KIAR REEF

Una serie sviluppata per essere il top per il saltwater game. Senza riserve. Copre tutte le esigenze del pescatore che vuole misurarsi con le prede più ambite dei nostri mari e non solo. Carbonio alto modulo con azioni studiate per essere estremamente versatili, robuste e al contempo leggere. Come sempre abbiamo testato le nostre canne portandole al limite per superarlo. Una serie impreziosita con rifiniture di pregio, colori aggressivi ed eleganti e componentistica scelta ad hoc assieme ai nostri pro staff. Kiar Reef, un tuffo nel blu.

A rod serie developed to be the top for saltwater. It covers all the needs of the angler who wants to fight with the most desirable preys. High modulus carbon, rod actions are designed to be extremely versatile, robust and at the same time light. As usual, we tested our rods pushing them to the limit, in order to overcome it. It is made with of precious finishing, aggressive and elegant colors and top level components.

BLACK WEAPON

BLACK WEAPON REVENGE

1 SECTION

Il nostro obiettivo è puntare al meglio e andare sempre oltre. Abbiamo sviluppato una nuova serie che riparte dagli ottimi risultati ottenuti con le Premium e le Black Weapon Revenge unendone i punti di forza. Canne leggere, sensibili, resistenti, versatili e aggressive. Componenti innovativi, come gli anelli Sea-guide XOHG e XOO e manici Japan style sono solo la parte cool di un mix di stile ed efficacia. Non fermatevi all'apparenza, seppur bellissima. Abbiamo usato il miglior carbonio e le resine più performanti. Sono canne vere: fatte di esperienza e di tecnologia; di strike, di lanci, e di recuperi! Herakles Thug Tested Style!

Our goal is to aim at the best and go further. We developed a new series that starts from the excellent results achieved with the Premium and the Black Weapon Revenge series by combining together their points of strength. These rods are light, sensitive, resistant, versatile and aggressive. The innovative components such as Sea-guide XOHG and XOO guides and the Japan style handles are just the cool part of a mix of style and effectiveness. We used the best carbon material and the most resilient resins. Herakles Thug Tested Style!

HUGE XX

X. Vella
Designed

🇮🇹 Potenti predatori da trofeo, sfide memorabili con lucci e siluri in situazioni al limite. Questo è il target della serie HUGE XX. Canne potenti, maneggevoli e resistenti, ma anche bilanciate e di peso contenuto. Potrete usarle dalla riva, dalla barca e dal belly boat in ogni situazione in cui materiale dall'elevatissima affidabilità si rende necessario. Particolarmente interessanti le due canne per la pesca in verticale sviluppate da Xavier Vella, uno dei più grandi pescatori di siluro europei.

🇬🇧 Powerful trophy predators, memorable fights against pikes and catfish in extreme conditions. This is the new HUGE XX target. Powerful, maneuverable and resistant rods, but also very balanced and lightweight. Perfectly suitable for bank, float tube and boat fishing whenever a high performance rod is needed. Very interesting are the two vertical fishing rod developed by Xavier Vella, one of the most experienced catfish fishermen in Europe.

AREA GENESI R

Il nuovo inizio del trout area di Herakles. Tramite il restyling della serie Genesi abbiamo tentato di dettare il trend di una specialità dello spinning in continua evoluzione. Blank innovativi più sensibili e leggeri dedicati all'agonista più esigente, manici dalle linee performanti, look elegantissimo. La nuova serie Genesi R mira a ottimizzare l'interazione tra il pescatore e la propria attrezzatura allo scopo di migliorare le prestazioni in gara e in ogni altra situazione. Il look Japan Style è stato superato per adattare la forma alla performance, sempre guardando all'anima generata dalle esigenze dei pescatori italiani ed Europei. I manici sono modellati per essere ergonomici. Il sughero con rifiniture in carbonio, EVA e rubber cork è secondario, solo un dettaglio! La sostanza è ciò che conta, la forma deve essere dettata dalla funzione. Le nuove azioni sono il frutto dello studio dei campi gara italiani ed Europei. Restano i toni di colore cangianti, stavolta con raffinati toni tendenti al rame e al bronzo. La Genesi R è arrivata, ne sarete travolti!

A new start to Herakles' trout fishing range. Through restyling of the Genesi series we have tried to lead the trend of the spin fishing specialty as it constantly evolves. Innovative, light-weight blanks with superior responsiveness, intended for the most demanding anglers, high performance handles and exquisite looks. The new Genesis R series tries to optimise the interaction between the angler and his or her equipment, so as to improve performance in competition and anywhere else. The Japanese Style look has been superseded to adapt form to performance, always faithful to the spirit rooted in the needs of Italian and European anglers. The handles are ergonomically shaped. The cork with carbon finishing, EVA and rubber cork are secondary, merely details! Substance is what counts: form must always follow function. The new actions are the result of field studies in Italian and European competitions. The iridescent hues still remain, this time with refined tones tending towards copper and bronze. The Genesis R has arrived, it will stun you!

AREA ELISIUM

🇮🇹 L'evoluzione del trout area ha richiesto la progettazione di canne specifiche per performance incomparabili. Azioni dotate al tempo stesso di specificità e versatilità necessarie per la competizione. Canne sensibili, affidabili ed eleganti. Il concept Elisium è disponibile in 3 serie:

ELISIUM BOTTOM: canna in due sezioni dedicata alla pesca bottom. La seconda sezione presenta la conicità accentuata tipica delle canne da bottom Japan style ed è dotata di anti-sliding part e disponibile con porta mulinello Caxin o senza. La vetta put-in ultrasensibile è dotata di solid tip.

ELISIUM ONE: le monopezzi per chi non scende a compromessi. Più sensibilità grazie al blank mono pezzo che implementa le già ottime potenzialità di tutta la serie Elisium. Disponibile tubular o con soli tip.

ELISIUM J: canne in due sezioni per il top dell'affidabilità e maneggevolezza;

Tutti i modelli hanno insito lo stile Elisium. Ogni blank della serie è dotato del tipico pitch a spirale risultando sensibile e leggero. A questi livelli la componentistica non è solo un dettaglio e l'uso degli anelli Sea-guide XOHG è la prova che Herakles mira ad efficacia e affidabilità. Innovazione e performance senza limiti fanno di Elisium l'avanguardia del trout area.

🇬🇧 *The evolution of trout area fishing has called for the creation of special rods to reach great performances. Rod actions which can be used for specific techniques and versatile at the same time, as competition needs. These are sensitive, reliable and elegant rods. The Elisium concept is available in three series.*

ELISIUM B: 2 section rods dedicated to the bottom fishing. The second section has the large conicity typical of the Japan Style bottom rods. It has an anti-sliding part. Available with or without Caxin reel seat. The put in first section with solid tip is ultrasensitive.

ELISIUM ONE: one-piece rods for the ones that refuse any compromise. Thanks to the one piece blank they are more sensitive, because it increases the potential of the Elisium series. They are available with tubular or solid tip.

ELISIUM J: two sections rods which are the top for reliability and handling.

All the models have the Elisium style. Every blank of this series has the typical spiral pitch, so they are light and sensitive. At these top levels rods the components are not only details. So, using Sea-guide XOHG guides is the evidence the Herakles want effectiveness and reliability. Innovation and performance with any limit make Elisium the Trout area vanguard.

La Wild Elisium è il risultato di una collaborazione con Matteo Antonelli, **campione italiano di pesca con esca artificiale da riva**. Il blank e il solid tip assicurano sensibilità leggerezza e potenza necessarie per pescare in ogni spot dove si pratica il light spinning, abbiamo sintetizzato questo concetto nella parola Wild. Per materiali, stile e componentistica entra di diritto a far parte della serie Elisium. Da qui il binomio perfetto Wild Elisium un mix di tecnica, eleganza e affidabilità ed efficacia.

Wild Elisium is the result of a collaboration with Matteo Antonelli, **Spinning from the shore Italian Champion**. The blank and the solid tip ensure sensitivity, lightness and power needed to fish in every spot where we practice light spinning; we have encapsulated this concept in the word Wild. Its materials, style and components mean it has the right to be part of the Elisium series.

Hence the perfect combination of Wild Elisium, a mix of technique, elegance and reliability, and effectiveness. Versatile and extremely easy to pick up. The strike is guaranteed!

PRO EVOLUTION

Evolution è la giusta definizione per una serie di canne che ha destato l'interesse di molti pescatori europei e non solo. Infatti, le "Calida Pro Evo" sono state studiate e realizzate con carbonio di ultima generazione e componentistica all'avanguardia. E' il meglio racchiuso in una serie accessibile e facile da usare: sensibilità, potenza e versatilità d'impiego. Le azioni sono state studiate per coprire le tecniche più utilizzate del bass fishing, offrendo comfort e prestazioni di alto livello. Equipaggiate con anelli Sea-guide e nuovi porta mulinelli ergonomici. Rificate con cura e look aggressivo. Hanno tutto ciò che ogni pescatore vorrebbe per vincere una competizione, o per catturare una preda da trofeo!

Evolution is the right definition for a rod series which caught the interest of many European and non-European anglers. In fact the "Calida Pro Evo" have been studied and realized with the last generation carbon and materials. It is a fantastic quality and easy to use rod series offered at an accessible price; sensible, powerful and versatile. The rod actions have been developed to cover the most common techniques of bass fishing, offering comfort and high level performances. They are equipped with Sea Guide rings and the new ergonomic reel seat. These rods are carefully finished with an aggressive look, they will offer all what an angler could desire to win a competition or to catch a trophy fish.

SBAM-B

0,4g | barbless hook size 10 | 5pcs per pack
0,9g | barbless hook size 10 | 5pcs per pack

La pesca "bottom" ossia sul fondo è una tecnica tipica del trout area che permette di catturare le trote che vi stazionano apatiche. Questa specialità è proficua per tutto l'anno e rende al meglio quando le altre non danno risultati. Lo spoon si monta reverse, con l'amo in testa rivolto verso l'alto. La forma ottagonale e la speciale silhouette lo rendono perfetto per cadere sul fondo ed essere letale, in caduta, fermo, o mosso a balzelli. Sbam-B è l'evoluzione di questa strategia secondo Herakles. Cattura anche lontano dal fondo, ma non ditelo a nessuno!

Bottom fishing is a typical trout area technique that allows you to catch trout in one spot. This specialty is a winner throughout the year and offers you the best option when other methods offer no results. The spoon is mounted reverse, with the hook at the top pointing upwards. The octagonal shape and the special silhouette make it perfect to fall to the bottom and be deadly while falling, still, or roughly moved. Sbam-B is the evolution of this strategy according to Herakles. It also catches away from the bottom, but do not tell anyone!

designed by
**ALESSIO
CACIAGLI**

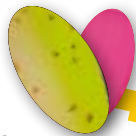

🇮🇹 **Ondulante corto e largo con estremità appuntite. Ottimo in gara, sia per la partenza che per le trote apatiche delle fasi successive. Possiede un movimento accentuato che lo rende catturante, sia in caduta, che nel recupero. Pesante e compatto permette di fare lanci lunghi. La misura 1,3g è ottima per gli strati superiori e intermedi dell'acqua, mentre la 2,3 è stata pensata per la pesca bottom e negli strati inferiori in genere. Dotato di amo singolo senza ardiglione che ormai è praticamente obbligatorio nei circuiti del Trout Area e in molti dei laghi e dei torrenti a regolamento specifico.**

🇬🇧 **Short and wide spoon with sharpened ends. It is excellent during competitions, both for the beginning and for the apathetic trout during the rest of the match. It has an accentuated movement that makes it catchy, both in the fall and in the retrieving. It's heavy and compact so it allows long casts. The 1.3g size is excellent for the upper and middle layers of water, while the 2.3 is designed for "bottom fishing" and for the lower layers in general. Equipped with single barbless hook, that is now a must in the Trout Area tournament and in many lakes.**

ZERO 6

0,6g | barbless hook size 10
5pcs per pack

Artificiale ultralight necessario per catturare le trote apatiche che "ci prendono in giro" stazionando nei pressi della sponda. Nato per il lancio ad una mano e la pesca in superficie è ottimo per le fasi finali della competizione. Infatti, è la soluzione quando vediamo il pesce, ma non riusciamo a prenderlo con niente...

An Ultralight lure ideal to capture apathetic trouts. Designed for the "one hand cast" and for "topwater fishing", it is great for the final stages of competitions.

LEAF

0,9g | barbless hook size 8
5pcs per pack

Un artificiale light a forma di rombo con punta rialzata. Nonostante il peso contenuto si lancia agevolmente. È dotato di un nuoto stretto e adescante. Fa veramente la differenza poiché resta in pesca molto a lungo. È stato pensato per condizioni in cui le trote sono difficili e risulta veramente letale su pesci apatici.

It's a very light rhomboid lure with the front part turned up. Despite its low weight it is easy to be casted. Its way of swimming makes it very catchy. It really makes the difference because it can stay in the strike zone for a long time. It was thought for conditions where trout are diffident.

SPIKE

1,0g | barbless hook size 8
5pcs per pack

 Ondulante adatto per la pesca in superficie. Muove perfettamente durante il recupero, ma rende al meglio se trattenuto durante l'affondamento. Viene rifinito con parte superiore martellata e parte inferiore liscia per amplificare le vibrazioni oltre al catturante effetto visivo. Ottimo per trote e salmerini. Particolarmente indicato per la competizione.

 A spoon lure developed for surface fishing. Perfect swimming action during the retrieve but will excel if hold while sinking producing a fluttering action. Features an upper pounded body and a flat lower body to amplify the vibrations produced and enhance the visual effect. Perfect for trout and brook trout. Particularly suited for competition fishing.

RACE

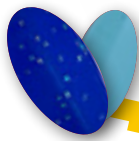

1,5g | barbless hook size 6
5pcs per pack

Un vero portento, grazie alla forma e alle misure studiate per rendere facile la trattenuta e il recupero, ma anche molto aerodinamica per scagliarlo a distanze ragguardevoli nonostante il peso contenuto. Un ondulante che è frutto della collaborazione con i pescatori specialisti di settore. Race è stato lanciato negli spot più vari e in ogni condizione con risultati eccellenti in termini di catture in ogni strato d'acqua. Siamo sicuri di una cosa, Race è una certezza!

A real wonder, thanks to its shape and the sizes specifically studied for both the holding action and the retrieve but also highly aerodynamic to be cast at long distance despite its low weight. A spoon developed in cooperation with the more experienced specialist fishermen. The Race spoon has been used in many different spots and different fishing conditions obtaining excellent results in any kind of waters. Race stands for certainty!

KEEPER J

0,9g | hook size 8 | 5pcs per pack
2g | hook size 6 | 5pcs per pack

Il trout area by Herakles nasce con il KEEPER TROUT per questo motivo non poteva mancare una special edition. Due grammature che coprono sia la pesca di velocità con il 2,0g, sia la pesca con trote apatiche con la versione 0,9g. I colori sono stati studiati per catturare con qualsiasi condizione meteo, o di colore dell'acqua. Keeper J farà parte di quegli spoon che non possono mancare a chi pratica questa disciplina.

Trout area by Herakles began with the KEEPER TROUT, so we just had to make a special edition. Two different weights cover both faster fishing with the 2.0g, and also fishing for difficult to catch trout with the 0.9g version. The colours have been developed for catching in all weather conditions, or in any colour water. Keeper J is bound to become an essential spoon for all those who practice this sport.

K1

1,8g | hook size 6
Spes per pack

🇮🇹 Dal nome si percepisce qualcosa di grande ed invece ci troviamo davanti ad uno spoon compatto e bilanciato. Nonostante il suo peso contenuto, riusciamo a lanciarlo a distanze notevoli. Il suo nuoto regolare e la possibilità di fare lanci lunghi lo rendono l'arma vincente quando le trote sono distanti e non ne vogliono sapere di spoon voluminosi.

🇬🇧 The name gives the impression of something big, but this is actually a compact, well balanced spoon. Despite its low weight, it can be cast considerable distances. Its regular swimming action and long casting capability make it your trump card when the trout are keeping their distance and want nothing to do with larger spoons.

NAIL

2,0g | barbless hook size 6
5pcs per pack

Ondulante dalla forma a unghia, corto e largo. Possiede un movimento accentuato sia in fase di recupero sia in caduta. La forma compatta ed il suo peso lo rendono perfetto per lanci lunghi, ottimo nei recuperi lenti per sondare le profondità intermedie, o le strutture presenti sul fondale. Dotato di amo singolo senza ardiglione che ormai è praticamente obbligatorio nei circuiti del Trout Area e in molti dei laghi e dei torrenti a regolamento specifico.

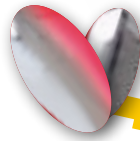

This nail shaped short and wide spoon performs an accentuated swimming action during both the retrieve and the fall. The compact shape and its specific weight make it ideal for long casting. It's perfect for slow retrieves and to explore the middle and the bottom areas. It's equipped with a single barbless hook which is by now necessary in the Trout Areas competitions and in most of lakes and streams with specific.

Forma ad aquilone, parte terminale bombata, profilo ondulato e spessore maggiorato. Doppia finitura: sulla parte superiore martellata in coda e liscia in punta e viceversa nella parte inferiore. Un ondulato dall'estrema lanciabilità che cattura in affondamento, in fase di recupero e in trattenuta. Rende al meglio nel recupero sul fondo. Grazie al rapporto peso/volume regge anche recuperi sostenuti. Disponibile da 0,7g fino a 4,6g offre molte opzioni per risolvere le fasi della gara dove i pesci sono difficili e si rende necessaria una svolta. È divenuto uno dei cavalli di battaglia di Herakles.

A kite shape with an end part that is rounded, and a wavy and thicker profile. Double finish: on the top the tail is hammered and the tail is smooth, whereas the bottom is the opposite. A spoon with extreme casting power that catches while sinking, in the retrieval phase and in hold. It offers you the best when retrieving from the bottom. Thanks to the weight/volume ratio it also supports sustained retrieves. Available from 0.7g up to 4.6g, it offers many options to handle the times during a competition when the fish are difficult and a breakthrough is needed. It has become one of Herakles' workhorses.

KASUMI

2,2g | 2,8g | hook size 6
5pcs per pack

designed by
FM & AC

FR Franco Mancini e Alessio Caciagli, hanno dato vita al Kasumi. Forma particolare larga in testa e stretta in coda, ma nonostante questo molto bilanciata e performante al lancio. Uno spoon ottimo nelle fasi di attività con recupero sostenuto o con recupero variabile intervallato da piccole jerkate. Altrettanto catturante in affondamento o nel recupero lento con stop&go sul fondo. Uno spoon versatile per ogni esigenza di pesca e competizione.

FR Franco Mancini and Alessio Caciagli together have come up with the Kasumi. Despite its unusual shape, large at the head and slim at the tail, it is well-balanced and gives a high-performance cast. An excellent spoon in the active phases both with steady retrieval or with a jerk and pause retrieval. It is just as effective in either the sinking and in slow retrieval or with stop and go on the bottom. A versatile spoon for your every fishing and competitive need.

HIVE

2,4g | 3,0g | barbless hook size 6
5pcs per pack

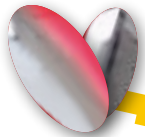

Il profilo leggermente ondulato e la forma allungata lo rendono un artificiale versatile, ma principalmente adatto per la pesca in superficie e su pesci sospesi. Viene rifinito con parte superiore martellata e parte inferiore liscia per amplificare le vibrazioni oltre al catturante effetto visivo. Rende al meglio se trattenuto durante l'affondamento, oppure con recuperi lenti. Un'esca da lancio medio lungo che risolverà molte giornate di pesca.

The slightly undulated and en-longed profile makes it a versatile lure, but mainly indicated for surface fishing on suspended fish. Features an upper pounded body and a flat lower body to amplify the vibrations produced and enhance the visual effect. Will excels if hold during the sinking and on slow retrieves. A medium distance casting lure that will solve many difficult situations.

LOSKO

2,5g | barbless hook size 6
5pcs per pack

La serie Losko con la particolare forma a punta di lancia è ottima, sia per il Trout Area, che per tutte le pesche rivolte ai predatori smalzati. Si tratta di un ondulante da competizione, si lancia lontano, ha un ottimo movimento durante il recupero, in caduta e in trattenuta. Questo è il risultato della ricerca sul campo nelle più differenti condizioni, un'esca che cattura le trote in piena attività, ma anche quelle apatiche... Tutte le misure sono dotate di amo singolo senza ardiglione, che ormai è praticamente obbligatorio nei circuiti del Trout Area e nella maggior parte dei laghi e dei torrenti con pesca a regolamento specifico. L'efficacia del Losko è una certezza, sia in termini di quantità, che termini di qualità delle catture.

The Losko series thanks to its spearhead shape is ideal for both the Trout Area and for all high selective predators fishing. It's a competition spoon. It's a long casting lure. Produce an excellent movement during retrieve, the fall and the hold up as well. This is the result of a field research. I was tested in different fishing conditions. This lure will catch the active trout as well as the apathetic ones. All the sizes are equipped with a single barbless hook which is by now necessary in the Trout Area's competitions and in most of the lakes and streams with specific fishing regulations. Losko's efficiency is certain in both terms of quality and quantity of catches.

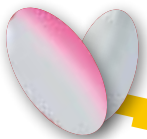

LDS FAT

2,5g | barbless hook size 6
5pcs per pack

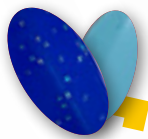

🇮🇹 Ottimo per lanci lunghi risulta letale quando si deve sondare molta acqua. Utilissimo nelle fasi iniziali della gara, con pesce attivo. Si può utilizzare in tutti gli strati d'acqua, sia con recuperi veloci, che lenti. Un'esca versatile e catturante.

🇬🇧 Great for long casts and it is lethal when you have to scan a lot of water. It's very useful in the initial stages of competitions when fish is active. It can be used in all layers of water, both with quick or slow retrieving. It's a versatile and really effective lure.

LDS SLIM

2,6g | barbless hook size 6
5pcs per pack

La serie LDS è molto apprezzata dagli specialisti di settore, per questo motivo abbiamo disegnato la versione SLIM. La forma stretta è lunga lo rendono molto performante nel lancio. Il recupero regolare e la jerkata sono le armi vincenti di questo spoon. Altra prerogativa molto importante dello slim è la versatilità in pesca, infatti mantiene il suo movimento frenetico, sia con recupero a canna alta, sia con canna bassa.

The LDS series is very popular with specialists in the sector, and so we have developed this SLIM version. Its long slim shape makes it high-performance when casting. Regular retrieval and the jerk are the secret weapons of this spoon. Another important feature of the slim version is its versatility in the strike zone, as it maintains its frenetic movement, whether retrieval is with either a high or low rod tip.

LDS

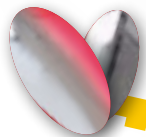

3,6g | barbless hook size 6
5pcs per pack

🇮🇹 Long Distance Spoon, da qui l'acronimo LDS. Un'ondulante dedicato alla pesca a lunga distanza. Forma allungata e aerodinamica, peso importante lo rendono semplicissimo da lanciare. Il suo movimento eccezionale in caduta, trattenuta e recupero, gli dona versatilità. Quando le trote sono lontane e apatiche risulterà l'insidia vincente. Nato per dare la possibilità di pescare a Trout area anche in laghi di dimensioni maggiori, è un'esca che ha fatto la differenza in termini di catture nei momenti in cui le trote sembrano essere sparite.

🇬🇧 Long distance spoon, here comes the acronym LDS. A long distance dedicated spoon. The elongated and aerodynamic shape and the heavy weight will make it simple to cast. Fantastic movement during the sinking, holding and retrieving, very versatile. When trout will be far from the bank and apatic it will be the winning lure. Born to fish the big waters in the trout Area technique

VENTO LD

3,5g | barbless hook size 6
5pcs per pack

Il peso di 3,5g e la forma estremamente aerodinamica lo rendono un proiettile. Lanciare ovviamente non basta, l'esca deve avere un nuoto. Quindi sono stati studiati la distribuzione del peso e uno step nella parte inferiore per donare un'anima al metallo. Farà la differenza quando sarete costretti a pescare controvento, o quando dovrete raggiungere spot lontani e riuscire a pescare in superficie. Il materiale con cui è stato realizzato, lo rende pesante, ma il risultato è comunque un affondamento molto lento. La pesca a distanza in superficie non è più un problema con Vento LD.

Its 3,5grams weight and the extremely aerodynamic shape will make it fly like a bullet. Casting will not be enough, the spoon must also feature its own action. The weight distribution of the lure has been studied and a step in the lower part to give a better swimming action. This lure will make the difference when casting against the wind or when fishing the farthest spots close to the surface. The special material the spoon is made of will make it heavy but in the same time will make it sink slowly. Thanks to the Vento LD shallow water long distance fishing is not a problem anymore.

CUSTOMIZING THE SPINNER

CLEVER SPIN

1.5g | barbless hook size 6
5pcs per pack

Herakles ha atteso anni prima di introdurre un rotante sul mercato. Volevamo essere diversi, dando qualcosa in più. Il Clever è una rivisitazione intelligente dell'esca principe dello spinning. Abbiamo aggiunto una girella nella parte anteriore per evitare i grovigli di filo durante l'uso, abbiamo studiato le dimensioni di paletta e asse di rotazione per avere frequenza di rotazione e assetto impeccabile, ma non ci bastava. Notando che ognuno di noi aveva esigenze diverse sul peso, che l'artificiale avrebbe dovuto avere, è nata l'intuizione: uno spinner a peso variabile. Nasce pronto per essere usato in piccoli torrenti e acque bassa, ma abbiamo lasciato lo spazio per inserire un piombo spaccato, del filo di piombo o della pasta di tungsteno. Il nostro scopo è offrire la possibilità di customizzare il peso dell'esca per rispondere alle vostre esigenze dettate dai vari spot. Basterà un piombo e una stretta di pinza!

Herakles took years before introducing a spinner lure on the market. We wanted to be different, offering something more. The Clever is a smart revisitation of the most popular spin fishing lure. We added a swivel in the front part to avoid tangles, we carefully studied the blade size and the rotation axis to achieve a perfect rotation frequency and balance, but this was not enough. We noticed that each of us had different lure weight needs, we had an idea, a variable weight spinner. Straight out of the box it will be perfect to fish small creeks and shallow water, we left some space on the shaft to add a split shot, some lead wire or tungsten paste. Our goal is to offer the chance of totally customize the lure weight and satisfy your needs in the different fishing spots. A split shot and pliers will do the trick!

KEEPER TROUT

2,5g | 4,0g | 5,0g
5pcs per pack

🇮🇹 Gli ondulanti hanno fatto la storia della pesca a spinning, Herakles non poteva fare a meno di studiare degli artificiali metallici con caratteristiche innovative. Il Keeper Trout in tre misure (2,5g, 4g e 5g) dal profilo a pera e ancoretta di ottima qualità. Ogni misura è ottenuta con fusioni metalliche appositamente scelte per valorizzare al massimo la forma in termini di gittata di lancio e azione di nuoto, sia in fase di recupero, che in fase di caduta.

🇬🇧 The spoons have made the history of spinning, so certainly Herakles could not but accept the challenge of studying some metal lures with innovative features. So we developed Keeper Trout in three sizes (2,5g, 4g and 5g). Keeper Trout is pear shaped and with an excellent quality treble hook. All the sizes are obtained with metal mixes specially chosen to maximize the shape in terms of long range casting and swimming action in the recovery phase as well as in the fall phase.

SPOONS

CRUN ABS

5 pcs per pack

Il needle-fish (190mm; 37g) nato dall'esperienza del team Herakles Saltwater. Corpo in ABS e armatura passante sono solo 2 caratteristiche secondarie. L'assetto di quest'esca permette di usarla con recuperi veloci come skipping lure simulando un'aguglia che fugge, come WTD con recuperi uniformi e stop&go, ma anche con movimento WTD lentissimo quasi sul posto. Un'esca facile da usare e che vi permetterà davvero di catturare interpretando al meglio ogni situazione della pesca Saltwater.

The needle-fish (190mm; 37g) hatched from the experience of the Herakles Saltwater team. Its ABS body and inner reinforcement are just 2 of its additional features. The balance of this lure allows you to use it with fast retrieval as in skipping lure simulating a flying garfish, or in WTD with uniform and stop & go retrieval, but also with very slow WTD movement almost on the spot. A lure that is easy to use and that will really allow you to make the catch by interpreting every situation of Saltwater fishing.

LONG JOHN 187

5 pcs per pack

Disegnato da Boledi David e Bacchetti Alessandro. Il long jerk estremo. 187mm di lunghezza, disponibile nelle versioni floating e sinking. Corpo in ABS con armature passante. Posizione variabile dei pesi per lanci più lunghi. Bilanciamento studiato dal Team Herakles Saltwater per offrire volo, nuoto e risposta ottimale alla jerkata. Infatti, la paletta seppur pensata per un jerk, dona anche un "nuoto" durante il recupero. Colori sono stati pensati e ottimizzati per i predatori dei nostri mari. Un progetto esclusivo di Herakles per rispondere alle necessità dei pescatori più esigenti.

"Extreme" long jerk. Boledi e Alessandro Bacchetti design. 185mm long, available both in floating and sinking versions. ABS body with metal wire inner structure. Variable weight position for longer throws. Weight balancing developed by the Herakles Saltwater Team to offer long cast, swim and optimal response to jerking action. Its lip was though for a jerkbaitbut it confers to the lure a "swimming action" also during retrieving. Colors were designed and optimized for the predators of our seas. An exclusive project of Herakles to meet the needs of the most exigent anglers.

SQUIDDER

5 pcs per pack

Artificiale in 3 misure (90mm; 110mm e 130mm) dedicato alla pesca dei calamari a traina con affondatore, o piombo guardiano, ma anche a scarroccio con montatura a bandiera o lanciato a spinning.

L'assetto combinato alla paletta dona un movimento dotato di wobbling e rolling che risulta molto adescante e consente di essere versatile e catturante in ogni situazione.

La color chart annovera colori naturali, ma anche di contrasto. Molti di essi sono arricchiti con olografie all'interno del corpo e colorazioni glow. Si tratta di una gamma studiata dai nostri esperti per essere catturante nelle più differenti situazioni.

Ogni modello monta doppie corone di ami di alta qualità, arricchite da una rifinitura glow nella parte posteriore.

L'assetto del corpo ottimizzato per ognuna delle misure disponibili rende al meglio trainato tra 1,4 nodi a 2,8 nodi. Inoltre, mantiene il movimento anche durante le accelerate, che anzi produrranno un aumento del potenziale adescante.

Si tratta di artificiali con caratteristiche tecniche che saranno gradite ai pescatori esperti e semplicità d'utilizzo che regalerà belle catture anche ai neofiti.

Artificial in 3 sizes (90 mm, 110 mm and 130 mm) designed for squid fishing by hauling with downrigger, or lead guard, but also with leeway when surfcasting, or by spin casting.

The set-up with the shank creates a wobbling and rolling movement that has a major priming effect, allows versatility and guarantees a catch under all circumstances.

The colour chart includes natural, but also contrasting colours. Many of these are embellished with holographic details on the inside and glowing colours. It is a colour range designed by our experts to be captivating in the most diverse situations.

Every model carries double crowns of high-quality hooks, embellished by a glowing finish on the back side.

The set-up of the body, optimised for all available sizes, renders best when dragged at a speed between 1.4 and 2.8 knots. In addition, it also maintains its movement when accelerating, which in fact increases the priming potential.

Their technical characteristic will be appreciated by expert anglers, while the ease of use will also ensure great catches for beginners.

LIP 95S

5 pcs per pack

Questo minnow slow sinking è facile, sia da usare, sia da lanciare. Si trasforma in un'arma letale appena tocca l'acqua. Grazie alla sua particolare paletta ha un nuoto molto adescante durante il recupero lineare, ma se viene jerkato produce sbandate larghe diverse da qualsiasi altro jerkbait.

The Lip is a slow sinking minnow easy to use and cast, which turns into a lethal weapon just touching the water. This lure due to its unique lip has a very enticing movement during liner retrieving, but if jerked the Lip produces large skidding, different from any other jerkbait.

YUME 50S

5pcs per pack

Questo jerkbait flat side di 5cm è ottimo per la pesca in acque fluviali con correnti anche sostenute, ma anche per raggiungere velocemente il fondo in acque ferme. La forma piatta sui lati e l'assetto lo rendono paragonabile ad esche specifiche da torrente che spesso sono appannaggio dei soli autocostruttori. Il nuoto regolare e l'azione sulla jerkata lo rendono ottimo per la trota cui è dedicato, ma anche per molti predatori delle nostre acque dolci e salate.

This flat-side jerkbait measuring 5 cm is ideal for fishing in running water. Its flat shape on the sides and its design render it comparable to bait specific for currents, which often are the prerogative of DIY exclusively. The regular float and action upon jerking make it ideal for the trout it is designed for, but also for many of the predators in our fresh and salt waters.

ALECA SP

5 pcs per pack

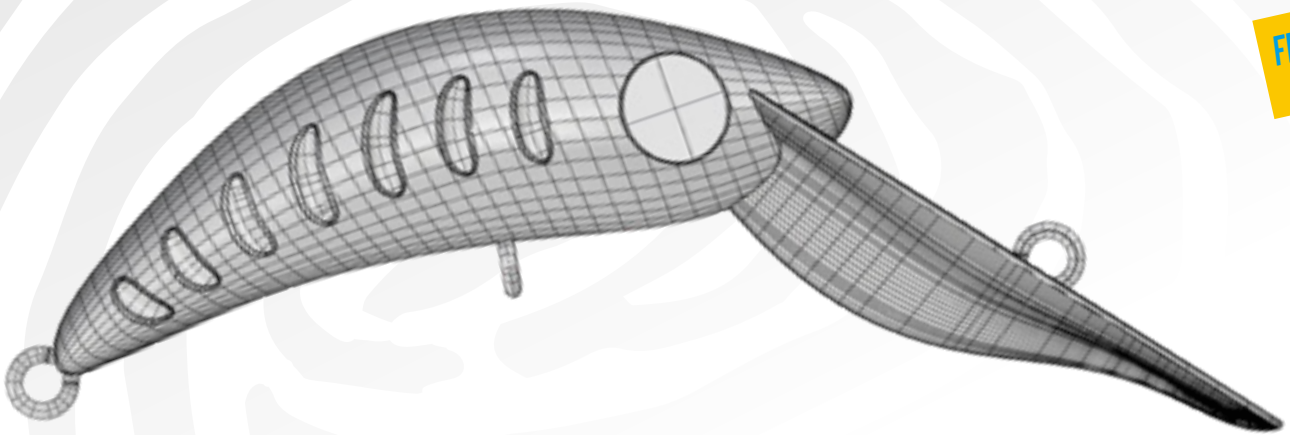

Il medium runner crankbait ideato da Alessio Caciagli (Ale Ca). Il corpo affusolato e la paletta di dimensioni generose sono un binomio perfetto per pescare a metà della colonna d'acqua, o sbattendo sul fondo in laghi poco profondi. L'azione permette di restare sospesi a profondità variabile in accordo alla temperatura dell'acqua. Ideale per trote apatiche e per le fasi di stallo della competizione. Ottimo anche su molti predatori tipici del light spinning.

The medium runner crankbait designed by Alessio Caciagli (Ale Ca). The tapered body and the generously sized shank are the perfect combination to fish halfway the water column or on the bottom of shallower lakes. The action makes it possible to maintain suspension at varying depths, based on the water temperature. Ideal for apathetic trout and for the deadlock stages of competition. Also great for many typical predators in light spinning.

MOTH 28 F

5 pcs per pack

🇮🇹 Dal Moth nasce il Moth28F un piccolo crankbait che come il suo predecessore è dedicato per il Trout Area. Permette di pescare a galla o nei primi 20-30cm. Possiede un corpo molto affusolato e simile al Moth, ma di dimensioni più contenute. La una paletta larga permette di muovere al primo accenno di recupero lo rende ottimo per il "dead slow cranking". Ottimo per tutti i frangenti in cui la trota è in caccia, o apatica in superficie. Ottimo anche su molti predatori tipici del light spinning.

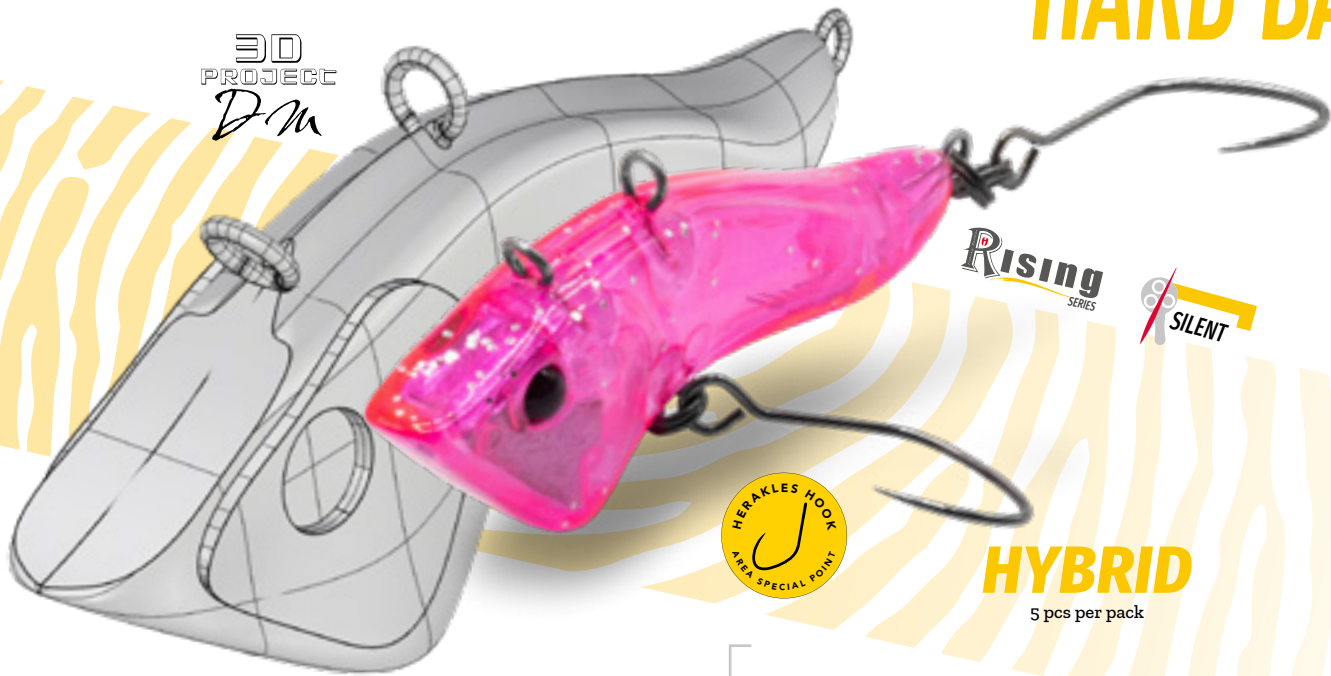

🇬🇧 Inspired by the Moth, the Moth28F is a small crankbait designed for trout fishing, just like its predecessor. It allows surface fishing or in the first 20 - 30 cm. It has a perfectly streamlined body, similar to a moth, but of smaller size. The large shank allows movement at the first hint of recovery, rendering it ideal for "dead slow cranking". Great for all situations where the trout is hunting or apathetic at the surface. Also great for many typical predators in light spinning.

HYBRID

5 pcs per pack

MODEL	Lipless CrankVIB
LENGHT	42mm
WEIGHT	3,8g
TYPE	Sinking
TECHNIQUE	Lipless CrankVIB

designed by
DM

Un ibrido, l'evoluzione del lipless crankbait e della vibration lure per il trout area e il light spinning. Ottimo, sia per le pesche statiche come il bottom fishing, sia per essere recuperato in maniera regolare o stop&go. L'esca è catturante già dalla fase di caduta. Una volta sul fondo resta stand up grazie al peso posizionato in testa. La coda resta rivolta verso l'alto aumentando la percentuale di cattura anche su fondali irregolari o fangosi. Nei momenti di attività delle trote posizionate sul fondo è micidiale, ma per insidiare le trote apatiche sarà sbalorditivo.

It is a hybrid, the evolution of the bottom lure, that can be used as lipless crankbait, thanks to its shape, its 2 hooks, its 2 rings on the back. The ring that is closer to the head is used in static angling, such as bottom fishing and dragging, the other one, in a higher position, for the lipless crankbait with regular retrievals, stop&go. The bait is captivating from the moment it is dropped. Once at the bottom, it stands up thanks to the weight located in the top. The tail remains pointing upwards, increasing the catch rate on irregular or as well as on muddy beds. When the trout is active at the bottom it is deadly, but it will be astounding to trick apathetic trout. It is an excellent lure for trout fishing and more generally light spinning.

SERIES

MOTH

5 pcs per pack

Il crank da trout area disponibile in due versioni. Quella floating per insidiare le trote apatiche e con il "very slow cranking" in superficie, o sondare acque con recuperi più sostenuti. Quella sinking per scendere a cercare le trote attive e meno attive nella batimetria dove stazionano, ottimo sia in recupero che in affondamento. Gamma colori pensati per le due differenti azioni e ami senza ardiglione misura 8# adatti alla competizione e al C&R.

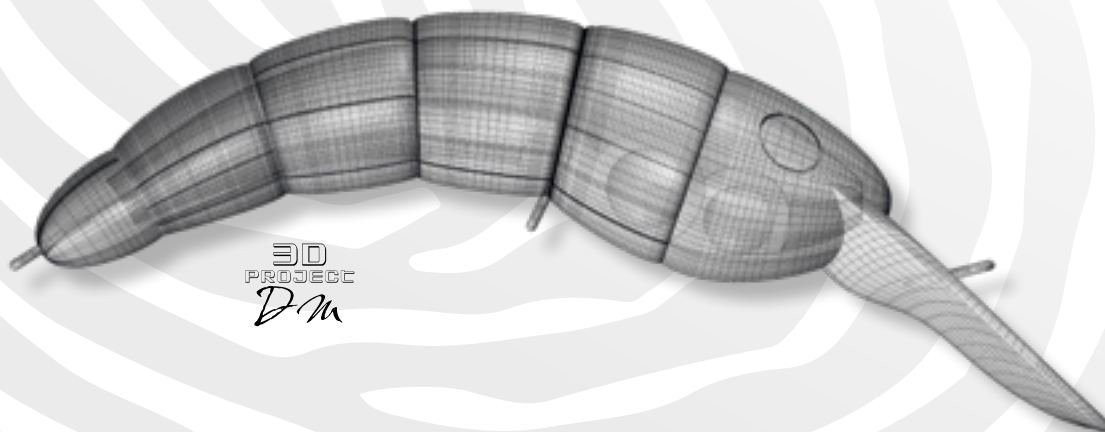

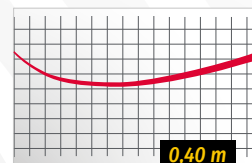

TROUT area crankbait available in two versions. Floating version: to catch the apathetic trouts with the "very slow cranking" action on the surface, or to fish the waters with faster retrieves. Sinking version to go down looking for the active and less active trouts in the bathymetric where they stand. Sinking version is great in both retrieving and falling down during the stop. Color chart was designed differently for the two different actions. The barbless hooks size 8 # are really suitable for the competition and for C&R.

TESER

5 pcs per pack

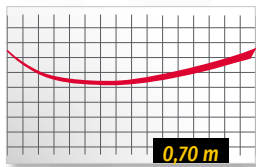

Il nuovo jerkbait da trout area disponibile in azioni floating e slow sinking. Ottimo per insidiare le trote attive, ma soprattutto quelle apatiche. L'azione floating rende bene con recuperi regolari, o intervallati da jerkate. La versione slow sinking altrettanto, ma ancor di più in caduta, in trattenuta. Un'esca che permetterà di ottimizzare l'azione di pesca in tutte le fasi della competizione, soprattutto quelle in cui il pesce mangia di meno.

The new trout fishing jerkbait is available for floating and slow sinking action. Excellent to trick active trout, but especially for apathetic ones. The floating action works well with regular hauling in, or with interval jerking. The slow sinking version as well, but even more when held back during dropping. It is a bait that will allow you to optimise the fishing action in all stages of competition, especially those where the fish eat less.

FURY 68SP

5 pcs per pack

🇮🇹 Fury 68sp è un jerkbait suspending che vi permetterà di pescare lenti quando il pesce apatico lo richiede e di usare tecniche più veloci in presenza di pesce attivo. L'azione suspending permetterà dei lunghi stop durante i quali la coda si abbasserà leggermente mettendo la testa in posizione più alta. Tale specificità è possibile grazie alla forma del corpo e all'assetto. Questo movimento praticamente automatico garantirà strike nelle fasi di stop e durante le ripartenze. Il Fury risulta catturante per spigole, bass, persici reali, cavedani e per tutti i predatori più smaliziati. Colori curati e catturanti saranno il plus di un'esca fantastica.

🇬🇧 Fury 68sp is a suspending jerkbait that will allow you to fish slowly when lazy fish call for it and to use faster techniques when faced with more active fish. The suspending action will allow long stops during which the tail will lower slightly, putting the head in a higher position. This feature is possible thanks to the shape of the body and the balance. This practically automatic movement will guarantee strike during the stop phase and during the restart. Fury is great for attracting sea bass, bass, perch, chub and the most savvy of predators. Well-chosen and alluring colours are the pluses of this fantastic lure.

STUNT 90SP

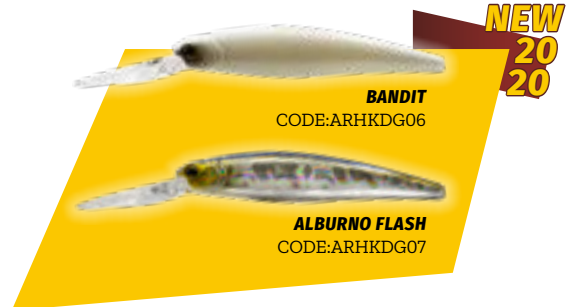

5 pcs per pack

È un jerk suspending a paletta lunga, studiato per le acque dove è necessario che il nostro artificiale lavori a profondità intermedie. La possibilità di sospendere il recupero con l'esca che resta ferma è una caratteristica di tutte le esche suspending, ma lo STUNT90SP ha un assetto ideato per permettergli ripartenze al minimo accenno di recupero o jerkata, caratteristica che lo rende veramente catturante.

It's a suspending long lipped Jerkbait, designed to fish in the waters where it is necessary that our lure works at intermediate depths. The possibility of stopping the retrieve with the suspending bait is a feature of all suspending lures, but the STUNT90SP has a structure designed to allow restarts at the first sign of retrieving or jerking, which makes it truly capturing.

Il lipless crankbait è un'esca che fa la differenza sia in condizioni di pesca statica vicino al fondo che per cercare i pesci con lanci e recuperi ricchi di oscillazioni accentuate. La Silent si presta a risolvere le situazioni di apatia e per pescare agli ambienti ad alta pressione di pesca in cui i pesci sono più sospettosi. La versione rattle dotata di sfere in vetro produce onde sonore utilissime quando si insidiano i pesci attivi con la pesca di ricerca. Un'esca che si lancia lontano e permette di essere interpretata dal pescatore con recuperi lenti e veloci, uniformi, ritmati o jerkati. Un'esca che possiede tutte le migliori caratteristiche della categoria dei lipless crankbait cui appartiene.

The lipless crankbait is a bait that makes the difference both in static fishing conditions close to the bottom and to find fish with casting and recovery full of accentuated oscillations. The Silent allows you to resolve lethargic situations and to fish high-pressure fishing environments, where the fish are suspicious. The rattle version, equipped with glass spheres, creates sound waves which are helpful for tricking active fish with research fishing. It is a bait that can be cast far and that allows the angler to reel in slow or fast, uniformly, at a rhythm, or by jerking. This bait features all the best characteristics of the lipless crankbait category to which it belongs.

HDD-55 è un Deep crank nato dall'incontro di esperienza e innovazione. Un'esca del tutto silent, capace di scendere fino a 5,5 metri. Abbiamo inserito una palla realizzata in una miscela speciale di tungsteno, che grazie al suo peso specifico combinato alle forme aerodinamiche del corpo ottimizza la gittata del lancio anche nelle condizioni più difficili. La paletta "snagless" limita al massimo i rischi d'incaglio negli ostacoli sommersi. Giusto coronamento di un'esca che farà la differenza in termini di catture tra i 5 ed i 6 metri di profondità.

The HDD-55 is a deep crank which is born from the meeting between experience and innovation. A silent lure able to sink until 5,5 meters. We have inserted a ball made of a special tungsten mixture, that thanks to its specific weight combined to the aerodynamic body's shapes optimize the launching even during the hardest situations. The "snagless" lip prevent the risks of grounding over the submerged hurdles. As a result this lure will make the difference in terms of catches between 5 and 6 meters of deepness.

POP-EY 70R

5 pcs per pack

MODEL	Popper
LENGHT	70mm
WEIGHT	9,5g
TYPE	Floating
TECHNIQUE	Top Water

Popper molto efficace, eccezionale per la pesca a galla ("top water"). E' dotato di una particolare bocca concava che, in fase di recupero, gli fa emettere suoni e spruzzi che richiamano l'attenzione dei predatori in superficie. Grazie al perfetto bilanciamento e sistema "S.B.S." si riesce a lanciare a lunghe distanze, nonostante le piccole dimensioni.

The "Pop-Ey" is a very effective popper, great for top water fishing. It has a particular concave mouth, that during the retrieve, emits sounds and produce air bubbles that attract the attention of predators to the surface. Thanks to the perfect balance and the "S.B.S." System you can make long cast, despite its small size and weight.

WT DOG FAT 75-90

FRESH WATER

5 pcs per pack

SILENT

Il WTD OG FAT è capace di fare la differenza, sia in termini di gittata di lancio in relazione alle dimensioni, sia in quanto a facilità di utilizzo e azione catturante. Il nuoto zigzagante sulla superficie è praticamente la conseguenza del recupero, facilissimo e immediato. Per dare ancor più vitalità a questo nuoto in cui l'artificiale sembra vivo basterà qualche lieve jerkata per far immergere, saltare e sbandare questo artificiale.

WTD OG FAT will make the difference, both in terms of long casting range related to the size, and ease of use and high hooking rate. The zigzagging on the surface will result right on the retrieving, easily and instantly. To give even more life to this swimming in which the artificial have a real lifelike action, just add a few slight jerks, enough to submerge the lure and make it jump and skid on the surface.

CRUBLE

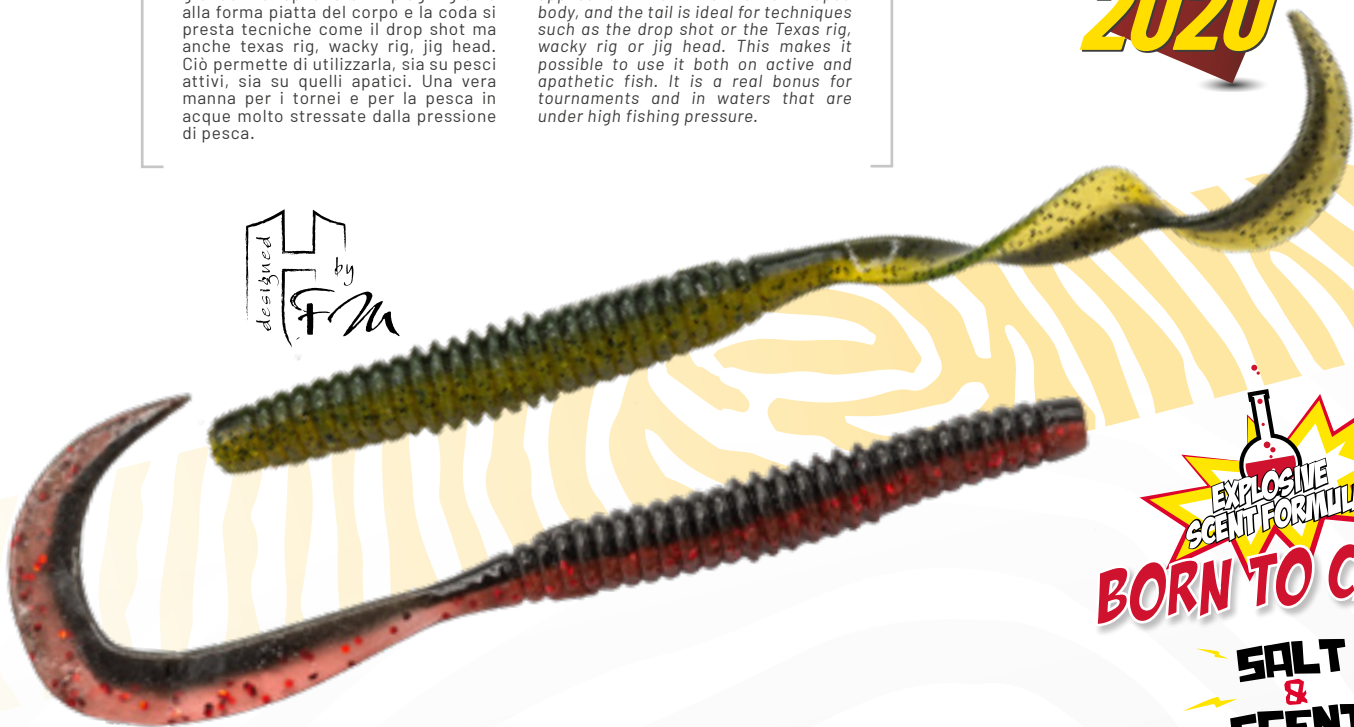

5" - 12,5cm | 8 pcs per bag
5 pcs per pack

Questo worm possiede le caratteristiche versatili e catturanti che gli agonisti cercano per insidiare il bass in luoghi sempre più difficili. Il corpo piatto è molto particolare ed ottimo per molteplici inneschi. La coda a uncino è caratterizzata da un movimento ibrido tra worm e grub che muove al minimo accenno di recupero, o movimento del cimino. Ha una grande molteplicità di impieghi grazie alla forma piatta del corpo e la coda si presta tecniche come il drop shot ma anche texas rig, wacky rig, jig head. Ciò permette di utilizzarla, sia su pesci attivi, sia su quelli apatici. Una vera manna per i tornei e per la pesca in acque molto stressate dalla pressione di pesca.

This worm has all the versatile and captivating characteristics that competitive anglers want to trick bass in ever more difficult places. The flat body is very particular and ideal for multiple priming. The hooked tail is characterised by a hybrid movement, between worm and grub, that moves at the slightest tug or movement of the tip. This bait has a great variety of applications thanks to the flat-shaped body, and the tail is ideal for techniques such as the drop shot or the Texas rig, wacky rig or jig head. This makes it possible to use it both on active and apathetic fish. It is a real bonus for tournaments and in waters that are under high fishing pressure.

BENJO-R

3.6" - 9cm | 7pcs per bag
5pcs per pack

Benjo R è l'evoluzione del già ottimo Benjo Shad. Il corpo è stato ottimizzato per aumentare il movimento, la coda è stata modificata per implementarne il potenziale catturante. Abbiamo aggiunto la parte affusolata della testa per aumentare la versatilità e la quantità di inneschi possibili, come ad esempio: texas rig, drop shot, spiombata. Con un semplice taglio nel punto indicato sotto la testa, l'esca sarà pronta per essere innescata sulle Benjo jig head. La Benjo jointed jig head (con amo offset wide gap snodato) per pescare nelle zone ricche di ostacoli evita gli incaqli e amplifica il movimento dell'esca anche con recuperi lenti. La Benjo straight jig head (con amo fisso a stelo dritto) è più adatta ad acque aperte e recuperi veloci e alla pesca in verticale, permettendo ferrate fulminee. La color chart è stata scelta per coronare un'esca ottima sia per la pesca saltwater, che per quella freshwater.

Benjo R is the evolution of the already excellent Benjo Shad. The body has been optimised to increase movement, the tail has been altered to enhance its appeal. We have added the tapered part of the head to increase the versatility and number of possible techniques, such as texas rig, drop shot and with no weights. With a simple cut at the point indicated under the head, the lure will be ready to be rigged on the Benjo jig head. The Benjo jointed jig head (with unknotted offset wide gap hook) for fishing in areas full of obstacles avoids snagging and amplifies the movement of the lure even with slow retrievals. The Benjo straight jig head (with fixed hook with straight shank) is more suitable for open waters and fast retrieves and vertical fishing, allowing lightning strikes. The colour chart has been chosen to crown an excellent lure for both saltwater and freshwater fishing.

SHAD-OW

3.5"-8,5cm | 10pcs per bag
4.2"-10,5cm | 8pcs per bag

La linea di shad, disegnata da Franco Mancini e Daniele Mari, perfetta per ogni evenienza! Disponibile in 3 misure. Il 3.5", 4.2" sono le due misure regular adatte per ogni utilizzo che potete immaginare per uno shad. Hanno un rollio e una frequenza del nuoto della coda estremamente naturali. La versione 4.2" FAT pur mantenendo un movimento naturale ha un corpo più largo e un peso maggiore. Perciò è particolarmente adatta per i lanci lunghi, lo skipping e la pesca a struttura.

The shad series perfect for every need! Designed by Franco Mancini and Daniele Mari. Available in 3 sizes. 3.5" and 4.2" are the two regular sizes suitable for every use you can imagine for a shad. They have a rolling and a tail swimming frequency that are extremely natural. The 4.2" FAT version while having a natural motion, has a larger body and a heavier weight. It is particularly suitable for long throws, skipping and fishing to structure.

HOOK SET RINGS

LEFTAIL-R

3.5"-8.7cm
8pcs per bag

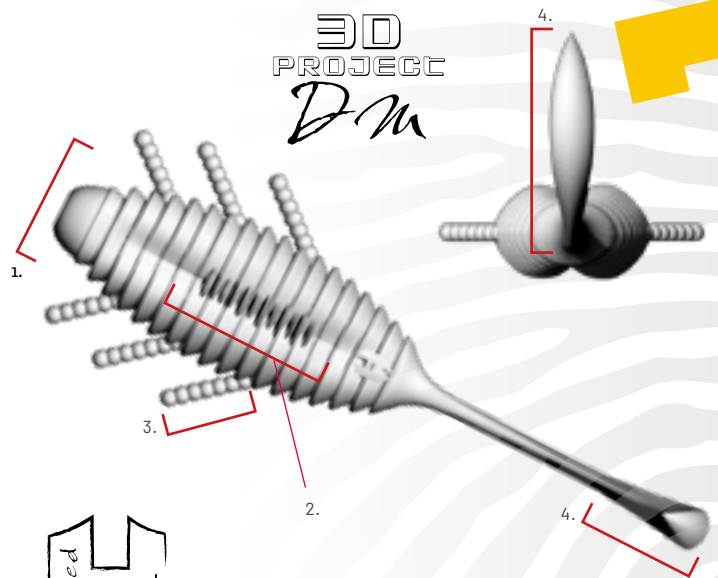

Il nostro obiettivo è puntare al top per andare oltre. La nuova versione del nostro cavallo di battaglia nasce da questo principio. Dopo innumerevoli prove abbiamo confermato la versione R, togliendone i punti deboli:

1. La testa è stata rinforzata ed allargata per permetter una maggiore resistenza all'innesco ed alle ferrate.
2. Abbiamo inserito una serie di lamelle nella parte centrale per rendere il corpo più forte e per avere un punto di aggancio per la punta dell'amo.
3. Le zampette laterali sono formate da una serie di piccole sfere che si animano nelle fasi di caduta e di pesca, emettendo molte vibrazioni.
4. La coda è la vera anima del Leftail-R. È più resistente sulla giuntura col corpo, così da poter essere tranquillamente usata nelle cover più difficili. Inoltre il nuovo design della parte finale rende il movimento frenetico al minimo contatto con l'acqua!!! Nessuno è perfetto, ma il Leftail R raggiunge un'altissima percentuale di affidabilità regalando ai pescatori un divertimento assicurato.

Race to the top and go further. That's our aim! The new Leftail is based on this principle. After countless tests we have created the R version removing all the weak points:

1. The head has been strengthened and enlarged to allow greater resistance to the rigging and to the strike.
2. We have added a lamellar series in the central part in order to make the body stronger and to get a place to hold the hook point.
3. The side legs are made of a series of small balls. They move during falls and fishing time vibrating.
4. The tail is the real soul of the Leftail-R. It's more resistant on the joint with the body, so it can be safely used in the most difficult covers. The tail final part's new design allows a frenetic movement at the first contact with water!!! Nobody is perfect, but Leftail R reaches a really high reliability percentage and it gives a guaranteed fun to the anglers.

LEFTTAIL WORM

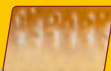

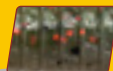

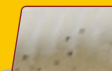

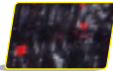

4.8" - 12,2mm
10pcs per bag

🇮🇹 Dal Lefttail, la micidiale esca che potrebbe essere il vero e proprio simbolo di Herakles, parte l'evoluzione targata Born To Catch. Da una creature nasce un worm, da un'idea formidabile nasce una rivoluzione. Disponibile in 2 misure. Resta il concetto della ipercatturante coda a scimitarra, ma viene abbinato ad un corpo, idrodinamico e allungato. Il risultato è un'esca con la frequenza della coda del lefttail e la sinuosità e la lunghezza di un worm. Può essere usata pitching, flipping, down shot, spiombata, come uno shad, sui jig e jig head e con tutti gli inneschi tipici degli worm. Non crediate che il passo per creare il lefttail worm dal lefttail sia stato facile e scontato. Sono state fatte innumerevoli prove frutto di accese discussioni; tutto per dare un prodotto all'altezza del suo predecessore e degli obiettivi che Herakles si pone.

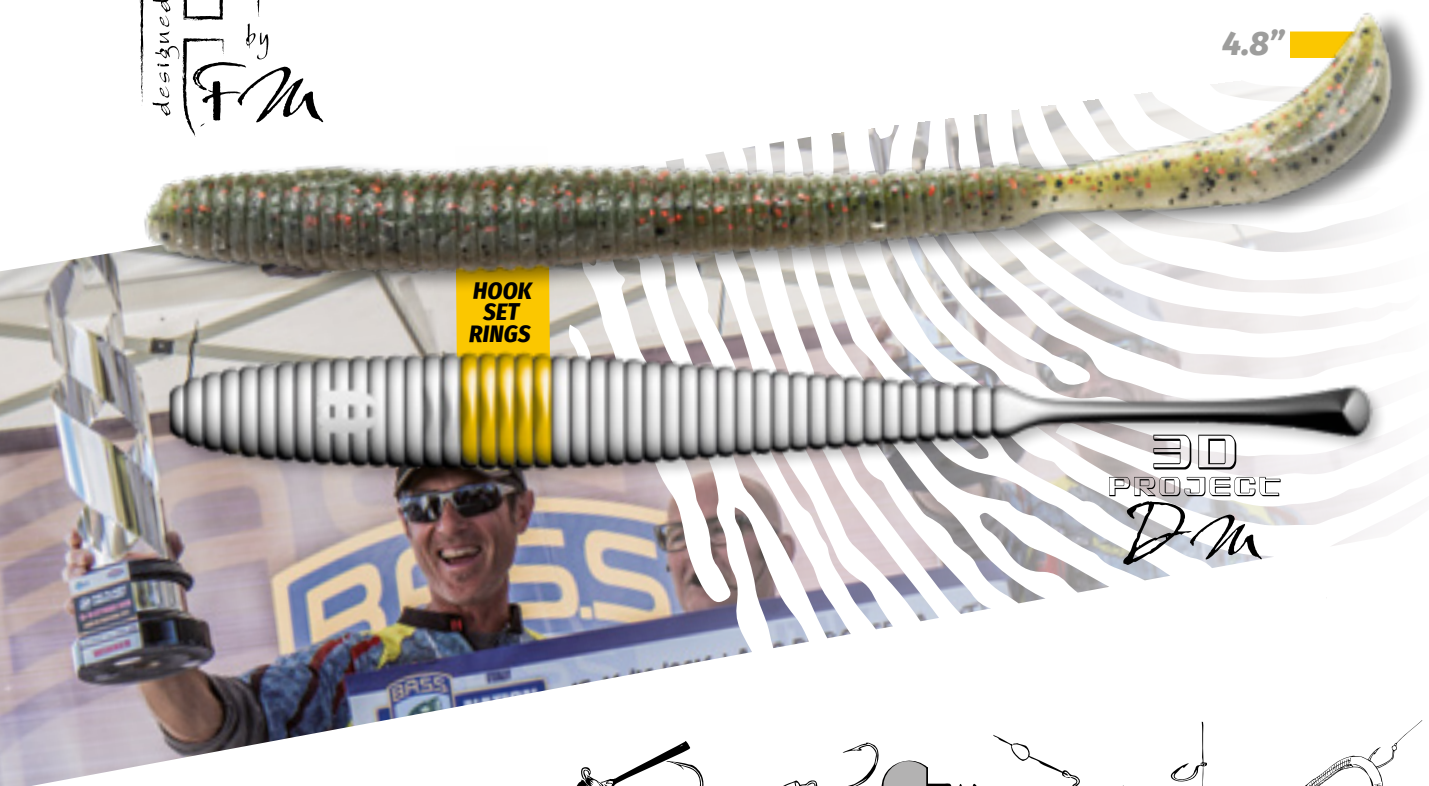

🇬🇧 From the Lefttail the soft bait that could become the real Herakles symbol, the Born to Catch evolution is started. From a creature bait a worm is born, from a formidable idea a revolution is started. Available in two sizes. The super catchy concept of the scimitar shape tail is maintained, but it's joined to a hydrodynamic and elongated body. The result is a soft bait featuring the tail movement frequency of the Lefttail and the sinuosity and the length of a worm. Can be used for pitching, flipping, down shot, weightless, as a shad pattern, jig trailer or on a jig head, or all typical worm baits rigs. To develop a Lefttail Worm version of the Lefttail was not easy, countless tests were made and lots of discussions; all this to develop a bait comparable to its predecessor and to reach the targets Herakles has set.

GRUBY-R

4"-10cm | 12pcs per bag
5pcs per pack

Il Gruby R è un finesse worm dal corpo affusolato e la coda arricciata. Quest'ultima è più larga vicino al corpo per avere un assetto migliore. Il ringrosso nella parte terminale incrementa le vibrazioni. Si tratta di un'esca ottima per black bass, persici reali e predatori d'acqua dolce, ma anche per la spigola e altri predatori marini.

The Gruby R is a finesse worm with a tapered body and a curled tail. The tail is wider near the body for a better balance. The fatter end part increases the vibrations. It is an excellent lure for black bass, perch and fresh water predators, but also for sea bass and other marine predators.

ISPANIC SHAD

3.5"-8,7cm | 12pcs per bag
 4.5"-11,5cm | 9pcs per bag
 5pcs per pack

🇮🇹 **Avere uno stickbait veramente efficace era la nostra priorità. Per soddisfare questa necessità dovevamo ottenere movimenti adescanti in fase di caduta, di recupero e di twiccing. Avere un'esca che permettesse di coprire lunghe gittate era un'esigenza quasi scontata. L'Ispanic Shad si muove rollando e vobblando con il suo corpo dalla sezione triangolare. La coda con appendice a lancia continua a muoversi in maniera sinuosa, sia nel recupero, che in caduta. Con i vari tipi di recupero l'esca può simulare, sia il movimento esplosivo dei pesci inseguiti dal predatore, sia il movimento erratico di un pesce ferito, o ignaro di essere la prossima preda. Il movimento risulta naturale e adescante con inneschi texas spiombato, drop shot, jig head, wacky rig, e split shot. Il peso del corpo facilita lunghe gittate di lancio. Si tratta di un'esca versatile ed estremamente catturante di cui è stata avvertita la necessità pescando nei grandi laghi spagnoli da qui il suo nome, ma che è diventata la chiave di lettura per effettuare belle catture anche nelle acque italiane, sia dolci, che salate.**

🇬🇧 **To introduce an effective stickbait pattern was our priority, to reach this target we decided to develop a soft bait that may be stimulating while diving, retrieving and twitching. To develop a long casting bait was a must. The Ispanic Shad rolls and wobbles a lot thanks to its triangular shape body, the spear-point shape appendix tail move all the time in a sinuous way, while diving and during the retrieve. On different retrieves the bait may simulate the explosive movement of a frightened bait fish under a predator attack, the erratic movement of an injured bait fish or simply not aware of the dangerous predator approaching. The movement of the bait results natural and attractive, perfect on weightless Texas, drop shot, jig head, wacky and split shot rigs. The weight of the body portion of the bait will allow long casts. This is a very versatile bait and extremely productive, a bait that was developed to sort out the need of big Spanish reservoirs fishing, and that's why we named it so, but will be effective anywhere, in both fresh and saltwater.**

R-SNAKE

5.5"-14cm | 10pcs per bag
5pcs per pack

Le tecniche finesse sono spesso figlie dell'agguato con lanci fulminei, pose leggere, movimenti misurati e inneschi studiati. Dall'esperienza nelle acque più stressate e tecniche d'Europa arriva l'esca finesse nata per catturare. Corpo tondeggiante leggermente schiacciato e sottile per avere gittata di lancio, ma anche assetto impeccabile ed effetto trattenuta durante la fase di affondamento. Il nome R (rattle) - snake, serpente a sonagli deriva dalla forma della coda, che ha due sezioni allargate nella parte terminale per aumentare movimento e vibrazioni. Durante i test, nel corso di gare e prove di gare è stato risolutivo montato su jig head, a drop shot, a wacky rig, a split shot, e shaky head. Può essere accorciato di 0.85" (poco più di 2cm) mantenendo la stessa azione, semplicemente tagliando il verme nella prima parte stretta della testa. L'esca presenta una estrema sinuosità abbinata a molta mobilità. Questo grazie alla sua forma che è stata studiata per essere idrodinamica e creare attrito su alcune parti al fine di provocare i movimenti e vibrazioni ritenuti i più adescanti dopo innumerevoli field test.

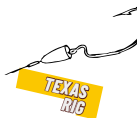

Finesse techniques often means lightning fast casts, light presentations, gentle movements and proper rigs. From the experience of the most heavily fished and technical waters in Europe comes this Born to Catch finesse bait. A slightly flat round narrow body for a long casting range, but also a perfect balance to be hold during the sinking. The name R (Rattle) - Snake comes from the shape of the last 2 enlarged sections of the tail. They enhance the movement and the vibrations. During the tests, competitions and training sessions, it was decisive rigged on a jig head, drop shot, wacky, split shot and shaky head rigs. Can be cut and shortened of about 0.85" (about 2 cms) and it will maintain the same action, simply cutting the worm at the first head narrow segmentation. The soft bait feature a sinuous movement, this thanks to its specific hydrodynamic shape and designed to create a friction between the parts and consequently create a movements and vibrations that resulted the most productive during the field tests.

HSP SPOON HOOK BARBLESS

5 pcs per pack

🇮🇹 L'amo di ricambio senza ardiglione da montare sui vostri ondulanti. Ottimo se volete praticare il Catch&Release e la pesca responsabile, o semplicemente per rispettare i divieti delle zone a regime specifico. La curva dell'amo permetterà di non perdere il pesce durante il combattimento, pur senza danneggiare il pesce che potrà essere facilmente rilasciato.

🇬🇧 The spare barbless hook to be mounted on your spoons. Great if you want to practice Catch & Release and responsible fishing, or simply to comply with the prohibitions of the areas with specific regulations. The curve of this hook will not miss the fish during the fight, without damaging the fish, so it can be easily released

HERAKLES X-TER 100M

Herakles X-TER è il filo di ultima generazione che cambia il tuo modo di concepire la pesca con i microspoon. Il suo affondamento, unito alla bassa percentuale di allungamento, ti trasmettono il più impercettibile dei movimenti; riuscirai quindi a far nuotare in modo perfetto ogni micro spoon, avvertendo anche le mangiate più subdole. Grazie alle nuove tecnologie, questo polyester ha un'ottima resistenza all'abrasione. La sua peculiarità è essere un filo rigido con poca memoria, quindi sensibilissimo, facile da imbobinare e ottimo da utilizzare tutto l'anno. Con X-TER conseguirai gli obiettivi che prima ti sembravano irraggiungibili.

Herakles X-TER is the next-gen line who will improve your microspoon fishing tactics. Its sinking action and lowstretch feature make you able to feel the most subtle movement. This bleeding-edge technology polyester grants an extreme resistance to abrasion. A low-memory rigid line of great sensitivity, easy to spool, functional in every season of the year. With X-TER you will claim even the most distant goals to reach.

HERAKLES AREA XFC 100M

Il fluoro coated unisce i vantaggi del fluoro carbon e quelli del nylon. XFC in particolare ha un'altissima resistenza sul nodo e resistenza alla trazione senza pari nei fluorocated. I plus rispetto al nylon maggiore resistenza all'abrasione, bassissima visibilità in acqua, minor elasticità. I vantaggi rispetto al fluorocarbon sono minor rigidità, maggior scorrevolezza nel lancio e nel recupero. Insomma un nylon più resistente, più trasparente e meno elastico, o un fluorocarbon meno rigido e più gestibile nei mesi freddi. In una parola XFC il fluoro coated per il trout area e per il light spinning.

Fluorocated combines the advantages of fluorocarbon with those of nylon. XFC in particular has very high knot resistance and unmatched tensile strength in fluorocated lines. Compared to nylon, it offers greater resistance to abrasion, very low visibility in water, and less stretch. The advantages compared to fluorocarbon are less rigidity, and greater smoothness in the cast and retrieval. In short, a more resilient, more transparent and less stretchy nylon, or a less rigid fluorocarbon that is more manageable during wintertime. In one word, XFC, the fluorocated for trout area and for light spinning.

HERAKLES AREA RELEASER

La versione ottimizzata nella forma e nella lunghezza del releaser telescopico di Herakles. Accessorio indispensabile per l'equipaggiamento dell'agonista di trout area e per chiunque si diletta in questa tecnica. Serve per slamare al volo le trote senza neanche toccarle. La nuova curvatura in filo d'acciaio scorrerà sulla lenza per liberare le trote ancor più facilmente. La forma dello slamatore è stata modificata per ottimizzare i tempi di rilascio e per rendere minimi i rischi di rottura della lenza. La lunghezza del manico aumentata fino a 68cm offre più regolazioni e un uso più agevole anche in laghi con sponde alte.

The optimised version in the shape and length of the Herakles telescopic releaser. An indispensable accessory for the equipment of those who enjoy trout fishing and for whomever is a fan of this technique. It is used to unhook your trout on the fly, without even touching it. The new curvature in steel wire eases the line, allowing you to unhook the trout with even more ease. The shape of the releaser has been modified to optimise the time of release and to minimise the risk of breaking the line. The length of the handle which has been extended up to 68 cm, offers several settings and is more comfortable to use in lakes with a higher bank.

HERAKLES RELEASER HOLDER

Il porta releaser dotato di split ring e moschettone da indossare in vita per trovare e riporre il releaser più agevolmente. Lungo 14cm è utilissimo per il trout area soprattutto in inverno quando vestiti pesanti e giacche non rendono agevoli i movimenti. In questi frangenti questo accessorio può fare la differenza tra prendere, o perdere una trota.

The releaser holder with split ring and snap hook can be worn on your belt to find and replace the releaser more easily. It is 14 cm long and extremely handy for trout fishing, especially in winter when heavy gear and coats can hinder your movements. In these situations, it is an accessory that can make the difference between catching and losing a trout.

AREA LANDING NET HEAD LIGHT RUBBER

🇮🇹 Guadino specifico da trout area. La testa di guadino in alluminio con forma e aggancio ottimizzati. La rete dal design innovativo, corta nella parte anteriore e più profonda in quella posteriore, serve per agevolare e velocizzare l'entrata in acque e assicurare la cattura. Leggera e performante è stata ideata per le catture e i tipici rilasci veloci delle competizioni di trout area. Nata per i manici Herakles si adatta a tutti quelli muniti di filettatura europea. *landing net heads, it is suitable for all those with European thread.*

🇬🇧 Landing net specifically for trout fishing. The aluminium head of the landing net has an optimised shape and hook. The innovative design of the net, short at the front and deeper at the back, serves to ease and speed up entry into the water, as well as ensuring the catch. Light and high-performing, it was devised for the typical fast catches and releases common to trout fishing competitions. Developed for Herakles handles, but it can be used with all handles that are equipped with European threading.

CODE	SIZE
GUHAN11	39 x 41 x 22 cm

AREA LANDING NET HEAD TRANSPARENT PVC

🇮🇹 Guadino specifico da trout area. La testa di guadino in alluminio con forma e aggancio ottimizzati. La rete in PVC trasparente è poco profonda e più tesa delle altre per agevolare e velocizzare il rilascio. Ottima per le catture e i tipici rilasci veloci delle competizioni di trout area. Nata per i manici Herakles si adatta a tutti quelli muniti di filettatura europea.

🇬🇧 Landing net specifically for trout fishing. The aluminium head of the net has an optimised shape and hook. The transparent PVC net is not too deep and stiffer than others, to facilitate and speed up the release. Excellent for fast capture and release, which is typical of trout fishing competitions. Developed for Herakles handles, but it can be used with all handles that are equipped with European threading.

CODE	SIZE
GUHAN12	39 x 41 x 18 cm

AREA LANDING CARBON NET HANDLE

🇮🇹 Il manico di guadino monopezzo in carbonio, leggero ed elegante. Grazie al trattamento anti sliding potrete impugnarlo saldamente anche con le mani infreddolite, o munite di guanti. Si tratta di un oggetto in cui la praticità si unisce allo stile, utile e bello. Nato per le teste di guadino Herakles si adatta a tutte quelle con filettatura europea.

🇬🇧 This one-piece landing net handle in carbon is both light and stylish. Thanks to the anti-sliding treatment, you can hold it firmly even with cold hands or when wearing gloves. It is an object which combines practicality with style, use and beauty. Built for Herakles landing net heads, it is suitable for all those with European thread.

CODE	SIZE
GUHAN10	80 cm

AREA LANDING NET HANDLE

🇮🇹 Il manico di guadino in alluminio, in 2 sezioni. La chiusura regolabile permette di portarlo alla lunghezza desiderata tra 65,5cm e 123cm. Il grip rende l'impugnatura salda anche con mani infreddolite, o munite di guanti. Nato per le teste di guadino Herakles si adatta a tutte quelle con filettatura europea.

🇬🇧 The aluminum landing net handle in 2 sections. The adjustable closure allows you to bring it to the desired length between 65.5 cm and 123 cm. The grip makes the handle firm even with cold hands or when wearing gloves. Built for Herakles landing net heads, it is suitable for all those with European thread.

AREA BOX

Un astuccio porta artificiali pensata per il trout area e il light spinning. Dotata di porta esche di diversa misura che si possono fissare in qualsivoglia posizione all'interno dei due compartimenti della scatola. Il setto trasparente evita che le esche dei due diversi compartimenti si impiglino. Ottima soluzione per riporre spoon e hard bait.

The artificial lures box designed for trout fishing and light spinning. It is equipped with lure cases of different sizes, that can be fixed in any position within the box's 2 sections. The transparent partition prevents the lures that are found in the different sections getting entangled. It is an excellent solution for storing spoons and hard bait.

CODE	SIZE
SCHKAB19	15 x 20 x 3,5 cm

AREA CARBON HIP BAG

Un marsupio di dimensioni contenute, comodo e leggero; pensato per le gare di trout area e per i momenti in cui l'esca deve essere trovata, montata e riposta in tempi brevissimi. Dotato di interno in EVA su cui appuntare gli ami delle esche e anelli a forma di D per appendere gli accessori. È la soluzione migliore per chi ha le idee chiare e non ha tempo da perdere.

A compact, lightweight and comfortable hip bag developed for Area Trout fishing, perfect for those occasions when the specific lure must be selected, rigged and stored in a very short time. Inner EVA plates to perfectly hang lures hooks and D shaped rings to attach different accessories. It's the best solution for practical anglers without wasting time to look for specific lures and accessories.
