mm

RRP € € 11,00

5 pcs per pack

Fury 68sp è un jerkbait suspending che vi permetterà di pescare lenti quando il pesce apatico lo richiede e di usare tecniche più veloci in presenza di pesce attivo. L'azione suspending permetterà dei lunghi stop durante i quali la coda si abbasserà leggermente mettendo la testa in posizione più alta. Questo movimento praticamente automatico garantirà strike nelle fasi di stop e durante le ripartenze. Il Fury risulta catturante per spigole, bass, persici reali, cavedani e per tutti i predatori più smaliziati.

Fury 68sp is a suspending jerkbait that will allow you to fish slowly when lazy fish call for it and to use faster techniques when faced with more active fish. The suspending action will allow long stops during which the tail will lower slightly, putting the head in a higher position. This practically automatic movement will guarantee strike during the stop phase and during the restart. Fury is great for attracting sea bass, bass, perch, chub and the most savvy of predators. Well-chosen and alluring colours are the pluses of this fantastic lure.

TROLL 75 | MINNOW

FLOATING | 6 g | 75 mm

RRP € € 8,40

5 pcs per pack

Minnow galleggiante pensato per essere impiegato nella trainetta costiera, ma anche a spinning come jerkbait. La sua azione galleggiante facilita nella traina con più di una canna in quanto, nel momento dello strike su una delle esche basta fermare la barca durante il combattimento per far tornare a galla il secondo artificiale evitando di incagliarla sul fondo.

Floating minnow conceived to be used for inshore trolling, but also as JERKBAIT. Its floating action facilitates trolling with more than one rod because, during the strike on one of the lures, the other lure comes up on the surface in a few seconds after you stop the boat avoiding aground it on the bottom.

MIZU 70SS | JERKBAIT

SLOW SINKING | 4,8 g | 70 mm

RRP € € 8,70

5 pcs per pack

Si tratta di un jerkbait slow sinking di 7cm. Il nuoto è ottimo sia in acqua ferma che in corrente, questo grazie all'assetto. Catturerà in acqua calma e nella schiuma dei torrenti! La misura è perfetta per le trote, per i bass, ma anche per le spigole i persici reali e per molti predatori delle nostre acque dolci e salate. La sua versatilità lo rende un adatto a molte situazioni.

It is a slow sinking jerkbait measuring 7 cm in size. It manoeuvres splendidly both in still and in flowing water, thanks to its design. It will make catches in calm and in foaming waters! The size is perfect for trout, for bass, but also for sea bass and perch, and many of the predators in our sweet and salt waters. Its versatility makes it suitable for many situations.

RRP € € 9,60

5 pcs per pack

La versione salt water di 7cm è stata bilanciata per essere suspending in acqua salata. Ovviamente a seconda della salinità, la galleggiabilità potrà variare leggermente. Il nuoto è ottimo in ogni condizione. Questa versione è equipaggiata con ancorette stagnate e disponibile nelle nuove colorazioni SW che il nostro staff ha selezionato. Utilizzabile anche a traina. Spigole, occhiate, serra e gli altri predatori d'acqua salata di media e piccola stazza non avranno scampo!

This 7cm salt water jerkbait was designed to be suspending in salt water. Obviously, depending on the salinity of the water, the buoyancy may vary slightly. Swimming is excellent in all conditions. This version is equipped with tinned treble hooks and available in the new SW colors that our staff has selected and tested. It can also be used for trolling. Sea bass, seabass, saddled seabream and other medium and smallsized saltwater predators will have no escape!

LIP 95 S | JERKBAIT

5 pcs per pack

SLOW SINKING | 12 g | 95 mm

RRP €
€ 7,90

Questo minnow slow sinking è facile, sia da usare, sia da lanciare. Si trasforma in un'arma letale appena tocca l'acqua. Grazie alla sua particolare paletta ha un nuoto molto adescante durante il recupero lineare, ma se viene jerkato produce sbandate larghe diverse da qualsiasi altro jerkbait.

The Lip is a slow sinking minnow easy to use and cast, which turns into a lethal weapon just touching the water. This lure due to its unique lip has a very enticing movement during liner retrieving, but if jerked the Lip produces large skidding, different from any other jerkbait.

STUNT 90 SP | JERKBAIT

5 pcs per pack

SUSPENDING | 12,5 g | 90 mm

RRP €
€ 11,90

È un jerk suspending a paletta lunga, studiato per le acque dove è necessario che il nostro artificiale lavori a profondità intermedie. La possibilità di sospendere il recupero con l'esca che resta ferma è una caratteristica di tutte le esche suspending, ma lo STUNT90SP ha un assetto ideato per permettergli ripartenze al minimo accenno di recupero o jerkata, caratteristica che lo rende veramente catturante.

It a suspending long lipped Jerkbait, designed to fish in the waters where it is necessary that our lure works at intermediate depths. The possibility of stopping the retrieve with the suspending bait is a feature of all suspending lures, but the STUNT90SP has a structure designed to allow restarts at the first sign of retrieving or jerking, which makes it truly capturing.

DOGO 90 | JERKBAIT

5 pcs per pack

Dogo 90 è un jerkbait di 90mm disponibile nelle versioni suspending e sinking. Entrambe hanno un bilanciamneto magnetico che permette lanci lunghi e assetto impeccabile. Le sue caratteristiche lo rendono adatto sia alla pesca di ricerca che a pesche più statiche. Come il suo fratello maggiore di 110mm è ottimo si in mare che in acqua dolce. Lo potremo impiegare pescando con jerkate, recuperi veloci, recuperi stop&-go, twitching, ma anche in qualsivoglia approccio lento allo spot.

Dogo 90 is a 90 mm jerkbait available in suspending and sinking versions. Both have a magnetic balance that allows long casts and a flawless rig. Its characteristics make it suitable for both research fishing and more static fishing. Like its 110 mm big brother, it is excellent in both sea and fresh water. It can be used when fishing with jerk strokes, fast retrieves, stop-and-go retrieves, twitching and in any slow approach to the spot.

FUDE 120 SP | FLAT JERKBAIT

5 pcs per pack

SUSPENDING | 21,4 g | 120 mm

RRP € € 7,50

3D PROJECT

Si tratta di un'esca con azione di nuoto shallow, con wobbling e rolling accentuati per muovere acqua e produrre flash e cambi di colore. Un'esca dal corpo piatto sui lati adatta per insidiare i predatori di mare e acqua dolce. Grazie al suo assetto di pesi variabile è facile da scagliare lontano e ha sempre una posizione perfetta. È divertente e soprattutto efficace jerkato e usato a twiccing. La sua azione suspending è determinante nei recuperi stop&go.

It's a shallow running featuring a pronounced wobbling and rolling and moving a lot of water and producing flash and color shade changes. A flat sides body lure suitable for both fresh and saltwater predators fishing. Thanks to its variable weights distribution it's easy to cast and will keep a perfect position. Its suspending action will be determinant in the stop & go retrieves. Can be used as a searching lure on fast retrieves but also fished at slow speed and accurately close to structures.

5 pcs per pack

SLOW SINKING | 16,8 g | 125 mm

RRP €
€ 10,90

Pescare con il mare formato, magari con il vento che ci soffia in faccia è il desiderio di moltissimi pescatori, perché è in quel momento che molti predatori sono più attivi. In questi frangenti lanciare lontano non è facile e rimanere in pesca con l'esca nel giusto assetto non è del tutto scontato. JEKO125SS è la risposta, un jerkbait di 12,5cm con azione slow sinking dall'assetto impeccabile, letale per spigole, serra, barracuda e molti altri predatori.

Fishing in rough sea, perhaps with the wind blowing on your face is the desire of many saltwater fishermen, because it is the time many predators are more aggressive and active. In these situations long casting and keeping the bait in the strike zone is not easy. JEKO125SS is the answer, a 12.5 cms jerkbait featuring a slow sinking action and perfectly balanced, it's lethal for sea bass, blue fish, barracuda and a lot of other predators.

DIRECT METAL LINK

RISING SERIES

Il long jerk estremo. 187mm di lunghezza, disponibile nelle versioni floating e sinking. Corpo in ABS con armature passante. Posizione variabile dei pesi per lanci più lunghi. Bilanciamento studiato dal Team Herakles Saltwater per offrire volo, nuoto e risposta ottimale alla jerkata. Infatti, la paletta seppur pensata per un jerk, dona anche un "nuoto" durante il recupero. Colori sono stati pensati e ottimizzati per i predatori dei nostri mari.

It's available in two versions: 187mm long (floating e sinking) and 150mm long (sinking). ABS body with metal wire inner structure. Variable weight position for longer throws. Weight balancing developed by the Herakles Saltwater Team to offer long cast, swim and optimal response to jerking action. Its lip was though for a jerkbaitbut it confers to the lure a "swimming action" also during retrieving. Colors were designed and optimized for the predators of our seas.

TIGER 118-S

SLOW SINKING | 52 g | 118 mm

RRP €
€ 16,90

5 pcs per pack

Tiger è un jerkbait pesante, 118mm / 52g nato per le mangianze e lo shore jigging. Costruito in ABS resistente, e dotato di armatura passante è perfetto per la pesca sui grandi predatori. La sua forma allungata è perfetta nelle mangianze in cui c'è bisogno di più profondità, a causa della posizione del pesce, o della presenza di onda.
L'assetto è stato ottimizzato per i recuperi a velocità sostenuta necessari su mangianze di alletterati e altri pesci pelagici. Il peso è la forma aerodinamica la rendono ideale per lanci a lunga distanza. Disponibile nei colori selezionati dal team Herakles e armato con ancorette BKK.

Tiger is a heavy jerkbait, 118mm / 52g, created for feeding and shore jigging.Made of durable ABS and featuring a through-wire frame, it's the right choice for fishing for large predators.Its elongated shape is perfect for feeding bonanzas where greater depth is required due to the position of the fish or the presence of waves. The weight balance has been optimized for the fast retrieves required for feeding bonanzas of little tunny and other pelagic fish.The weight and aerodynamic shape make it ideal for long-distance casting. Available in colors selected by the Herakles team and equipped with BKK treble hooks.

MAKO 105 S | STICKBAIT

SINKING | 46 g | 105 mm | FEEDING FRENZY, SHORE JIGGING

RRP €
€ 16,70

5 pcs per pack

105mm per 46g sono le misure del nuovo stickbait per i pelagici, da usare off shore e a shore jigging. Regala lanci lunghissimi e mantiene il suo potere catturante a velocità di recupero sostenuta. Può essere usato come uno stickbait, o come un casting jig. È letale tra la superfice ed i 5-10m e può essere impiegato in maniera piuttosto versatile. Sulle mangianze di alletterati e ha dato ottimi risultati. A galla basterà recuperarlo, o jerkarlo per avere la garanzia dello strike. Da sottolineare la sua semplicità di utilizzo. A shore jigging risponde efficacemente in ogni fase del recupero. Corredato con ancorette BKK e rifinito nei colori più catturanti.

105 mm for 46 g are the measurements of the new stickbait for pelagics, for use off shore and with shore jigging. It gives extremely long casts and maintains its catching power at sustained retrieval speeds. It can be used as a stickbait or as a casting jig. It is lethal between the surface and 5-10 m, and can be used in a rather versatile manner. It has produced excellent results during little tunny feeding frenzies. When afloat, it is enough to retrieve it or jerk it to be guaranteed a strike. Its ease of use should be emphasised. In shore jigging, it responds effectively at every stage of the retrieve. Equipped with BKK anchors and finished in the most attractive colours.

Gli Herakles Black Eye 145 S sono stati progettati per combattere con tonni e alletterati. Il corpo bilanciato con masse interne è sviluppato per consentire lunghi lanci e cadute con caratteristico movimento rolling. Queste 2 caratteristiche sono alla base degli strike pescando pesci pelagici. La sua struttura interna passante in filo metallico e il corpo in ABS donano forza e resistenza. I colori sono stati selezionata in base all'esperienza del Team Herakles. Viene offerto con 2 ancorette 3X perfette per pascare l'alletterato. Pescando il tonno può essere armato con 1, o 2 ami di generose dimensioni. Gli anelli in filo metallico sono perfetti anche per alloggiare grandi split rigns. L'occhio nero è la rifinitura finale che dà il nome all'esca: BLACK EYE.

The Herakles Black Eye 145 S have been designed to fight with tuna and false albacore. The balanced body with inside masses is developed in order to allow long cast and rolling fallS. These 2 features are the basis of the strikes BY fishing pelagic fish. Its all along metal wire inner structure and its ABS body confers strength and resistance. The color chart has been selected according to the experience of the Herakles Team. It is offered with 2 3X treble hooks perfect for false albacore. by Fishing tuna, it can be rigged with 1 or 2 big hooks. The metal wire rings are perfect to hold big rings too. The black eye is the final finishing which gives the name to the lure: BLACK EYE.

KUTTER JIG | CASTING JIG

PACK:
1 METAL JIG
+
1 TREBLE HOOK

3D PROJECT

5 pcs per pack

La sua peculiarità è la possibilità di cambiare la sua azione semplicemente invertendo la parte collegata alla lenza, ossia invertendo il baricentro dell'artificiale. Spostando il baricentro verso la lenza si avranno discese più lente e si potrà jerkare il jig come fosse un lipless o un minnow. In questo caso si sfrutteranno le caratteristiche tipiche del recupero del casting jig anche con recuperi lenti. Innescato con il baricentro spostato verso il basso renderà molto bene nei recuperi lineari producendo rivoluzioni ancor più repentine sul proprio asse. Inoltre, permetterà gittate di lancio maggiori e offrirà tempi di affondamento più brevi utili per raggiungere gli hot spot in tempi più brevi.

Its main feature is the possibility to vary the swimming action inverting the rigging point from front to rear, inverting the center of gravity of the lure. Moving the center of gravity toward the main line it will possible to obtain slower dives and the chance to jerk the jig like a lipless or a minnow. It will be possible to work the lure with all the main characteristic of casting jig fishing even at low speed retrieve. Rigged with the center of gravity toward the bottom will perform very well on straight retrieves producing fast twists on its own axis, will cast longer and sink faster reaching the strike zone in a shorter time.

KEEN JIG | CASTING JIG

Il Keen jig è un'esca dalla spiccata aerodinamicità grazie al corpo affusolato. L'assetto decentrato permette un movimento armonico nel recupero e fluttuante in caduta, molto simile al nuoto del pesce foraggio. Perciò risulta molto adatto alla pesca sulle mangianze. È possibile utilizzarlo sia dalla riva che dalla barca, per insidiare tutti i predatori sia con tecniche verticali che con recuperi orizzontali, o a dente di sega. Tunnidi, Serra, Palamite, Lampughe, Spigole e Ricciole. Tutti i predatori che vi verranno in mente non sapranno resistere!

The Keen jig is a lure with great aerodynamics thanks to the tapered body.The off-centre balance allows a harmonious movement in retrieval and fluctuating in fall, very similar to how baitfish swim.Therefore it is great for fishing on the "mangianze" (baitfish breaking the surface). You can use it both from the shore and from the boat, to attract all predators either with vertical techniques or with horizontal or sawtooth retrievals.Tuna, Bluefish, Atlantic Bonito, Common Dolphinfish, Sea Bass and Snapper. Any predator you can think of will not be able to resist!

ARROW JIG | CASTING JIG

5 pcs per pack

DIRECT METAL LINK

L'Arrow jig è letteralmente una freccia. Facile da scagliare lontano e colpisce nel segno. Il nome suggerisce la sua aerodinamicità. L'assetto permette un movimento catturante in caduta, grazie alla forma e alle svasature "opposte" presenti su testa e coda. La varietà delle grammature lo rendono molto adatto alla pesca sulle mangianze, alle tecniche verticali e allo shore jigging. Potrete impiegarlo con tecniche verticali e con recuperi a dente di sega. Le vostre prede saranno di media e grande stazza: serra, dentici, lampughe, ricciole e tunnidi.

The Arrow jig is literally an arrow.It is easy to cast long distances and hits the mark.As the name suggest, it is aerodynamic.The balance gives an alluring movement in the fall, thanks to the "opposing" shape and flares on the head and tail. The variety of weights makes it very suitable for fishing on the "mangianze" (baitfish breaking the surface), vertical techniques and shore jigging.You can use it with vertical techniques and sawtooth retrievals. Your prey will be of medium and large size: bluefish, snapper, common dolphinfish, amberjack and tuna.

MISSILE

5 pcs per pack

#3.0 | SINKING RATE: 6,5 sec/m | 120mm | 18 g	RRP €
	€ 7,30

Herakles Missile è l'egi progettata specificamente massimizzare la distanza di lancio e i tempi di stazionamento e caduta. La peculiare forma (sutte) aerodinamica senza zavorra esterna, permette lanci molto lunghi e precisi. Il sistema MLC (Magnetic Long Cast) è il cuore di quest'esca sono le zavorre ad assetto variabile che si spostano automaticamente in coda al momento del lancio e tornano in posizione grazie ad un magnete. Il risultato sono lanci più lunghi fondamentali nella pesca ai cefalopodi. Altro fattore determinante è la velocità di discesa 6.5 sec./m che permette di restare più a lungo nella colonna d'acqua. L'assetto è stato ottimizzato per cadere in maniera lenta e naturale e per restare con l'amo in posizione leggermente più alta rispetto al suolo, grazie ad un'angolazione maggiore. Ogni abbinamento tela/base è stato scelto per massimizzare le catture. I tessuti sono di assoluta qualità, e le rifiniture sono quelle di livello della serie DARK: occhio custom, rifiniture glow e UV, Ogni modello monta ami BKK Super Slide.

Herakles Missile is an EGI specifically designed to maximize casting distance and increase hang time during the fall. Its unique aerodynamic 'sutte' shape, with no external weight, ensures exceptionally long and accurate casts. The MLC (Magnetic Long Cast) system is the heart of this lure: variable internal weights automatically shift to the tail during the cast and return to position thanks to a magnetic system. The result is longer casts, essential for squid fishing. Another key feature is its 6.5 sec./m sinking rate, allowing the lure to remain longer in the water column. Its balance has been optimized for a slow, natural fall while keeping the hooks slightly raised off the bottom thanks to a steeper angle. Every cloth/body combination has been selected to maximize catches. Premium fabrics and DARK-series level finishes include custom eyes, Glow and UV details. Every model is equipped with BKK Super Slide hooks.

SQUID DARK EGING

SQUID DARK EGING

Questa serie è pensata per offrire soluzioni a gli eginger che vogliono pescare in ogni condizione ed è composta di 2 famiglie: **MLC (Magnetic Long Cast)**,: per lanci lunghi, nelle misure 3.5# 3.0# entrambe con affondamento 3.5 sec./m; **Shallow (piumetta blu con tinsel glow):** discesa lenta, disponibile nelle misure 3.5# 6 sec./m e 3.0# 7 sec./m. Ogni colore è stato studiato con le tele e le basi appropriate. L'occhio custom, le rifiniture Glow e UV sono state scelte per dare un ulteriore tocco di personalità ed efficacia a questo prodotto. Le zavorre frontali sono in zinco, per essere sostenibili. Sono state studiate per ottimizzare i lanci, l'affondamento, il recupero e diminuire gli incagli. Tutti gli artificiali di questa serie sono dotati di arpette BKK Super Slide.

This series is designed to offer solutions to fishing enthusiasts who want to fish in all conditions It is composed by 2 groups: **MLC (Magnetic Long Cast)**, for long casts, in sizes 3.5# 3.0# both with sinking 3.5 sec./m. **Shallow (blue feather with tinsel glow)** slow descent, available in sizes 3.5# 6 sec./m and 3.0# 7 sec./m. Each color has been designed with the appropriate canvases and bases. The custom eye, Glow, and UV finishes were chosen to give this product an extra touch of personality and effectiveness. The front weights are in zinc for durability. They were designed to optimize casting, sinking, and recovery, and reduce snagging. All lures in these series are equipped with BKK Super Slide lures.

SQUID DARK EGING

La versione Shallow (piumetta blu con tinsel glow) delle Dark Egi, disponibile nelle misure 3.5# 6 sec./m e 3.0# 7 sec./m. L'assetto è stato definito per rendere al meglio in tutte le situazioni che possiamo trovare in pesca. Le tele sono di materiali di alta qualità, scelte a seconda delle livree e dei colori della base. Ogni colore è stato scelto ed abbinato alle basi dopo innumerevoli test nella pesca con discese lente. Eccezionali per pescare in acqua bassa, per restare più a lungo negli strati superficiali, per le discese lente sopra la posidonia, o per la pesca in area portuale.

The Shallow version (blue feather with glowing tinsel) of the Dark Egi, available in sizes 3.5# 6 sec./m and 3.0# 7 sec./m. The rig has been designed to perform optimally in all fishing situations. The wires are made of high-quality materials, chosen according to the liveries and base colors. Each color was chosen and matched to the bases after several tests in slow-descent fishing. Ideal for fishing in shallow water, for staying longer in the surface layers, for slow descents over seagrass, or for fishing in harbor areas.

SQUID DARK EGING

La versione Magnetic Long Cast delle DARK EGI è dotata di sistema di bilanciamento magnetico che aiuta nella gittata di lancio e a mantenere la giusta traiettoria in presenza di vento. Disponibile nelle misure 3.5# 3.0# entrambe con affondamento 3.5 sec./m. Le livree delle tele sono state abbinate alle basi dopo innumerevoli test in pesca in ogni condizione. Questi artificiali rendono in ogni condizione e danno il meglio quando si deve lanciare lontano ed entrare subito in pesca. Questo è possibile grazie all'assetto che è pensato per essere catturante dal momento dell'ingresso in acqua.

The Magnetic Long Cast version of the DARK EGI is equipped with a magnetic balancing system that helps with casting range and maintaining the right trajectory in windy conditions. Available in sizes 3.5# and 3.0#, both with a sink rate of 3.5 seconds/m. The canvas colors were matched to the bases after several fishing tests in different conditions. These lures perform in all fishing conditions and are at their best when you need to cast far and get fishing right away. This is thanks to their set-up, which is designed to be attractive from the moment they enter the water.

BADDIE SQUID

#2.0 | SINKING RATE: 3,5 sec/m | 75mm | 7,30 g	RRP € € 3,90

Una totanara piccola dal carattere deciso, la risposta HRK all'eging finesse. Dotata di corpo e zavorra frontale assimilabile alla serie Sensei, viene fornita con piombo glow, utilissimo per localizzarla nel buio, e ami Super Sharp. Peso e assetto la rendono perfetta per essere lanciata bene anche in condizioni meteo non ottimali. La color chart è stata scelta per essere catturante in ogni situazione.

A small squid jig with a bold character, HRK's answer to finesse eging. Featuring a body and front-weighted design similar to the Sensei series, it comes with a glow sinker, extremely useful for locating it in the dark, and Super Sharp hooks. Its weight and balance make it perfect for casting effectively even in less-than-ideal weather conditions. The colour chart has been selected to be attractive in every situation.

5 pcs per pack

#3.0 | 115 mm | 25 g

RRP €
€ 7,70

La famiglia Sensei viene ampliata con una serie di totanare della misura 3.0# più pesanti, 25 grammi, che sono state concepite per essere versatili.
La loro peculiarità è la zavorra frontale aumentata rispetto alle altre. Perciò potrete usarle, per: Contrastare venti e correnti lanciando da riva; Pescare a scarroccio dalla barca senza bisogno di piombi aggiuntivi, o con piombi più piccoli; per pescare a tip run.

The Sensei family is being expanded with a series of lures in the heavier 3.0# size of 25 grams, which are designed to be versatile.
They have an increased frontal ballast compared to the others. They can be used for: counteracting winds and currents when casting from the shore; drift fishing from the boat without the need for additional weights or with smaller weights; for tip-run fishing.

SENSEI TAKO

先生 先生

5 pcs per pack

La linea Sensei si arricchisce di una serie di tako egi, ottime per insidiare i polpi dalla barca e da riva. Le livree delle tele e le basi sono state selezionate per catturare. Le abbiamo abbiate a piombi e rifiniture glow. Abbiamo impiegato ami a 5 punte, una sola dotata di ardiglione per catturare e non lasciare sfuggire la preda, pur cercando di danneggiarla il meno possibile. Occhi custom e tutte le caratteristiche della linea Sensei.

The Sensei line is enriched with a series of tako egi, which are excellent for catching octopus from the boat and from the shore. Canvas liveries and bases were selected to capture. We have them in lead and glow finishes. We used five-pronged hooks, one of which has a barb to catch prey and not let it escape, while damaging it as little as possible. Customised eyelets and all the features of the Sensei line.

Questo egi è stato provato sia nella pesca dalla barca che da riva con risultati eccellenti. L'assetto e l'azione restano efficaci anche in presenza di zavorre aggiuntive. Distribuzione dei pesi studiata per un assetto corretto nelle fasi di lancio, caduta, di stop e di recupero. Le basi sotto il tessuto di sono di diversi colori, o glow. Ognuna di esse è stata abbinata alle tele al fine di massimizzare la cattura. Nella color chart potete trovare tutti i dettagli sugli abbinamenti. Ami di alta qualità resistenti e affilati per strike e recuperi sicuri. Occhio Herakles custom. GLOW finishing nella parte posteriore su tutti i colori.

This Egi boasted excellent results in both boat and shore fishing tests. The set-up and action remain effective even with an additional ballast. Weight distribution designed for correct set-up during casting, drop, stop and recovery. Different colour or glow bases under the fabric. Each has been matched to the canvases in order to maximise catches. You can find all the details about the combinations in the colour chart. Durable and sharp high-quality hooks for safe strikes and retrievals. Watch out for Herakles custom. GLOW finishing on the back in all colours.

ABISSO | EGI

#2.5 g | 100 mm |

RRP €
€ 3,60

La linea Herakles Abisso Egi è composta da una serie di artificiali ottimamente bilanciati, sia in fase di lancio, che in fase di nuoto. Il piombo forato permette di variarne l'asseto e la velocità di affondamento, tramite l'uso di zavorre aggiuntive, come l'Herakles Screw Sinker.
Il corpo è rifinito con tessuto di ottima qualità, dai colori curati ed adescanti. La corona di ami è stata scelta per essere resistente, altamente penetrante e molto affidabile, per evitare di perdere la preda in fase di combattimento.
Perfetta per catturare cefalopodi pescando dalla barca, o dalla riva.

The Herakles Abisso Egi line includes a range of perfectly balanced lures, both during casting and while swimming. The drilled weight allows you to easily adjust the lure's balance and sinking speed by adding extra weights, such as the Herakles Screw Sinker. The body is covered with high-quality fabric and features carefully designed, highly attractive colours. The strong, ultra-sharp double hook crown ensures a secure hold and excellent reliability during the fight, reducing the risk of losing the catch.
Versatile and effective, Abisso Egi is ideal for targeting cephalopods both from the boat and from shore.

SQUIDDER | EGI MINNOW

5 pcs per pack

	RRP €
90mm | 7,5 g | 90 mm	€ 9,90
110mm | 13 g | 110 mm	€ 9,90
130mm | 22,5 g | 130 mm	€ 9,90

Artificiale in 3 misure (90mm; 110mm e 130mm) dedicato alla pesca dei calamari a traina con affondatore, o piombo guardiano, ma anche a scarroccio con montatura a bandiera o lanciato a spinning. L'assetto combinato alla paletta dona un movimento dotato di wobbling e rolling che risulta molto adescante e consente di essere versatile e catturante in ogni situazione. La color chart annovera colori naturali, ma anche di contrasto. Molti di essi sono arricchiti con olografie all'interno del corpo e colorazioni glow. Si tratta di una gamma studiata dai nostri esperti per essere catturante nelle più differenti situazioni. Ogni modello monta doppie corone di ami di alta qualità, arricchite da una rifinitura glow nella parte posteriore. L'assetto del corpo ottimizzato per ognuna delle misure disponibili rende al meglio trainato tra 1,4 nodi a 2,8 nodi. Inoltre, mantiene il movimento anche durante le accelerate, che anzi produrranno un aumento del potenziale adescante. Si tratta di artificiali con caratteristiche tecniche che saranno gradite ai pescatori esperti e semplicità d'utilizzo che regalerà belle catture anche ai neofiti.

Artificial in 3 sizes (90 mm, 110 mm and 130 mm) designed for squid fishing by hauling with downrigger, or lead guard, but also with leeway when surfcasting, or by spin casting. The set-up with the shank creates a wobbling and rolling movement that has a major priming effect, allows versatility and guarantees a catch under all circumstances. The colour chart includes natural, but also contrasting colours. Many of these are embellished with holographic details on the inside and glowing colours. It is a colour range designed by our experts to be captivating in the most diverse situations.Every model carries double crowns of high-quality hooks, embellished by a glowing finish on the back side.The set-up of the body, optimised for all available sizes, renders best when dragged at a speed between 1.4 and 2.8 knots. In addition, it also maintains its movement when accelerating, which in fact increases the priming potential. Their technical characteristic will be appreciated by expert anglers, while the ease of use will also ensure great catches for beginners.

RRP € € 7,00

8 pcs per bag

5 bags per pack

Il corpo finesse e aerodinamico, ci permette di fare lanci lunghi e precisi. La silhouette fine e realistica con la coda a forcella è stata pensata la pesca ad over strolling, sia con esca spiombato che con insert weight molto leggeri. Nel recupero e con leggere jerkate la sua codina a forcella prende subito movimento. Ciò è determinante nelle situazioni in cui il pesce vuole l'esca nella sua strike zone mossa lentamente. Recuperato con jerkate molto frenetiche risulta letale, perché simula un pesciolino che scappa appena sotto la superfice. È molto funzionale anche in sospensione lasciato fermo nella strike zone con la codina che si muove al nostro minimo colpetto di cimino. Letale per il black bass, è ideale anche per persici reali, cavedani e spigole. Rende al meglio usato a over strolling, mid strolling, drop shot, neko Rig, microjig. Abbiamo deciso di offrire una color chart completa per tutte le situazioni.

Its finesse and aerodynamic body allow us to make long and precise casts. Its fine and realistic fork-tailed silhouette has been designed for over-strolling fishing, both with unweighted bait and very light insert weights. Its fork-tail immediately takes movement in the retrieve and with light jerks. This is crucial in situations where the fish want the bait in the strike zone moved slowly. It is lethal when retrieved with very frantic jerks, as it simulates a small fish escaping just below the surface. It is also very functional when left stationary in suspension in the strike zone with the tail moving at the slightest flick of the line. It is lethal for black bass and ideal for perch, chub and European seabass. It works best when used in over strolling, mid strolling, drop shots, neko Rig and microjig. We decided to offer a complete colour chart for all situations.

BAD MINNOW | BORN TO CATCH

4'' | 10 cm

RRP € € 7,50

Il Bad Minnow è una swimbait snodata che racchiude in se efficacia e versatilità: Il corpo affusolato dotato di occhi custom; I 3 snodi che ad ogni jercata danno l'effetto di un pesce che guizza; la coda customizzabile che da shudder tail diventa fork tail. Quest'esca può essere usata a spiombata, su jig head, come trailer per chatterbait e spinnernbait, ma anche a drop shot, o a strolling. L'abbiamo pensata per spigole, bass, persici reali e sandre, ma si adatta a moltissimi predatori.

The Bad Minnow is a jointed swimbait that encapsulates effectiveness and versatility through: Its tapered body with customised eyelets; Its three joints give the effect of a darting fish with each jerking motion; Its customisable tail turns from a shudder tail into a fork tail. This bait can be used when fishing unweighted on jig heads, as a trailer for chatterbait and spinnerbait, or in drop shots or strolling. We designed it for European seabass, bass, perch and zander, but it is suitable for many predators.

BENJO R 5.0" | BORN TO CATCH

5" | 12,7 cm

RRP €
€ 8,00

La forma dell'esca e la coda sono in equilibrio perfetto tra loro e offrono un mix perfetto di rolling del corpo e frequenza di nuoto del paddle. L'azione inizia al momento dell'entrata in acqua. La caduta sarà già strike zone, figuriamoci il recupero. La forma slim è studiata per non "rubare acqua" alla coda, perciò il movimento del paddle è perfetto e costante. Il corpo ha un lungo taglio che facilita l'innesco offset nella parte inferiore e i nostri hook set rings per alloggiare la punta degli ami offset nella parte superiore. Inoltre la testa ha una parte adatta all'innesco su jig head e drop shot hook.

The shape of the lure and tail are in perfect balance with each other and offer a perfect mix of body rolling and paddle swimming frequency. The action starts upon entering the water. The fall will already be a strike zone, let alone the retrieve. The slim shape is designed not to steal water from the tail, so the movement of the paddle is perfect and constant. The body has a long cut-out to facilitate offset baiting at the bottom and our hook set rings to accommodate offset hook tips at the top. In addition, the head has a part suitable for jig heads and drop shot hooks.

MORTAL BUG | BORN TO CATCH

2.5'' | 6,7 cm

RRP € € 6,00

10 pcs per bag 5 bags per pack

La finesse creature bait, nata per insidiare i predatori più apatici o diffidenti. È caratterizzata da un corpo allungato e compatto nella parte anteriore e lamellare nella parte posteriore. Le sue appendici laterali, 4 per lato, sono orientate al contrario rispetto al punto d'innesco per rallentare la caduta e produrre vibrazioni adescanti ad alta frequenza, anche con recupero lento e nelle fasi di stop. La coda biforcuta si muove ad ogni accenno di movimento creando un mix che adescante che rimanda a insetti e invertebrati alla base della catena alimentare di black bass, persici reali e sandre.

A finesse creature bait designed to target the most inactive or wary predators. It features an elongated body, compact at the front and ribbed at the rear. Its lateral legs, four on each side, face away from the rigging point to slow the fall and produce enticing high-frequency vibrations, even during slow retrieves and pauses. The forked tail reacts to the slightest movement, creating an attractive action that imitates insects and invertebrates at the base of the food chain of black bass, perch and zander.

3.6'' | 9,2 cm

RRP €
€ 7,50

8 pcs per bag 5 bags per pack

Una creatura, con doppia coda derivata dal Leftail, corpo da gambero e appendici da insetto Leftail Bug! La creatura devastante nata dall'esperienza di franco Mancini. La prerogativa principale è costituita dalle due code, o se vogliamo chele, che muovono con una frequenza perfetta nel recupero, in caduta e ad ogni accenno di richiamo. Un'esca perfetta in molteplici situazioni, anche in presenza di pesci sospettosi. Si può innescare a Texas rig, jig head, e sul jig per catturare bass, lucci e persici reali.

A creature with a double tail coming from the Leftail, a crayfish body and the appendix of a Leftail Bug! The devastating creature created with Franco Mancini's expertise. Its main prerogative are its two tails, or rather claws, that move with a perfect frequency during the retrieve, while sinking and at every jerk. A perfect bait in many different situations, also with suspicious fish. It can be used in Texas rig, jig head and on the jig to catch bass, pikes and perch.

BULL CRAW | BORN TO CATCH

4'' | 10 cm

RRP €
€ 7,50

Il Bull Craw è un mix vincente di caratteristiche difficilmente conciliabili. Un gambero compatto, ma voluminoso; efficace con azioni veloci, ma anche nelle fasi più lente o statiche. A rendere Speciale il Bull Craw sono: la densità del corpo, le grosse chele che si muovono anche con recuperi lenti, le antenne curve che fluttuano anche in assenza di movimento e le zampette con anima lamellare che vibrano continuamente. Un'esca risolutiva per il texas rig, per il sasuteki, come trailer per il jig e per il drop shot.

The Bull Craw is a winning mix of characteristics that are difficult to bring together. It is compact yet voluminous and effective with fast action, but also in slower or more static phases. What makes the Bull Craw special is the density of the body, the large claws that move even with slow retrieves, the curved antennae that float even in the absence of movement and the lamellar legs that vibrate continuously. Decisive bait for Texas rig, for sasuteki, as a trailer for jig and for drop shot.

La vera particolarità di quest'esca sono le 4 appendici: 2 antenne e 2 chele, che si muovono con 2 frequenze differenti. Grazie alle parti terminali a "L" opposte, le antenne si muovono alternativamente una verso l'alto e una verso il basso con azione veloce e nervosa. Le chele hanno due svasature, che in caduta e nel recupero producono un diverso movimento stretto e veloce, come quelle di un gambero che scappa verso la sua tana. Inoltre, le zampette laterali sono disegnate per vibrare, aggiungendo una terza frequenza. Un craw da usare, sia con approcci finesse, sia per pescare a flipping, o come trailer sul jig.

The main feature of this bait is he 4 appendix: 2 antenna and 2 claws, moving at different frequencies. Thanks to its inverted "L" tips the antennae move one toward the top and the other none alternatively toward the bottom in a nervous and fast way. The claws feature two countersinking, producing another different fast and narrow movement during the diving, matching a craw running for cover. The lateral legs are expressly designed to create more vibrations. A craw pattern suitable for finesse, flipping or as a jig trailer.

BAZZY BUG | BORN TO CATCH

3.2'' | 8 cm

RRP €
€ 7,40

Il corpo piatto ha un assetto perfetto e si innesca e lancia con estrema facilità. Le due chele (doppia coda) si muovono con una frequenza estremamente adescante appena l'esca tocca l'acqua, sia in caduta, che nei recuperi. Qualsiasi sia la velocità le zampe e le antenne hanno movenze naturali e le vibrazioni prodotte dalle appendici aumentano un potenziale adescante già notevole. Il Bazzy Bug risulta ottimo sia per la pesca nelle cover, che in acque aperte grazie alla sua estrema versatilità. Si tratta di una creature che regala abboccate, sia con esche veloci, sia per approcci più lenti mirati a spot stressati.

he flat body feature a perfect balance, is easy to rig and casts very well. The two claws will start moving in a very enticing way as soon as they touch the water, while diving and during the retrieve. The antennae and the legs will feature a very natural movement at all speed and the vibration produced by this soft bait will enhance the already high hooking rate. The Bazzy Bug will result in an excellent bait to fish heavy covers or open waters thanks to its great versatility. It will produce a lot of strikes on both power and light approaches to heavily fished spots.

5 bags per pack

Dopo innumerevoli prove abbiamo confermato la versione R, togliendone i punti deboli. La testa è stata rinforzata ed allargata per permetter una maggiore resistenza all'innesco ed alle ferrate.Abbiamo inserito una serie di lamelle nella parte centrale per rendere il corpo più forte e per avere un punto di aggancio per la punta dell'amo. Le zampette laterali sono formate da una serie di piccole sfere che si animano nelle fasi di caduta e di pesca, emettendo molte vibrazioni. La coda è la vera anima del Leftail-R. È più resistente sulla giuntura col corpo, così da poter essere tranquillamente usata nelle cover più difficili. Inoltre Il nuovo design della parte finale rende il movimento frenetico al minimo contatto con l'acqua!

After countless tests we have created the R version removing all the weak points.The head has been strengthened and enlarged to allow greater resistance to the rigging and to the strike. We have added a lamellar series in the central part in order to make the body stronger and to get a place to hold the hook point. The side legs are made of a series of small balls. They move during falls and fishing time vibrating. The tail is the real soul of the Leftail-R. It's more resistant on the joint with the body, so it can be safely used in the most difficult covers. The tail final part's new design allows a frenetic movement at the first contact with water!

LEFTAIL WORM | BORN TO CATCH

	RRP €	
3.4'' | 9,6 cm	€ 4,90	12 pcs per bag
4.8'' | 12,2 cm	€ 6,60	10 pcs per bag

Da una creature nasce un worm, da un'idea formidabile nasce una rivoluzione. Disponibile in 2 misure. Resta il concetto della ipercatturante coda a scimitarra, ma viene abbinato ad un corpo, idrodinamico e allungato. Il risultato è un'esca con la frequenza della coda del Leftail e la sinuosità e la lunghezza di un worm. Può essere usata pitching, flipping, down shot, spiombata, come uno shad, sui jig e jig head e con tutti gli inneschi tipici degli worm.

From a creature bait a worm is born, from a formidable idea a revolution is started. Available in two sizes. The super catchy concept of the scimitar shape tail is maintained, but it's joined to a hydrodynamic and enlonged body. The result is a soft bait featuring the tail movement frequency of the Leftail and the sinuosity and the length of a worm. Can be used for pitching, flipping, down shot, weightless, as a shad pattern, jig trailer or on a jig head, or all typical worm baits rigs.

TINY TAIL SHAD | BORN TO CATCH

3.5'' | 8,9 cm

RRP € € 5,40

10 pcs per bag

5 bags per pack

Il TINY TAIL 3.5'', il "codina", è caratterizzato da una coda fine dotata di un piccolo paddle, che vibra al minimo accenno di recupero. Inoltre, ha un corpo compatto e aerodinamico che permette lanci lunghi e precisi, nonostante si tratti di un'esca finesse. La maggior parte del peso dell'esca è concentrata nel corpo leggermente piatto, che dona un assetto perfetto in caduta. Ottimo spiombato, a drop shot e su jighead per spigole, bass e persici reali.

The TINY TAIL 3.5 has a thin tail with a small paddle, that vibrates at the minimum retrieve hint. Moreover, it has a compact and aerodynamic body for long and precise casts, although it is a finesse bait. Most of the bait's weight is concentrated in the slightly flat body, which gives it a perfect balance when sinking. Excellent with no weights, on drop shot and a jighead for seabass, bass and perch.

R-SNAKE | BORN TO CATCH

5.5" | 14 cm

RRP € € 5,80

Corpo tondeggiante leggermente schiacciato e sottile per avere gittata di lancio, ma anche assetto impeccabile ed effetto trattenuta durante la fase di affondamento. Il nome R (rattle) – snake, serpente a sonagli deriva dalla forma della coda, che ha due sezioni allargate nella parte terminale per aumentare movimento e vibrazioni. Durante i test, nel corso di gare e prove di gare è stato risolutivo montato su jig head, a drop shot, a wacky rig, a split shot, e shacky head. Può essere accorciato di 0.85" (poco più di 2cm) mantenendo la stessa azione, semplicemente tagliando il verme nella prima parte stretta della testa. L'esca presenta una estrema sinuosità abbinata a molta mobilità. Questo grazie alla sua forma che è stata studiata per essere idrodinamica e creare attrito su alcune parti al fine di provocare i movimenti e vibrazioni ritenuti i più adescanti dopo innumerevoli field test.

A slightly flat round narrow body for a long casting range, but also a perfect balance to be hold during the sinking. The name R (Rattle) – Snake comes from the shape of the last 2 enlarged sections of the tail. They enhance the movement and the vibrations. During the tests, competitions and training sessions, it was decisive rigged on a jig head, drop shot, wacky, split shot and shaky head rigs. Can be cut ans shortened of about 0.85" (about 2 cms) and it will maintain the same action, simply cutting the worm at the first head narrow segmentation. The soft bait feature a sinuous movement, this thanks to its specific hydrodynamic shape and designed to create a friction between the parts an consequently create a movements and vibrations that resulted the most productive during the field tests.

ISPANIC SHAD | BORN TO CATCH

	RRP €	
3.5'' | 8,7 cm	€ 6,30	12 pcs per bag
4.5'' | 11,5 cm	€ 6,60	9 pcs per bag

L'Ispanic Shad si muove rollando e vobblando con il suo corpo dalla sezione triangolare. La coda con appendice a lancia continua a muoversi in maniera sinuosa, sia nel recupero, che in caduta. Il peso del corpo facilità lunghe gittate di lancio. Si tratta di un'esca versatile ed estremamente catturante di cui è stata avvertita la necessità pescando nei grandi laghi spagnoli da qui il suo nome, ma che è diventata la chiave di lettura per effettuare belle catture anche nelle acque italiane, sia dolci, che salate.

The Ispanic Shad rolls and wobbles a lot thanks to its triangular shape body, the spear-point shape appendix tail moves all the time in a sinuous way, while diving and during the retrieve. The weight of the body portion of the bait will allow long casts. This is a very versatile bait and extremely productive, a bait that was developed to sort out the need of big Spanish reservoirs fishing, and that's why we named it so, but will be effective anywhere, in both fresh and saltwater.

GRUBY R | BORN TO CATCH

3.2'' | 8 cm

RRP €
€ 4,90

12 pcs per bag 5 bags per pack

Il Gruby R è un finesse worm dal corpo affusolato e la coda arricciata. Quest'ultima è più larga vicino al corpo per avere un assetto migliore. Il ringrosso nella parte terminale incrementa le vibrazioni. Si tratta di un'esca ottima per black bass, persici reali e predatori d'acqua dolce, ma anche per la spigola e altri predatori marini.

The Gruby R is a finesse worm with a tapered body and a curled tail. The tail is wider near the body for a better balance. The fatter end part increases the vibrations.It is an excellent lure for black bass, perch and fresh water predators, but also for sea bass and other marine predators.

CRUBLE | BORN TO CATCH

5" | 12,5 cm

RRP €
€ 5,00

Il corpo piatto è molto particolare ed ottimo per molteplici inneschi. La coda a uncino è caratterizzata da un movimento ibrido tra worm e grub che muove al minimo accenno di recupero, o movimento del cimino. Ha una grande molteplicità di impieghi grazie alla forma piatta del corpo e la coda si presta tecniche come il drop shot, ma anche texas rig, wacky rig, jig head. Ciò permette di utilizzarla, sia su pesci attivi, sia su quelli apatici.

The flat body is very particular and ideal for multiple priming. The hooked tail is characterised by a hybrid movement, between worm and grub, that moves at the slightest tug or movement of the tip. This bait has a great variety of applications thanks to the flat-shaped body, and the tail is ideal for techniques such as the drop shot or the Texas rig, wacky rig or jig head. This makes it possible to use it both on active and apathetic fish.

MATO WORM | BORN TO CATCH

6.5'' | 16 cm

RRP € € 5,00

La sua peculiare proporzione tra corpo e coda permette un assetto ottimale con tutti gli inneschi e una ferrata efficace. La coda curva, disegnata con spessore che aumenta dall'interno verso l'esterno, produce vibrazioni e turbolenze adescanti che attirano il pesce senza essere troppo invasivo. Il corpo allungato e aerodinamico permette lanci lunghi, e nuoto sinuoso grazie alla sua forma stretta nella parte terminale. Ottimo, sia per le pesche di ricerca, che per quelle più statiche come il down shot.

Its peculiar proportion between the body part and the tail will feature a optimal balance in any rigging style and will allow an effective strike. The curved tail, featuring a special thickness increasing from the inside toward the outside, will produce a lot of turbulence and vibrations that will attract fish without been too invasive. The enlonged and aerodynamic body will allow long casts and a sinuous swim thanks to its narrow shape in the final part. Perfect for search fishing or more static ones like the down shot.

Il corpo aerodinamico e dotato di snodi è solo il preludio che fa da supporto alla vera arma letale, ossia la coda a studiata con una particolare inclinazione che la rende capace di produrre molte vibrazioni durante il nuoto. Lanci lunghi e precisi, e recuperi efficaci sono le prerogative del Ghost Shad. Quest'esca è ottima innescata su chatterbait e jig head, sia spiombata. Inoltre, rende molto bene a Texas rig, drop shot, split shot e molteplici altri inneschi.

The Joined aerodynamic body is only a prelude to the real lethal weapon, the tail, designed with a particular angle that makes it able to produce faster vibrations while swimming. Long and precise casting are the effective powers of the Ghost Shad. This solution is capable of ensuring the right mix of sinuous movements and resistance to attacks by predators. This lure is excellent mounted on chatterbaits and jigheads, or launched weightless. It is also very good for Texas rig, drop shot, split shot and many other general rigs.

VIBER SHAD | S.S.I. SALT SCENT INJECTION

7 pcs per bag — 5 bags per pack

SIZE	RRP €
3'' - 7,5 cm	€ 6,20
3'8'' - 9,5 cm	€ 7,20

Lo shad è sicuramente una delle esche più catturanti, ma per funzionare veramente deve avere caratteristiche ben precise: il corpo deve rollare, la coda deve muoversi ad ogni minimo accenno di recupero e durante la caduta. Il Viber shad possiede questi elementi, ma anche il corpo lamellare che contraddistingue tutta la serie Viber e che produce vibrazioni catturanti.

The shad is definitely one of the most efficient bait, but to be really efficient it must have some very specific characteristics: the body must roll, the tail must move at the first hint of retrieve as well as during the fall. The Viber shad definitely owns these elements, but in addition it features the ringed body, the peculiar element of the Viber series, which gives extra capturing vibrations.

MIRROR SHAD

6 pcs per bag — 5 bags per pack

La serie Mirror comprende due softbaits dal corpo identico, ma dotate di code differenti. Il corpo trasparente rifinito con i colori dei più comuni pesci foraggio ha una lamina riflettente al suo interno necessaria per produrre flash luminosi molto adescanti. Da ciò il nome Mirror, specchio. Il Mirror Shad (3.2inch e 3.8inch) possiede la classica coda degli shad, che produce vibrazioni al minimo accenno di recupero. Il MIrror Stick (3.2 inch) ha invece una coda dritta che si muove veloce, ma provoca meno vibrazioni. Entrambe le esche sono ottime per essere usate a drop shot, montate su jig heads e in molti altri approcci finesse sia in mare che in acqua dolce.

The Mirror series includes two softbaits with the same body, but with different tails. The body is transparent and finished with the colors of the most common preys, and inside there is a reflective foil producing a very bright priming flash. Hence the name Mirror. The Mirror Shad (3.2inch e 3.8inch) has a classic shad tail which produces vibrations at the first hint of recovery. The Mirror Stick (3.2inch) has a straight tail that moves fast, but causes less vibration. Both these baits are excellent for the shot rigged drop, but also used on jig heads and in many other finesse techniques, both at sea and in fresh water.

GARUDA XX 150 | MONSTERBAIT

20 pcs per box

Un "grubtail" shad per la pesca ai predatori che integra la serie XX con le sue vibrazioni e la sinuosità che gli è propria. Corpo di shad e coda di grub come il Garuda armato, ma dimensioni minori e maggiore versatilità grazie alla possibilità di armarlo a vostro piacimento. I predatori di mare e d'acqua dolce potranno essere insidiati con tecniche verticali e orizzontali a seconda del vostro innesco.

A "grubtail" shad for predator fishing at 360°, high vibrating and sinuous movement. A shad body and a grub tail, like its bigger brother the pre-rigged Garuda but in a smaller version to be rigged at angler choice. To be fished vertically rigged on the three different sizes 30 gr, 50gr, 80gr dedicated jig heads or any other rigging.

BENJO XX | MONSTERBAIT

20 pcs per box

La forma e le vibrazioni sono state studiate per scatenare l'attacco del predatore. Il nuoto con assetto perfetto e movimento sempre eccellente è il risultato di innumerevoli prove in mare e in acqua dolce. Lucci, siluri, tunnidi, spigole, dentici e non solo potranno essere insidiati con esche siliconiche all'altezza della situazione.

The shape of the lure and the vibrations produced have been especially studied to trigger the predator attack. The perfect asset swimming action and the movement are the result of countless hours of tests in both fresh and saltwater. Pikes, catfish, pelagics, big sea bass, dentex and many other predator species will be attracted by these highly productive lures.

GARUDA | MONSTERBAIT

5 bags per pack

Garuda e Huge Shad sono esche della serie Monster Baits destinate ai grandi predatori. Armatura in acciaio, ami e ancorette resistenti e perfetto bilanciamento dei pesi sono le caratteristiche che rendono questa serie impeccabile nel nuoto, nel lancio, ma soprattutto sono capaci di dare la massima sicurezza prima, durante e dopo lo strike.

Garuda and Huge Shad are some of the brand new lures in the Monster Baits series. One piece metal wire inner structure, resistant hooks and tremble hooks, perfect weight balance are the main characteristics of the Monster Baits Series. All these Lures offer an impeccable swimming action, good cast performance, but most of all they all give you the maximum of safety before, during and after the strike.

T-SHAD | MONSTERBAIT

2 pcs per bag

5 bags per pack

Il T-SHAD è un un'esca siliconica che da ottimi risultati su lucci, siluri, persici e tutti i grandi predatori. Il posizionamento delle zavorre all'interno del corpo permette un corretto assetto. Il corpo compatto e idrodinamico permette lanci a lunga gittata che servono per sondare i grandi spazi dove stazionano i predatori.

The T-SHAD is a soft bait that gives excellent results with pike, catfish, perch and all big predators. The weight distribution within the body allows a correct action, both during fall and the recovery. The compact and hydrodynamic body allows long casts.

TURBO GRUB | MONSTERBAIT

4 pcs per bag — 5 bags per pack

Il Turbo Grub ha la sua caratteristica principale nella coda arricciata con spessore variabile dall'interno verso l'esterno. Il corpo dritto e scanalato si adatta per essere montato su jig head e come trailer per jig e grandi spinnerbaits.Quest'esca è l'evoluzione del grub, che da decenni continua ad essere l'esca più catturante. Ottimo per insidiare, lucci, siluri, black bass, spigole e molti altri predatori.

Turbo Grub's main feature in the single curled tail with variable thickness from the inside outwards. Its straight and slotted body is suitable for jig head also as a trailer for jigs and big spinnerbaits. This bait is the evolution of the grub, which for decades has been the most succesfull bait. Ideal for catching, pike, catfish, black bass, sea bass and many other predators.

MONSTER KEEPER | MONSTERBAIT

5 pcs per box

L'ondulante Monster Keeper è studiato per la pesca dei grandi predatori ed viene proposto in 3 misure. Ognuna delle 3 misure è ottenuta con fusioni metalliche studiate per valorizzare al massimo la forma in termini di gittata di lancio, azione di nuoto e caduta. Tutti i modelli sono rifiniti con colori catturanti e dotato di ancorette di ottima qualità.

The Monster Keeper spoon was designed for big predators fishing and it's available in 3 different sizes. Each of these 3 sizes is obtained through metal moldings in order to maximize the casting distance, the swimming action and the movement during the falling. Every model features with high catching colors and top quality treble hooks.

KASUMI BRAID | 100YD

RRP €
€ 19,90

4 psc per pack

Kasumi Braid è l'High Grade PE ultra fine di Herakles. È dedicato al trout area e al light spinning. È veramente setoso al tatto e molto resistente al nodo. L'abbiamo testato nelle competizioni in tutta l'Europa ed è risultato estremamente importante sia per effettuare lanci lunghissimi che per mantenere il contatto con l'esca. Rende evidenti anche le mangiate più subdole e leggere. Disponibile nei nuovi colori Pink e Yellow scelti dagli agonisti più esigenti e testati in ogni condizione. Kasumi Braid il top per il Trout Area.

Kasumi Braid is the Herakle's Ultra Thin High Grade PE. It is dedicated to trout area and light spinning. It has a really silk touch and it is very knot-resistant. We tested it in competitions all around Europe and it was extremely important both for making very long casts and for maintaining contact with the lure. It makes evident the most subtle and light bites too. It is available in the new Pink and Yellow colors. They were chosen by the most exigent tournament anglers. They were tested in all conditions. Kasumi Braid is the top for the Trout Area.
